WorldFin Astro 11 (Premium Edition)

WorldFin Astro 11 Premium Edition is a focused, professional Windows Program for financial astrology, uniting classical principles with live market data in one place. It brings together Panchang, Sarvatobhadra Chakra (SBC), KP, Naadi, time-cycle analysis, planetary aspects, and price–time tools linked directly to equities, indices, and commodities. The central Work Screen Main acts as a live trading cockpit, showing transit Lagna/Rashi, aspects, Lagna strength, Kakshya values, and Ashtak Varga views in a single flow. Powerful SBC and classical chakras help you read support, resistance, Vedha, and pressure zones with clarity.

For research and strategy building, WorldFin Astro 11 includes Market Today, Historical Data View, Common Points Search, Transit View, and Astro Planet Movements Impact Search for systematic scanning and back-testing. Condition Maker/Viewer, Equal Declination Search, and visual transit tools let you define and verify your own trading rules. A dedicated KP tools suite and detailed astrological profiles of stocks, indices, and commodities combine Dasha, Shadbala, and graphical views into clear trading guidance. WorldFin Astro 11 turns scattered astro-market knowledge into a structured, testable trading edge, always alongside disciplined risk management.

Index

1.1.1- Transit Lagna/Rashi, Birth Chart for Selected Native, Transit Navamsha Chart

1.1.2- Detailed Panchang

1.1.3- Planets to Planets Distance (Aspect) – Rashi Chart, Transit Chart

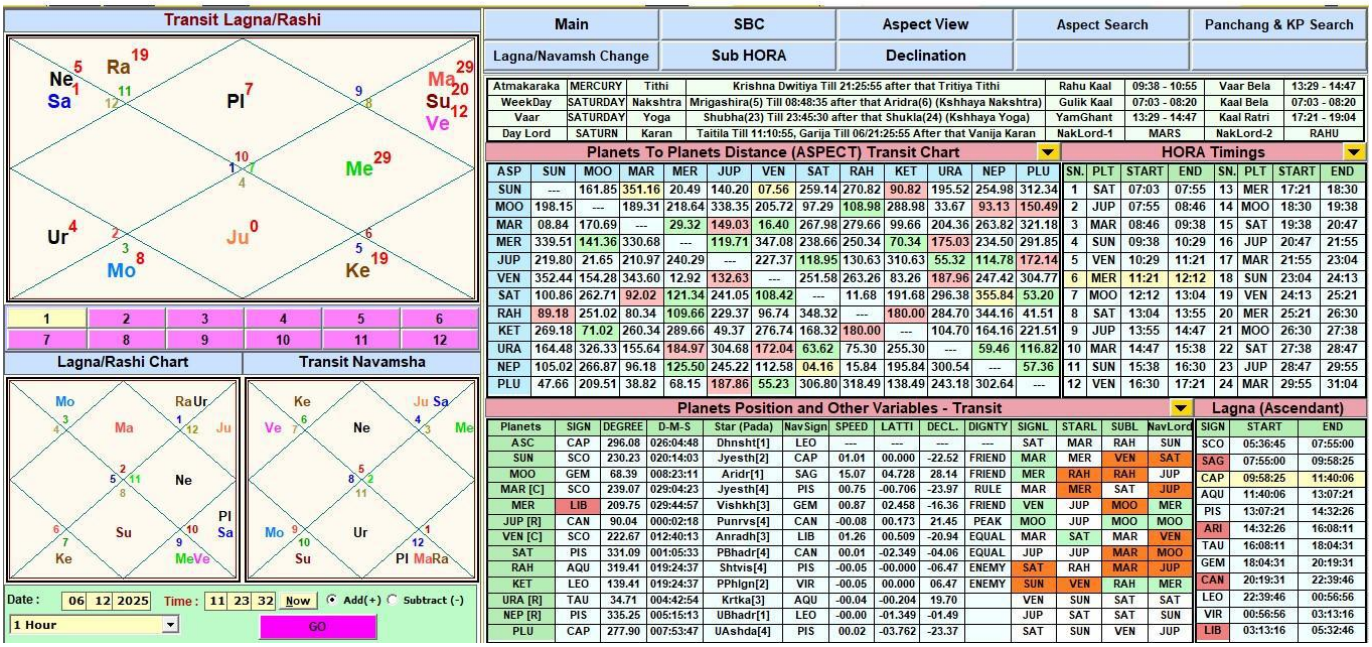
28.1.1 Monthly Graphical View of share, index, commodity, or market instrument

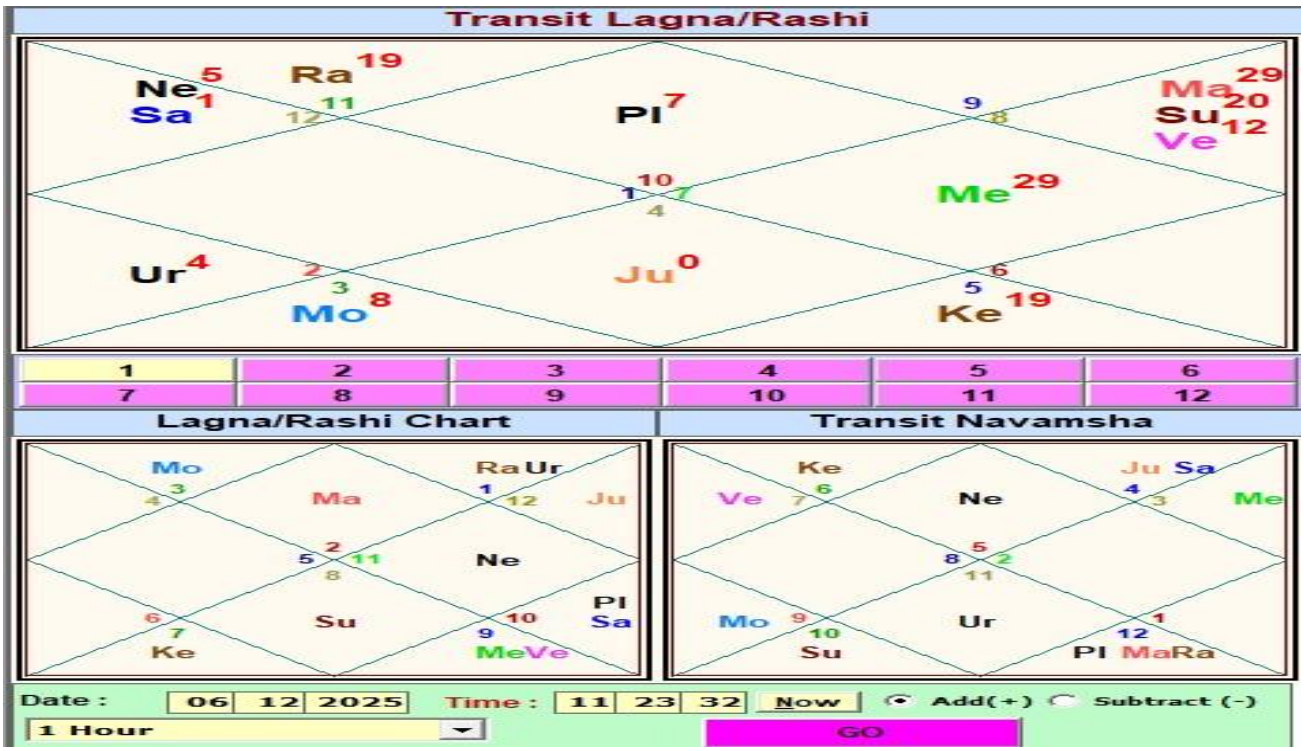
29.1.1 Hardware and Software Requirement and Price for this Application

Work Screen Main



Tab – Main

1.1.1- Transit Lagna/Rashi, Birth Chart for Selected Native, Transit Navamsha Chart



1.1.2- Detailed Panchang

Atmakaraka	MERCURY	Tithi	Krishna Dwitiya Till 21:25:55 after that Tritiya Tithi	Rahu Kaal	09:38 - 10:55	Vaar Bela	13:29 - 14:47
WeekDay	SATURDAY	Nakshtra	Mrigashira(5) Till 08:48:35 after that Aridra(6) (Kshhaya Nakshtra)	Gulik Kaal	07:03 - 08:20	Kaal Bela	07:03 - 08:20
Vaar	SATURDAY	Yoga	Shubha(23) Till 23:45:30 after that Shukla(24) (Kshhaya Yoga)	YamGhant	13:29 - 14:47	Kaal Ratri	17:21 - 19:04
Day Lord	SATURN	Karan	Taitila Till 11:10:55, Garija Till 06/21:25:55 After that Vanija Karan	NakLord-1	MARS	NakLord-2	RAHU

This tool is extremely valuable because it provides all essential **daily Panchang elements**—such as Tithi, Nakshatra, Yoga, Karan, Vaar, Rahu Kaal, Gulika Kaal, Yamagant, Kaal Bela, and Kaal Ratri—on one compact screen, allowing a trader to instantly judge the quality of the day. As shown in the picture, the tool also displays special factors like **Atmakaraka**, **Day Lord**, **Nakshatra Lords**, and their timings, which help determine when planetary energies are supportive or risky for trading.

1.1.3- Planets to Planets Distance (Aspect) – Rashi Chart, Transit Chart

Planets To Planets Distance (ASPECT) Rashi Chart

ASP	SUN	MOO	MAR	MER	JUP	VEN	SAT	RAH	KET	URA	NEP	PLU

This tool is highly valuable in financial astrology because it shows the **exact distance of each planet from all twelve houses** at any moment, helping traders understand how planetary energy is influencing different market zones. The color-coded table highlights strong, weak, or sensitive house connections, making it easy to spot when a planet is activating key houses like the 2nd (money flow), 5th (speculation), 8th (volatility), or 12th (losses). Sudden shifts in these distances often correspond with changes in trend, breakout points, reversals, or increased volatility.

1.1.5- Planets to Planets Distance (180°) – Transit Chart

Planets To Planets Distance (180) Transit Chart

ASP	SUN	MOO	MAR	MER	JUP	VEN	SAT	RAH	KET	URA	NEP	PLU

This tool is extremely valuable because it shows the **exact angular distance between every pair of planets**, helping traders identify when major planetary tensions or harmonies are forming. Since markets react strongly to planetary angles — especially oppositions (180°), squares (90°), trines (120°), and conjunctions (0°) — this chart becomes a real-time alert system for upcoming volatility or trend shifts. The color-coded layout instantly highlights planets approaching or moving away from market-sensitive degrees, allowing traders to see when powerful energies like **Saturn–Mars**, **Jupiter–Rahu**, or **Venus–Mercury** configurations are building up.

1.1.6- Vaar / Tithi / Nakshatra / Yoga (VTN Yoga)

Vaar/Tihi/Nakshta Yoga

Vaar Nakshtra Yoga	Sarvarth Sidhhi Yoga	08:12:2025 (04:11:34) - 08:12:2025 (07:04:25)
Vaar Tithi Yoga	Vish Tithi Yoga	07:12:2025 (18:25:05) - 08:12:2025 (07:04:25)
Anandadi Yoga	Dhwaja (Ketu) Yoga	07:12:2025 (07:03:42) - 08:12:2025 (04:11:34)
Anandadi Yoga	Shrivatsa Yoga	08:12:2025 (04:11:34) - 08:12:2025 (07:04:25)

This tool is extremely important because it identifies **powerful Panchang yogas** formed by the combination of weekday (Vaar), lunar day (Tithi), and Nakshatra — each of which can significantly influence market sentiment and trading behavior. The table clearly shows which yogas are active, along with their exact start and end times, helping traders understand when **favorable or unfavorable energies** dominate the market. Yogas like **Sarvartha Siddhi, Dwaja (Ketu), Shrivatsa, Vish Tithi Yoga**, etc., have strong correlations with **market volatility, sudden reversals, strong rallies, or weak trading sessions**.

This tool is one of the most crucial components for real-time market prediction because it brings together every planetary detail that directly influences short-term and long-term price movements. It shows **each planet's sign, exact degree, Nakshatra, Pada, speed, latitude, declination, dignity, sign lord, star lord, sub lord, and navamsa lord** — all in a single, easy-to-read table. These variables help a trader instantly judge planetary strength, friendliness, combustion effects, retrograde influence, and momentum shifts. The color-coded dignity column (Friend, Enemy, Neutral, Rule) makes it simple to understand which planets are powerful and which are weak, which directly affects **market sentiment, trend strength, volatility, and reversal timing**. Because markets react strongly when planets change speed, declination, Nakshatra, or sub-lord, this tool gives traders a precise astrological snapshot of the energetic climate of the day. With this panel, users can make highly informed decisions by understanding the **true real-time planetary environment** behind market movement.

1.1.8- Houses Position and Other Variables – Birth and Transit

HN.12	SAG	266.65	026:38:46	PAshda[4]		JUP	VEN	KET	

This tool is extremely powerful because it shows **which planets are sitting in which houses during the transit**, along with the exact sign, degree, Nakshatra, and Pada of each house. In financial astrology, houses act as the "functional areas" of market activity — such as momentum, volatility, sentiment, speculation, institutional activity, gains, losses, and trend direction. By showing **planets occupied in each house**, the tool instantly reveals which houses are activated at the moment, indicating whether the market will behave bullish, bearish, volatile, or flat. The panel also displays each house's **sign lord, star lord, and sub lord**, helping the trader understand deeper planetary control over that house. When a powerful planet enters a sensitive house or when malefics occupy important trading houses (like 2, 5, 8, 11), strong market movement usually follows. This tool gives traders a clear astrological map of **house-level energy distribution**, allowing them to identify trend shifts, breakout zones, reversal days, and high-impact periods with precision.

1.1.9- Lagna Changes Strength and Kakshya Value

Lagna Changes Strength and Kakshya Value							
SIGN	START	END	Lagna Strength	Lagna Quality	K Value	KVal +Rahu	
Scorpio	05:32:45	07:51:05	27.68	Good	3	4	
Sagittarius	07:51:05	09:54:30	06.92	Not Good	3	4	
Capricorn	09:54:30	11:36:11	34.60	Good	4	5	
Aquarius	11:36:11	13:03:26	46.71	Very Good	4	5	
Pisces	13:03:26	14:28:31	58.82	Excellent	3	4	
Aries	14:28:31	16:04:16	19.03	Not Good	2	3	
Taurus	16:04:16	18:00:31	24.22	Not Good	3	4	
Gemini	18:00:31	20:15:31	38.06	Good	3	4	
Cancer	20:15:31	22:35:51	41.52	Very Good	2	3	
Leo	22:35:51	00:53:01	41.52	Very Good	4	5	
Virgo	00:53:01	03:09:16	50.17	Excellent	4	5	
Libra	03:09:16	05:28:51	51.90	Excellent	4	5	

This tool is highly valuable in intraday and short-term financial astrology because it shows **exact Lagna changes throughout the day**, along with their **strength, quality, and Kakshya values**. Lagna acts like the "current mood or energy" of the market, and each Lagna brings a different type of movement — bullish, bearish, volatile, or directionless. By displaying start and end times for every Lagna period, the tool helps the trader know **which time window is supportive for trading and which should be avoided**.

The Lagna Strength column reveals how powerful or weak the Lagna is at that moment, directly affecting market momentum. The Lagna Quality (Good, Very Good, Excellent, Not Good) provides a quick visual signal for whether the trader can expect smooth movement or sudden spikes. The Kakshya values (K and K+Rahu) further refine intraday timing by showing the energy intensity of each Lagna.

1.1.10- Viewing Transit from Ashtak Varga

Viewing Transit From Ashtak Varga

Planets	Sign	BAV in Sign	SAV in Sign	Kaksha BAV	K-Lord	K-Strength
Sun	Scor	5	23	0	Merc	2
Moon	Gemi	3	30	1	Sun	5
Mars	Scor	3	23	0	Asc	1
Merc	Libr	4	24	1	Asc	7
Jup	Cncr	6	30	1	Sat	4
Ven	Scor	3	23	0	Sun	3
Sat	Pisc	3	30	0	Sat	4
Rahu	Aqua	3	29	0	Mars	6

This tool is extremely powerful because it decodes **planetary strength during transit** using the Ashtak Varga (BAV, SAV, and Kaksha values), giving traders a clear picture of how supportive or harmful each planet is at any moment. The BAV in Sign shows the **individual planet's strength** in the current sign, while the SAV in Sign reveals the **collective planetary support**, which is crucial for identifying strong bullish or bearish phases in the market. Kaksha BAV further refines this by showing whether the planet is currently moving through a favorable, neutral, or unfavorable Kaksha — a key factor in timing market reversals or breakouts.

1.1.11- HORA Timings

HORA Timings

SN.	PLT	START	END	SN.	PLT	START	END
1	SAT	07:03	07:55	13	MER	17:21	18:30
2	JUP	07:55	08:46	14	MOO	18:30	19:38
3	MAR	08:46	09:38	15	SAT	19:38	20:47
4	SUN	09:38	10:29	16	JUP	20:47	21:55
5	VEN	10:29	11:21	17	MAR	21:55	23:04
6	MER	11:21	12:12	18	SUN	23:04	24:13
7	MOO	12:12	13:04	19	VEN	24:13	25:21
8	SAT	13:04	13:55	20	MER	25:21	26:30
9	JUP	13:55	14:47	21	MOO	26:30	27:38
10	MAR	14:47	15:38	22	SAT	27:38	28:47
11	SUN	15:38	16:30	23	JUP	28:47	29:55
12	VEN	16:30	17:21	24	MAR	29:55	31:04

The **Hora Timings Tool** is one of the most practical intraday forecasting tools for traders, because it breaks the trading day into planetary time segments governed by Sun, Moon, Mars, Mercury, Jupiter,

Venus, and Saturn. Each planet rules a specific "Hora," and its influence directly affects **market sentiment, volatility, liquidity, and price movement** during that exact period.

1.1.12- Moon Sub Change Timings

Moon Sub Change Timings					
Start	End	Naksh.	NakL	SubL	8thL
05:50:01	06:53:31	Mrgshr	MAR	SUN	SUN
06:53:31	08:39:21	Mrgshr	MAR	MOO	SUN
08:39:21	11:50:21	Aridr	RAH	RAH	MOO
11:50:21	14:40:36	Aridr	RAH	JUP	MOO

04:48:11	06:03:56	Aridr	RAH	MAR	MOO
06:03:56	08:57:31	Punrvs	JUP	JUP	MAR

The **Moon Sub Change Timings Tool** is one of the most powerful intraday timing indicators because the Moon is the fastest-moving planet and directly governs **market sentiment, emotions, panic, excitement, and sudden reactions**. As the Moon shifts through **Nakshatra** → **Sub** → **Sub-Sub**, even small changes can create strong intraday movements in price.

This tool shows the **exact timings** when the Moon changes its Nakshatra, Sub Lord, Sub-Sub Lord, and even its **8th-from-Moon position**, which is crucial for identifying **volatile, risky, or trend-changing windows**. These micro-changes often align with sudden rallies, dips, breakouts, fake moves, or reversals. For example, a shift from a benefic Sub Lord (Jupiter, Venus) to a malefic Sub Lord (Rahu, Ketu, Saturn) frequently triggers a noticeable sentiment shift on charts.

1.1.13- Chaughadiya Timings

Chaughadiya Timings			
SN.	NAME	START TIME	END TIME
1	Kaal	07:02:59	08:20:17
2	Shubh	08:20:17	09:37:34
3	Roga	09:37:34	10:54:52
4	Udveg	10:54:52	12:12:10
5	Chanchal	12:12:10	13:29:27
6	Labh	13:29:27	14:46:45
7	Amrit	14:46:45	16:04:02
8	Kaal	16:04:02	17:21:20
1	Labh	017:21:20	019:04:08
2	Udveg	019:04:08	020:46:56
3	Shubh	020:46:56	022:29:44
4	Amrit	022:29:44	024:12:32
5	Chanchal	024:12:32	025:55:19
6	Roga	025:55:19	027:38:07
7	Kaal	027:38:07	029:20:55
8	Labh	029:20:55	031:03:43

The **Chaughadiya Timings Tool** brings an age-old Vedic time-selection system directly into modern trading, allowing users to identify the most favourable and unfavourable intraday periods with precision. Each Chaughadiya — such as **Shubh, Labh, Amrit, Udveg, Kaal, Rog, Chanchal** — carries a strong energetic influence on decision-making, market flow, and price stability. As shown in the picture, the tool breaks the entire trading day into clear time blocks with **start and end times**, helping traders instantly know which windows support positive outcomes and which periods are risky or unstable.

Good Chaughadiyas like **Shubh, Labh, and Amrit** often align with smoother price movements, stronger trend continuation, and successful entries. Negative ones like **Kaal, Rog, and Udveg** are linked with volatility, confusion, false breakouts, or sudden reversals. By following this ready-to-use timetable, traders can time their actions with cosmic rhythms — avoiding bad periods and entering the market during supportive ones. This makes the tool extremely valuable for improving intraday timing, enhancing accuracy, and increasing confidence in trading decisions.

1.1.14- Muhurt Timings

Muhurt Timings						
SN.	NAME	START	END	NAME	START	END
1	Shiva	07:02:59	07:44:12	Shiva	17:21:20	18:16:10
2	Sarpa	07:44:12	08:25:26	Ajapad	18:16:10	19:10:59
3	Mitra	08:25:26	09:06:39	Ahirbundhya	19:10:59	20:05:49
4	Pittar	09:06:39	09:47:53	Pusha	20:05:49	21:00:38
5	Vasu	09:47:53	10:29:06	Ashwini Kumar	21:00:38	21:55:28
6	Jala	10:29:06	11:10:19	Yama	21:55:28	22:50:17
7	Vishvedeva	11:10:19	11:51:33	Agnee	22:50:17	23:45:07
8	Brahma(ABH)	11:51:33	12:32:46	Brahma	23:45:07	24:39:56
9	Brahma	12:32:46	13:14:00	Chandra	24:39:56	25:34:46
10	Indra	13:14:00	13:55:13	Aditi	25:34:46	26:29:35
11	Indragni	13:55:13	14:36:26	Brihspati	26:29:35	27:24:25
12	Rakshasha	14:36:26	15:17:40	Vishnu	27:24:25	28:19:14
13	Varun	15:17:40	15:58:53	Surya	28:19:14	29:14:04
14	Aryama	15:58:53	16:40:07	Vishvakarma	29:14:04	30:08:53
15	Bhaga	16:40:07	17:21:20	Pawan	30:08:53	31:03:43

The **Muhurta Timings Tool** brings one of the most powerful time-selection systems from Vedic astrology into daily market analysis. Every trading day is divided into multiple **Muhurta segments** — such as *Shiva, Sarpa, Mitra, Vasu, Brahma, Indra, Vishnu,* and more — each carrying its own energetic

quality that affects decision-making, market sentiment, and price behaviour. As seen in the image, the tool provides **precise start and end timings** for each Muhurta throughout the day, giving traders a clear map of supportive vs. challenging periods.

Positive Muhurtas like **Mitra, Vasu, Vishnu, Surya, Brahma, Shubha** are linked with clarity, strength, momentum, and successful actions — ideal for taking fresh positions or executing important trades. Challenging Muhurtas like **Sarpa, Yama, Aghora, Rakshasa** may create volatility, emotional distractions, hesitation, or sudden market swings, making them suitable only for cautious observation.

1.1.15- Planets Navamsha Change

Planets Navamsha Change			
1	SUN	CAP	08:08
2	MOO	SCO	03:31
3		SAG	08:49
4		CAP	14:07
5		AQU	19:27
6	MER	CAN	20:45

The **Planets Navamsha Change Tool** is a highly valuable micro-timing indicator for traders who follow Vedic and Nadi-based financial astrology. Every time a planet shifts its **Navamsha (1/9th division of a sign)**, its energy, strength, and market influence change instantly — often triggering sharp reactions in intraday charts.

In fast-moving markets — especially indices, forex, bullion, and crypto — Navamsha changes often correspond with unexpected moves because the planet's underlying subtle strength is altered. By tracking these changes in real time, traders gain a timing advantage and can align their decisions with the most sensitive planetary shifts.

1.1.16- Planets Sign / Star / Pada Change

Planets Sign/Star/Pada Change				
1	SUN		Jyes [2]	08:08
2	MOO		Mrig [4]	03:31
3			Ardr [1]	08:49
4			Ardr [2]	14:07
5			Ardr [3]	19:27
6	MER	SCO	Visa [4]	20:45

The **Planets Sign/Star/Pada Change Tool** is one of the most powerful timing tools in financial astrology because it tracks the **exact moments when planets shift their sign, nakshatra, or pada** — each of which creates a noticeable impact on market psychology and price action.

Sarvatobhadra chakra is a complex and highly detailed astrological chart used in Indian astrology. This chart is considered to be one of the most powerful tools in astrology, as it provides a comprehensive analysis of an individual's past, present, and future.

One important concept in Sarvatobhadra chakra is the role of vedha form. Vedha form, also known as "vedha pada," is a term used to describe the positions of the planets in relation to each other. The vedha form is an important factor in interpreting the meaning of the Sarvatobhadra chakra, as it provides insight into the energies and influences at work in an individual's life.

In financial astrology, the vedha form is particularly important. By analyzing the vedha form of an individual's chart, astrologers can gain insight into the person's financial prospects and potential for success in the market.

There are several different vedha forms in Sarvatobhadra chakra, each with its own significance in financial astrology. The most commonly used vedha forms include the "shubha" (auspicious) vedha, the "ashubha" (inauspicious) vedha, and the "mrityu" (death) vedha.

The shubha vedha occurs when the planets are positioned in a way that is considered to be favorable for financial success. This vedha form can indicate a period of growth and prosperity in an individual's financial life.

The ashubha vedha occurs when the planets are positioned in a way that is considered to be unfavorable for financial success. This vedha form can indicate challenges or obstacles in an individual's financial life.

In financial astrology, the vedha form is an important factor in interpreting the meaning of the Sarvatobhadra chakra. By analyzing the positions of the planets in relation to each other, astrologers can gain valuable insight into an individual's financial prospects and make more informed decisions about their investments.

Overall, the importance of vedha form in Sarvatobhadra chakra cannot be overstated. By understanding the role and significance of vedha form, astrologers and investors alike can gain valuable insight into the performance of financial markets and make more informed decisions about their investments.

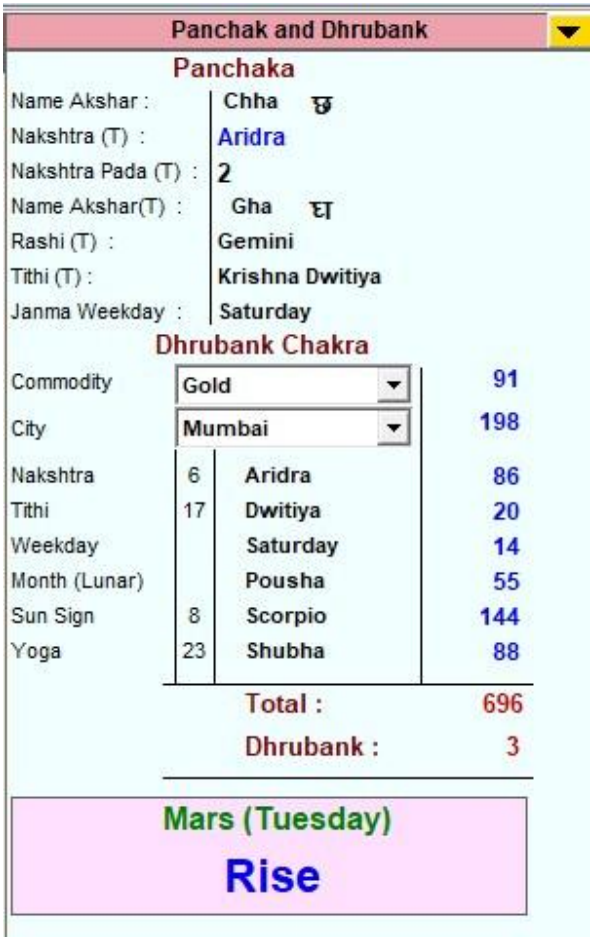
In SBC (Sarvatobhadra Chakra) analysis, Vedha plays a key role in understanding how planets block, disturb, or support market trends. Each planet sits in a specific Nakshatra, Nakshatramsha, Nadi, Akshar, and directional Vedha point, and these factors decide whether the planet's energy is free-flowing or restricted. When a planet faces a Front Vedha, Right Vedha, or Left Vedha from another planet or Nakshatra, its natural results get interrupted, creating sudden reversals, unexpected volatility, or price stagnation in financial markets. In intraday trading, this helps traders understand why a strong indicator suddenly weakens or why a trend pauses even when all technical signals are positive.

The table also shows ROM, Lattā, and Nadi interactions, which further refine the impact of Vedha. For example, planets under Prachand or Amrit Nadi act more aggressively, and if they face Vedha, they can create sharp spikes or rapid corrections in prices. A planet in Ashubh Lattā or hit by multiple Vedhas often triggers fear, profit-booking, or sideways movements, while a planet supported by Shubh Vedha zones may lead to steady bullishness. These subtle yet powerful interactions help financial astrologers catch micro-movements and reversal timings with high precision.

1.2.2 - Panchak and Dhruwank tool



Panchak and Dhrubank

Panchaka

Sun Sign	8	Scorpio	144
Yoga	23	Shubha	88
		Total :	696
		Dhrubank :	3

Mars (Tuesday)

Rise

The **Panchak and Dhruwank tool** used in this application is extremely valuable in financial astrology because it connects time-based cosmic factors with commodity price behavior. Panchaka, derived from elements like Nakshatra, Tithi, Weekday, Yoga, and Rashi, helps identify the quality of the time for market activity. Each of these components carries a unique energy that affects emotion, volatility, and trend strength in trading. For example, certain Panchaka combinations create instability and price swings, while others bring steadiness or upward movement. Traders who understand these influences can choose the right moments for entries, exits, or avoiding trades during highly unstable Panchaka periods.

The **Dhruwank Chakra** takes this a step further by assigning numerical values to each time factor—Nakshatra, Tithi, Weekday, Month, Sun Sign, and Yoga. These values combine into a total score that indicates whether the commodity is likely to rise or fall during a particular session. A high positive score suggests firmness, support, or bullish sentiment, whereas a weaker Dhruwank hints at selling pressure or uncertain market conditions. Because it is calculated individually for each commodity and location, Dhruwank acts as a highly personalized timing tool for traders.

Together, Panchak and Dhruwank provide a structured system to judge intraday market mood with precision. Instead of relying solely on technical indicators, traders get a deeper astrological perspective that explains why markets behave a certain way at specific times. When the Dhruwank shows a strong rise signal and Panchaka is supportive, the trader gains confidence to act decisively. Likewise, when the Panchak combinations are

unfavorable, the trader knows to remain cautious. This blend of timing, numerics, and cosmic influence makes the tool a powerful asset in financial astrology–based trading strategies.

1.2.3 - Latta Chakra – Planets / Star

Latta Chakra Planets/Star				
Planet	Star	Direction	@ Birth	@ Transit
Sun	Front	12	Aswni	Aswni
Jyesth / Jyesth				
Moon	Behind	22	Hasth	Hasth
Aridr / Aridr				
Mars	Front	3	Aridr	PAshda

Mercury	Behind	7	Hasth	Magha
Moola / Vishkh				
Jupiter	Front	6	Rohni	UPhlgn
UBhadr / Punrvs			MA	
Venus	Behind	5	Swati	Hasth
Moola / Anradh			KE	
Saturn	Front	8	Krtka	Mrgshr
Dhnsht / PBhadr				
Rahu	Behind	9	Abhjt	Anradh
Bhrni / Shtvis				VE
Ketu	Behind	9	Punrvs	Krtka
Swati / PPhlgn				

The **Latta Chakra Planets/Star Tool** is a highly valuable forecasting feature because it reveals how planets *attack* or *support* each other based on their Nakshatra positions — a concept directly tied to sudden market swings. Latta (Vedha) relationships show whether a planet is giving **front**, **back**, or **side** pressure to another planet, and this pressure often translates into **market strength, weakness, volatility, or reversals**.

- **Front Latta planets create immediate and powerful reactions in the market**, often causing sharp moves or breakouts.
- **Behind Latta planets create hidden pressure**, resulting in unpredictable dips, spikes, or trend exhaustion.
- **Latta from malefics (Saturn, Mars, Rahu, Ketu)** can trigger fear, selling pressure, or volatility.
- **Latta from benefics (Jupiter, Venus)** can support recovery, bullish momentum, or strong buying interest.

- The tool helps traders see **which planets are attacking or supporting each other today**, allowing them to forecast strength, weakness, and trend changes more accurately.

1.2.4 – Transit on Nava Tara Chakra/Other Sensitive Nakshatras

Nava Tara Chakra @Transit

		SA

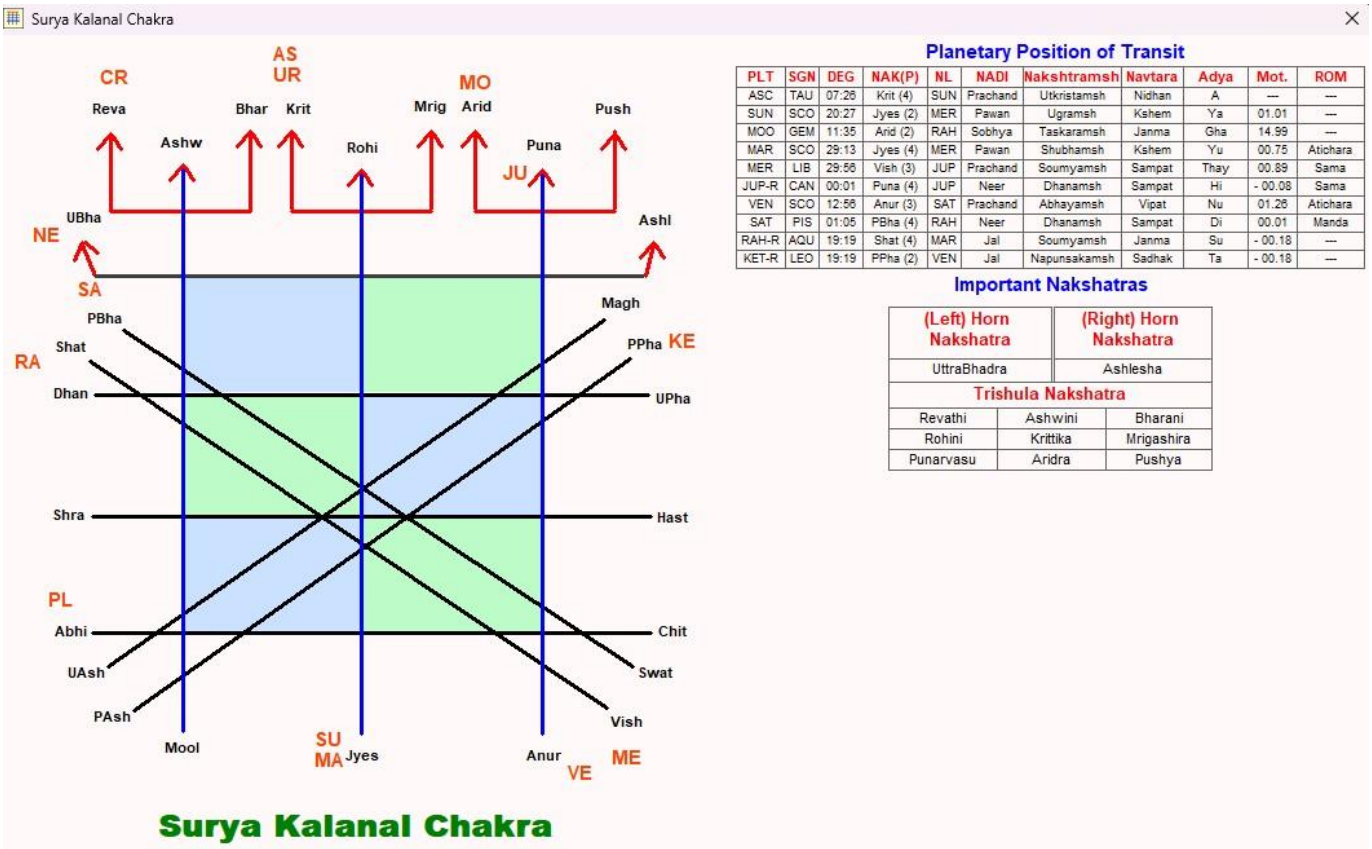
The **Other Sensitive Nakshatra** and **Nava Tara Chakra @ Transit** tools help traders identify the most sensitive and reaction-prone periods for any instrument by mapping birth-based and transit-based Nakshatra relationships. Each Nakshatra—Janma, Karma, Sanghatika, Samudaya, Vipat, Pratyari, Nidhana, Mitra, Ati-Mitra, and others—carries a unique energetic signature that can amplify gains, trigger volatility, or create sudden reversals in the market. By comparing a user's or a share's birth Nakshatra with the transit Nakshatra, these tools instantly highlight stress zones, growth periods, danger points, and supportive cosmic windows. The Nava Tara layout further divides every planetary movement into favorable, neutral, and unfavorable Nakshatra (Janma → Sampat → Vipat → Kshema → Pratyari → Sadhak → Nidhana → Mitra → AtiMitra), giving traders a powerful timing edge. With both tables displayed side by side, the user can visually spot periods of opportunity or caution, helping them decide when to enter, hold, or exit trades with much better confidence and precision.

1.2.5 – Importance of the Surya Kalanal Chakra in Financial Astrology



Planetary Position of Transit

PLT	SGN	DEG	NAK(P)	NL	NADI	Nakshtramsh	Navtara	Adya	Mot.	ROM

The **Surya Kalanal Chakra** is a special chart used in Vedic Astrology. Think of it as a special "wheel" or map that helps a person see how their life will go, especially for shorter periods or for a specific question. It is often used to predict things like sickness, arguments, or the result of a war, but it is also used in the world of money, or **financial astrology**.

How the Sun's Chakra Predicts Money Matters

The word "Surya" means **Sun**, and the Sun is all about power, government, important people, and your own life force. In financial astrology, the Sun's power in this chart can show the overall "health" or **strength** of the market and big businesses. The Surya Kalanal Chakra is made based on the position of the Sun in the sky's stars (Nakshatras) on a certain day. By looking at where other important stars fall on this chakra, a person can guess if a day, a week, or a month will be a time of **gains (making money)** or **losses (losing money)** for a business or a country's whole economy.

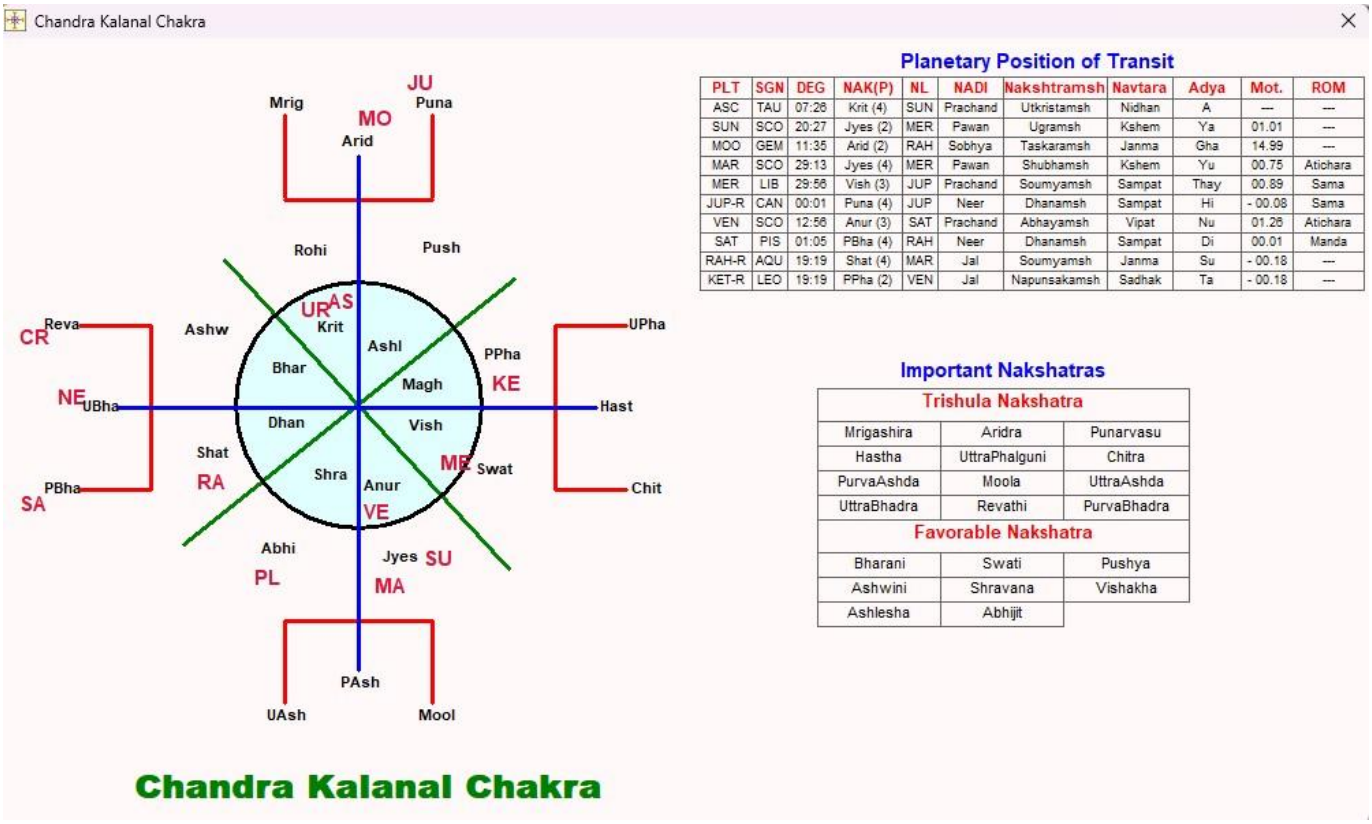
Seeing Big Ups and Downs in the Market

This special chakra is a helpful tool for people who try to guess when the stock market will have **big ups (bull markets)** or **big downs (bear markets)**. A successful financial astrologer might check the Surya Kalanal Chakra on the day the Sun moves into a new zodiac sign. If the chart shows signs of "gains in all fields," it might mean the market is going to move **up** for a while, telling traders that it's a good time to invest. On the other hand, if the chart points to fear or problems, it might signal a **drop** in the market.

Predicting Results of Big Decisions

Since this Chakra is also used to guess the outcome of **arguments, disputes, and conspiracies**, it is useful for judging the results of big things that affect money. For example, it might be used to predict if a new government rule will help or hurt a business, or what will happen after a big company has a disagreement with another company. In short, the Surya Kalanal Chakra helps astrologers see the **larger trends** and the **overall feeling** of the financial world, because it uses the powerful energy of the Sun to figure out if the world's money is headed for good times or bad times.

1.2.6 – Importance of the Chandra Kalanal Chakra in Financial Astrology



PLT	SGN	DEG	NAK(P)	NL	NADI	Nakshtramsh	Navtara	Adya	Mot.	ROM

Importance of the Chandra Kalanal Chakra in Financial Astrology

The word "Chandra" means **Moon**, and the Moon is very different from the Sun. While the Sun is about big picture things like the government and the whole market, the Moon is about the **public mind**, **feelings**, and **quick, daily changes**. The Chandra Kalanal Chakra is a special map that astrologers use to see how things will go for a very short time, like what will happen in the market *today*.

Predicting Daily Gains and Losses

The main job of the Chandra Kalanal Chakra is to check for **gains (making money)** and **losses (losing money)** on a given day. The Moon moves very fast—it changes signs every two and a half days—so this chart is very good for looking at *small, fast movements* in the market. Stock traders who buy and sell very often (called day traders) might look at this Chakra to help them guess if a particular day will be

good or bad for their quick trades. If the chart shows signs of "auspicious results" (good luck), the trader might be more brave.

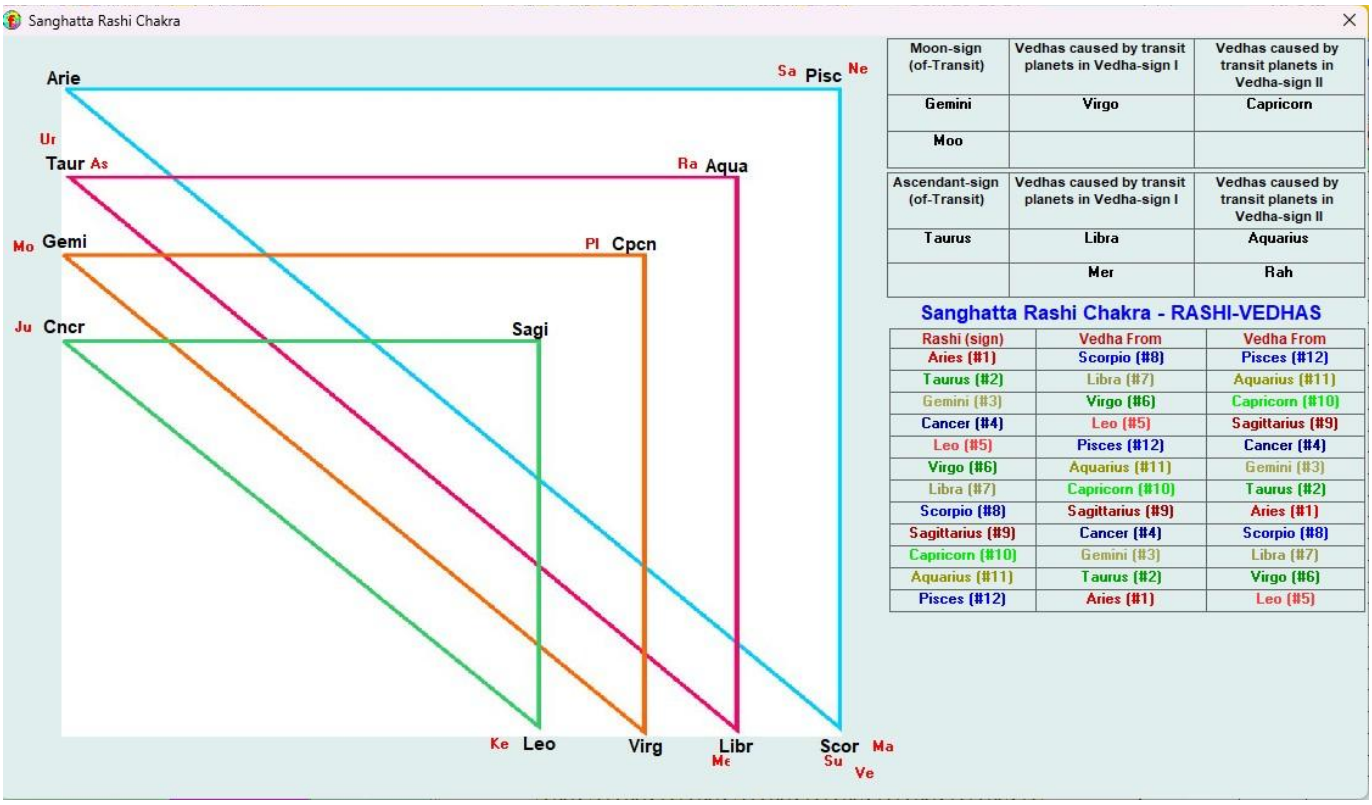
Reading the Public's Feelings About Money

The Moon rules over the **emotions, mood, and mind** of the public. In the stock market, when people are feeling hopeful and excited, prices go up. When they are scared or worried, prices often go down. The Chandra Kalanal Chakra helps an astrologer see this "public mood" for the day. If the chart shows bad signs (like being on a "trident" point), it might mean the public is going to panic, leading to a quick drop in stock prices.

How It Works with Personal Charts

This special chart compares the Moon's place in the sky right now to a person's **birth star** (Janma Nakshatra). So, even if the market is going up, this Chakra can tell an *individual* person if that day will bring them **comfort and victory** or **losses and problems** in their own investments. It gives a very personal look at the daily money flow. This makes it extremely useful for answering a quick question, like "Should I buy or sell this stock right now?" The result can be seen very quickly.

1.2.7 – Importance of the Sanghatta Rashi Chakra in Financial Astrology



Importance of the Sanghatta Rashi Chakra in Financial Astrology

The Sanghatta Rashi Chakra is one of the best tools for spotting **danger** and **big fights** in the world of money. In financial astrology, a "fight" can mean a big economic crisis, a sudden drop in the stock market, or a huge disagreement between countries about trade and money. This chart helps to see where these dangerous clashes will happen.

Spotting Big Financial Crashes

This chart works by showing the "clash" or *Vedha* between certain zodiac signs. When important planets that rule money, like Jupiter or Venus, get "clashed" by bad planets, like Saturn or Rahu, in this Sanghatta chart, it signals **big trouble** for the economy. Astrologers use this chart to predict when the stock market might have a major **crash** or when a large, important company might suddenly fail. It is not used for small, daily changes, but for those huge drops that scare everyone.

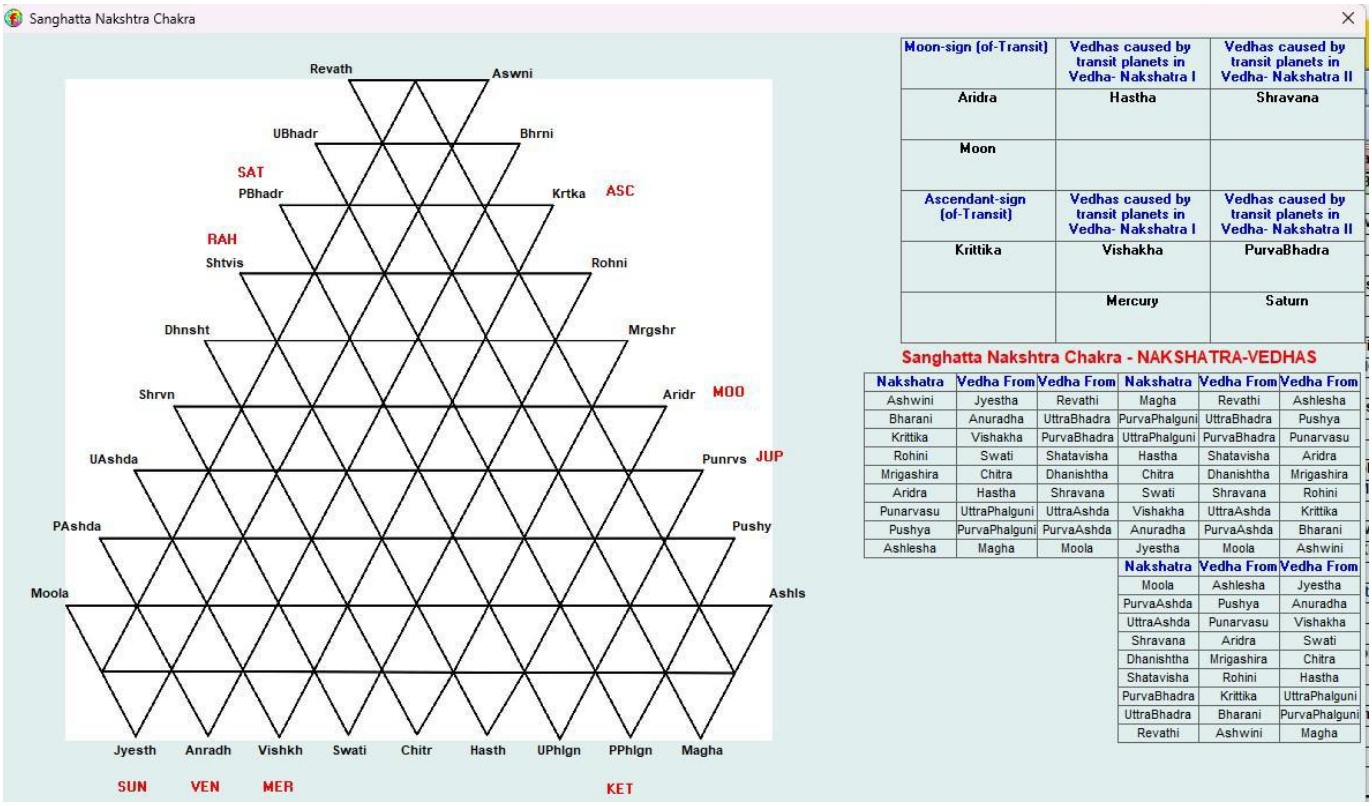
Checking Safety in Investments

The Sanghatta Rashi Chakra can be used to see if a country's chart or a company's chart is under attack from bad planetary transits. For example, if the signs connected to a country's wealth are being hurt on the Sanghatta Chakra, it might mean there will be a **recession** (when the economy shrinks) or a **major trade dispute** with another country. This chart helps investors know when to be very careful and when to hold their money instead of risking it in the market.

Looking at World Events and Money

Since this chart is also used to predict **wars** and **disasters**, it is very useful for big world-level financial issues. Wars or natural disasters always cause prices to change a lot, especially for things like oil, gold, or food. By using the Sanghatta Chakra, astrologers can get an idea of when these non-financial events will create **market panic** and where the biggest problems might happen, which is important for people who invest in worldwide markets.

1.2.8 – Importance of the Sanghatta Nakshatra Chakra in Financial Astrology



Importance of the Sanghatta Nakshatra Chakra in Financial Astrology

The Sanghatta Nakshatra Chakra is a key tool in financial astrology for spotting **major periods of crisis, fear, and huge losses**. It is based on the idea of *Vedha*, which means "piercing" or "attacking." In this chart, certain stars are set up to attack each other. When a bad planet (like Saturn or Rahu) moves through a star that is under attack, it signals a period of severe conflict and negative results in the world.

Finding Critical Points of Conflict

In financial astrology, "conflict" means a market that is not steady. The Sanghatta Nakshatra Chakra helps to find the exact stars that are most weak at a certain time. When bad planets pass over these weak stars, it can point to a **time of panic selling, sudden price drops, or big failures** for companies or large financial groups. It tells the astrologer when the market's "shield" is broken and when a large drop is most likely to happen.

Predicting Major Market Tops and Bottoms

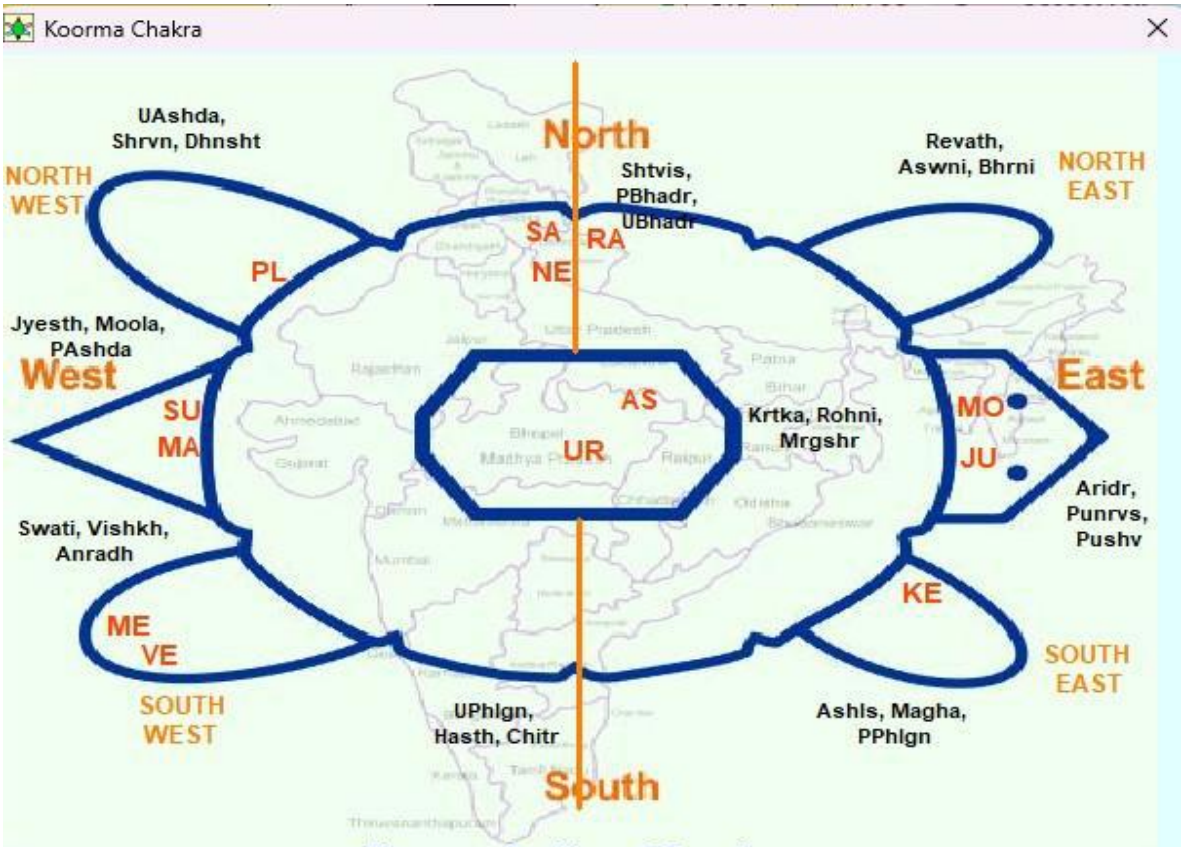
Astrologers use this chart to help guess when a major **market high (top)** or **market low (bottom)** will happen. When many important, slow-moving planets create a strong "clash" in the Sanghatta Nakshatra Chakra, it often means that a **major trend** is about to change. For example, a strong "clash" during a

market that has been going up for a long time might mean that a big crash or a sudden change to a downward trend is about to start.

Checking Safety for Big Investments

Since this chart is all about finding danger and fighting, it is very useful for checking the **safety of long-term investments**. For a country or a large business, the chart can show if they are about to face a time of great risk, like a country getting into a war or a major bank having a failure. For the average investor, this chart gives a strong **warning signal** to get out of the market or stop taking new risks during those very dangerous star periods.

1.2.9 – Importance of the Koorma Chakra in Financial Astrology



Planetary Position of Transit

PLT	SGN	DEG	NAK(P)	NL	NADI	Nakshtramsh	Navtara	Adya	Mot.	ROM

Koorma Chakra

The **Koorma Chakra** is different from other charts because it is a **map of the land**. Imagine drawing a giant turtle over a map of a country. The turtle's shell is divided into 9 sections (the center and the 8 directions like North, South, East, West). Each section has a group of stars (Nakshatras) assigned to it. In financial astrology, this helps us see **where** in the country money problems or good luck will happen.

Predicting Prices of Things We Buy (Commodities)

This chart is most famous for predicting the prices of **commodities**, like cotton, gold, oil, or wheat. Since different parts of a country grow different things (for example, cotton might grow in the West, and tea in the East), astrologers check the Koorma Chakra to see if those regions are safe. If the stars ruling the "East" are under attack by bad planets like Saturn, it might mean the tea crop will be bad due to weather. When the crop is bad, the **price goes up**. Traders use this to guess if prices will rise or fall.

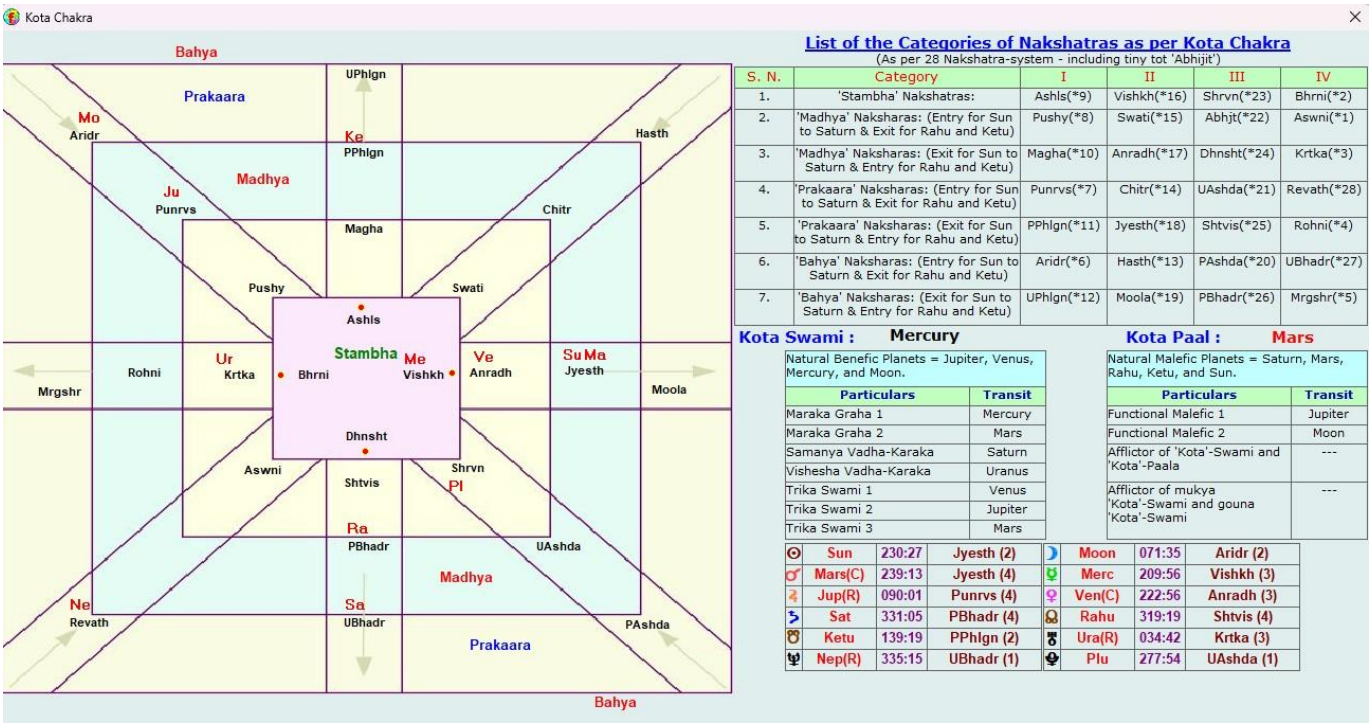
Spotting Natural Disasters that Hurt the Economy

The economy is easily hurt by big disasters like earthquakes, floods, or droughts. The Koorma Chakra is the number one tool for predicting these. If the "feet" of the turtle (which represent specific corners of the country) are hurt by Mars or Rahu, it warns of a disaster in that specific area. For a financial astrologer, this is a warning that businesses in that area will suffer, and it might be a bad time to invest in companies that are located there.

The "Shake" of the Market

Just like a real turtle hiding in its shell, the economy wants to be safe and steady. When many bad planets move across the center of the Koorma Chakra (the turtle's back), it is said to "shake" the foundation of the country. In the financial world, this often matches up with a **Market Crash** or a recession, where people are too scared to spend money. By looking at this chart, astrologers try to warn people when the "ground" of the economy is going to be shaky so they can protect their money.

1.2.10 – Importance of the Kota Chakra in Financial Astrology



The word *Kota* literally means **"Fort"** or **"Castle."** Imagine a castle with high walls, a moat (water around it), and a King sitting safely inside. In financial astrology, the "King" is your **investment** or the **Stock Market index**. The Kota Chakra is a map that uses the 28 stars (Nakshatras) to build this imaginary fort. Its main job is to tell us if the "King" is safe inside or if enemies are breaking through the walls.

Is the Money "Safe" or "Under Attack"?

The most important thing this chart tells a financial astrologer is **Safety vs. Danger**. The chart is divided into different sections: the "Outside" (the walls), the "Inside" (the rooms), and the "Heart" (where the King sits).

- **Good Planets (Friends):** When good planets like Jupiter or Venus enter the "Fort" and move toward the center, it means money is flowing **in**, and the market is strong and safe.
- **Bad Planets (Enemies):** When bad planets like Mars, Saturn, or Rahu break into the fort and move toward the center, it means the market is "under attack." This usually predicts a sudden **crash** or a big loss of value.

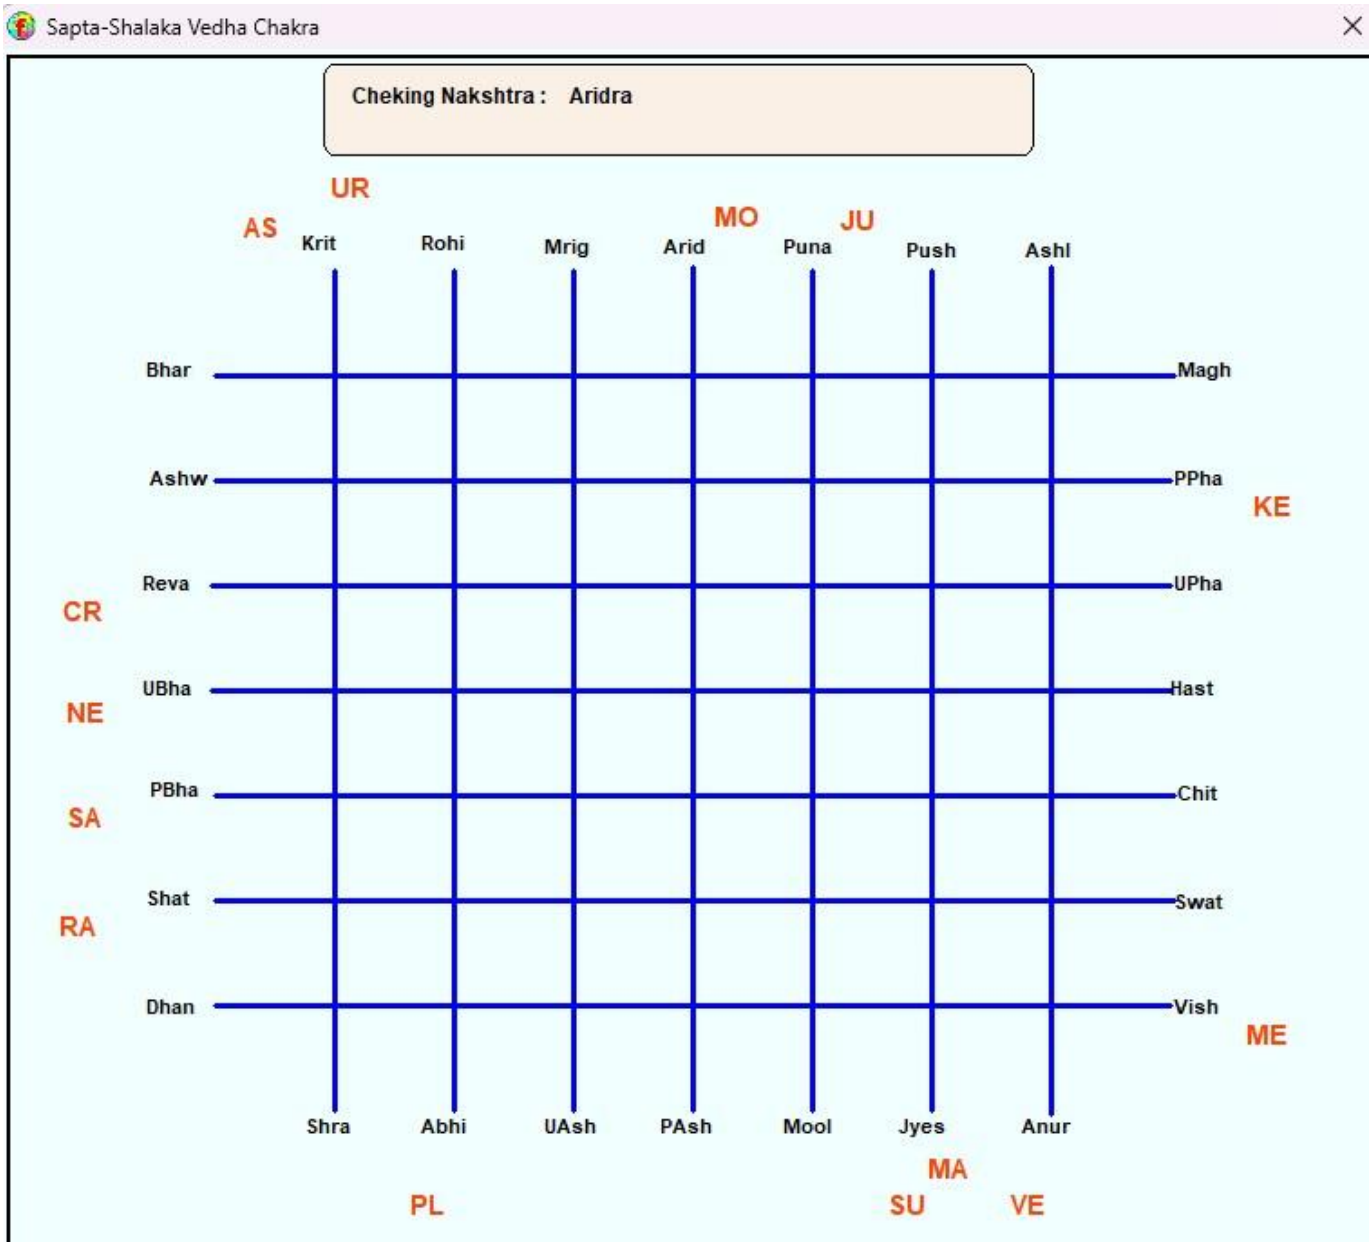
Predicting Market Crashes

Astrologers use the Kota Chakra specifically to predict **sudden collapses**. If many "Enemy" planets are storming the "Heart" of the chakra at the same time, it is a major warning sign. It suggests that the "defenses" of the market are broken. In the old days, this meant the castle would fall; today, it means the stock prices might tumble down very fast. It helps investors know when to **pull their money out** and run to safety before the "battle" begins.

Knowing When to Return to the Market

Just as importantly, the Kota Chakra tells you when the danger is over. When the bad planets turn around and start leaving the Fort (moving from the Inside to the Outside), it means the "enemy is retreating." This signals to the financial astrologer that the bad times are ending, the market is recovering, and it is finally safe to start investing again.

1.2.11 – Importance of Sapta-Shalaka Vedha Chakra in Financial Astrology



The name **Sapta-Shalaka** means "Seven Bars" or "Seven Lines." Imagine a simple grid made of 7 lines going up and down and 7 lines going across. Astrologers place the 28 stars (Nakshatras) on these lines. The main job of this chart is to see if a planet is "blocking" or "piercing" your lucky star. In financial astrology, this is used as a quick **"Red Light" or "Green Light"** system for trading.

1. The "Piercing" Check (Vedha)

In this chart, certain stars face each other directly. If a "bad" planet (like Mars or Saturn) is sitting on a star that faces *your* birth star, it creates a "Vedha" or an obstruction. In simple English, it means the road is blocked. For a trader, if the Sapta-Shalaka chart shows a Vedha on the day they want to buy a stock, it is a huge warning sign. It suggests that their plan will fail or they will face unexpected obstacles, so they should wait for a better day.

2. Identifying Good and Bad Days for Trading

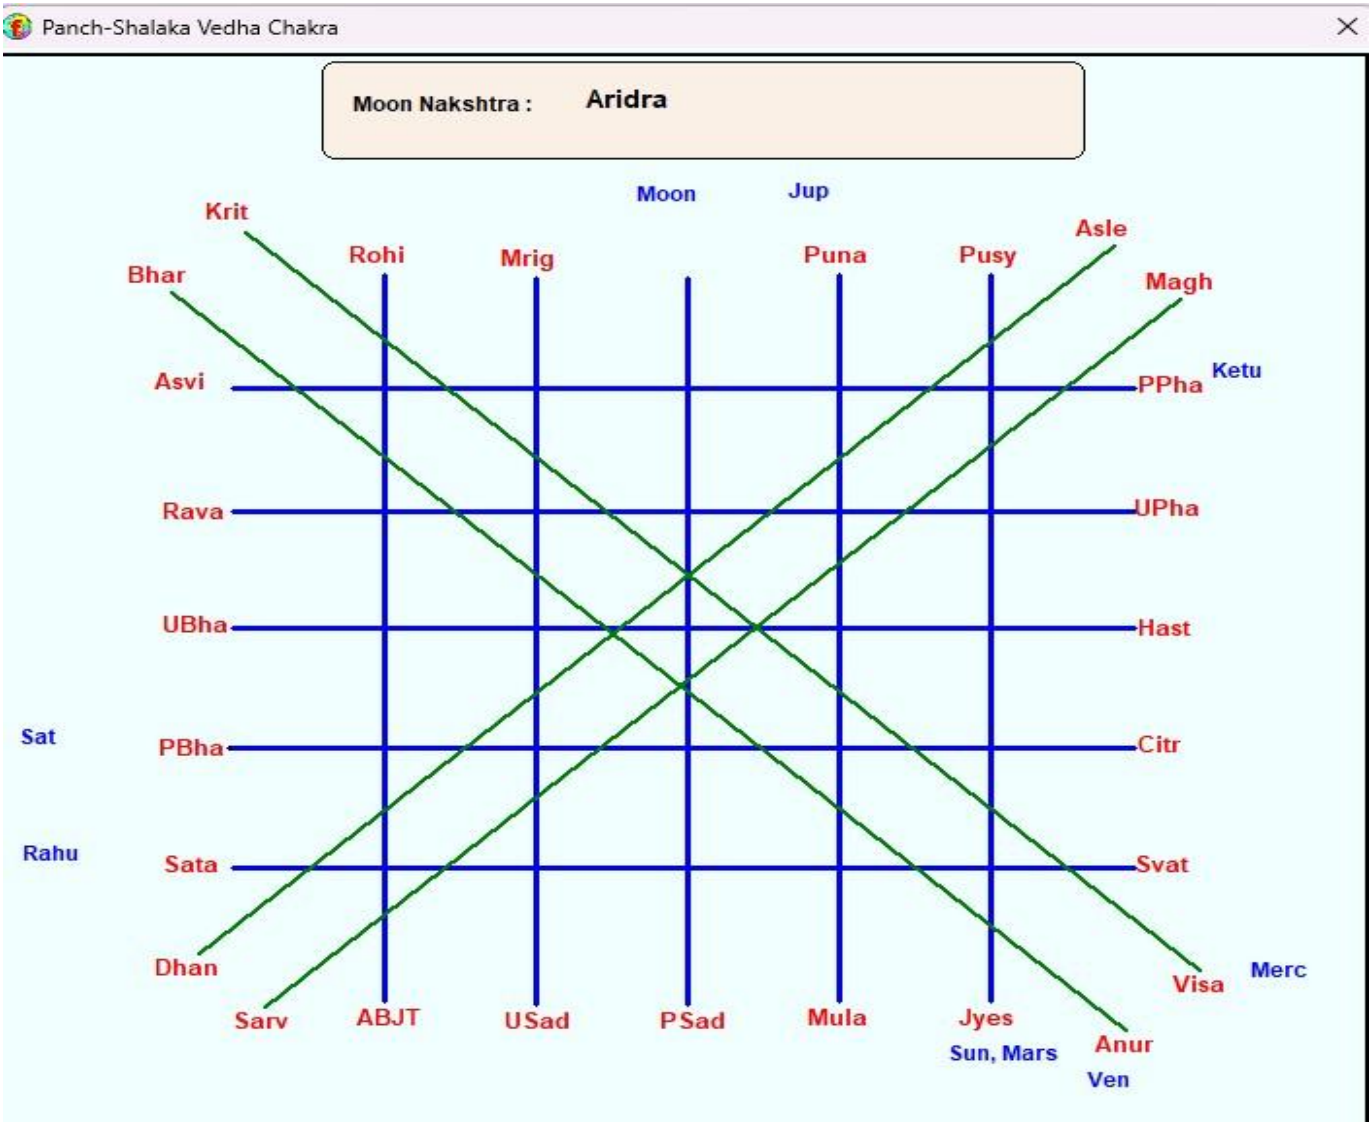
This chart is excellent for planning short-term moves. A financial astrologer looks at the chart to sort days into "Safe" and "Dangerous."

- **Dangerous Day:** If the chart shows that the star ruling the current day is being "hit" by a bad planet, the market might be very volatile or confusing.
- **Safe Day:** If the lines connecting to the day's star are clear of bad planets, or if a good planet (like Jupiter) is connecting to it, it is considered a "Green Light." This helps traders avoid losing money on days when the energy is fighting against them.

3. Personalizing the Market Prediction

While big charts like the Koorma Chakra tell us about the *whole country*, the Sapta-Shalaka is often used to see how the market affects *you* specifically. Even if the stock market is going up, you personally might lose money if your own star is "blocked" in this chart. It helps an investor answer the question: "The market is good, but is it good *for me* right now?" This extra layer of safety makes it a favorite tool for careful investors.

1.2.12 – Importance of Panch-Shalaka Vedha Chakra in Financial Astrology



The **Panch-Shalaka Chakra** is a grid made of **5 vertical lines and 5 horizontal lines**. Astrologers place the 27 stars (Nakshatras) on the endpoints of these lines. In financial astrology, this chart is used as a "Quick Check" for day traders who need a fast answer without looking at a big, complicated map.

1. The "Victory or Defeat" Check

The most famous use of this chart is to predict **Jaya** (Victory) or **Parajaya** (Defeat). In the old days, kings used it to see if they would win a battle that day. In the stock market, every trade is like a small battle. A trader uses this chart to see if the star ruling the current day is "blocked" by a bad planet.

- If the star is blocked (Vedha), it means **Defeat** (Loss of Money).
- If the star is free, it means **Victory** (Profit).

2. Finding the "Partner" Star

In this chart, every star has a "Partner" or a "Face-to-Face" star across the grid. In financial astrology, this is used to spot hidden connections. If you own a stock that is ruled by a certain star, you look at its partner in the Panch-Shalaka chart. If a good planet (like Jupiter) is in the partner star, it sends "help" to your stock, making the price go up. If a bad planet is there, it sends "trouble," making the price go down.

3. A Filter for Quick Decisions

Because the Panch-Shalaka is smaller (5 lines) than the Sapta-Shalaka (7 lines), it is considered a more **urgent** or **immediate** chart. It doesn't look at long-term trends for next year; it looks at *right now*. Financial astrologers use it as a final "Yes/No" filter. If they want to buy a stock, they might check this chart last. If the Panch-Shalaka says "No" (because of a block), they will skip the trade, even if other charts look okay. It is the final safety check.

1. The "Big Movers" (Major Aspects)

These are the most powerful angles. When planets hit these numbers, the stock market usually reacts in a big way (either jumping up or crashing down).

- **Degree Aspect 0: Poorna (Conjunction)**
  - **What it is:** "Poorna" means Full. The planets are sitting right next to each other.
  - **Financial Use:** This is a **Reset Button**. It starts a new trend. If the planets are friendly (like Jupiter and Moon), it starts a Bull Market (prices go up). If they are enemies (like Saturn and Mars), it starts a difficult time.
- **Degree Aspect 180: Dwitiyamsh (Opposition)**
  - **What it is:** The planets are on opposite sides of the sky (Face-to-Face).
  - **Financial Use:** This creates a **Tug-of-War**. The market becomes very shaky (volatile). It often marks the "Top" (highest price) before a drop, or the "Bottom" before a rise.
- **Degree Aspect 120: Trityamsh (Trine)**
  - **What it is:** This is 1/3rd of the circle. It is the luckiest aspect.

    - **Financial Use: Free Money Flow.** This signals that investors are happy and confident. It is usually a safe time to buy because the market moves up easily without much resistance.
- **Degree Aspect 90: Chaturthamsh (Square)**
    - **What it is:** This is 1/4th of the circle. It represents a block or an obstacle.
    - **Financial Use: High Stress.** This forces the market to work hard. You often see prices freeze or drop suddenly because of bad news or fear.

2. The "Action" Aspects (Medium Strength)

These angles are not as loud as the big ones, but they help traders find daily opportunities.

- **Degree Aspect 60: Shashtamsh (Sextile)**
    - **What it is:** 1/6th of the circle. A friendly handshake between planets.
    - **Financial Use: Good Opportunity.** It means buyers and sellers agree on prices. It helps steady growth.
- **Degree Aspect 72: Panchamsh (Quintile)**
    - **What it is:** 1/5th of the circle. It is related to talent and creativity.
    - **Financial Use: Innovation Boost.** This aspect is great for Tech stocks or new inventions. When this aspect happens, companies often announce new, cool products.
- **Degree Aspect 45: Ashtamamsh (Semi-Square)**
    - **What it is:** 1/8th of the circle. A small annoyance.
    - **Financial Use: Friction.** The market might dip slightly or move sideways. It's not a crash, just a bumpy road.
- **Degree Aspect 135: AshtamamshRahit (Sesquiquadrate)**
    - **What it is:** Related to the 45 aspects. It implies "delayed trouble."
    - **Financial Use: Unexpected bad news.** Something that was ignored last month comes back to hurt the market price today.
- **Degree Aspect 150: DwadashamshRahit (Quincunx)**
    - **What it is:** An awkward angle where planets can't "see" each other.
    - **Financial Use: Confusion.** The market acts weirdly. Prices might go up when they should go down. It represents uncertainty or "sickness" in the economy.

3. The "Micro" Aspects (Harmonics / Vargas)

The rest of your list contains smaller numbers (like 40, 30, 20). In Vedic Astrology, these match the **Divisional Charts (Vargas)**. These are used for very deep, detailed analysis.

- **Degree Aspect 40: Navamamsh (Novile)**
    - **What it is:** 1/9th of the circle. This is the **most important** division after the main chart.
    - **Financial Use: Long-Term Luck.** It shows the *real* strength of a stock. If a stock looks good on the outside but bad in the Navamamsh, it will eventually fail.
- **Degree Aspect 30: Dwadashamsh (Semi-Sextile)**
    - **What it is:** 1/12th of the circle. Related to parents and roots.
    - **Financial Use: Foundation.** Used to check if a company has a solid history or strong "roots" before investing.

- **Degree Aspect 24: PanchDashamsh**
  - **What it is:** 1/15th division.
  - **Financial Use: Greed and Desire.** This can show times when the public is obsessed with buying, leading to "bubbles" in price.
- **Degree Aspect 22.3: Shodashamsh**
  - **What it is:** 1/16th division. Related to vehicles and luxuries.
  - **Financial Use: Auto Industry.** Specifically used to predict trends for car companies (like Tata Motors or Tesla) or luxury goods.
- **Degree Aspect 20: Ashtdashamsh**
  - **What it is:** 1/18th division.
  - **Financial Use: Charity or Earth.** Sometimes used for predicting real estate or land prices.
- *Degree Aspect 35: Dashmamsh**
  - *(Note: Usually Dashmamsh is 35 degrees).*
  - **What it is:** 1/10th division. The Career Chart.
  - **Financial Use: Government & Big Business.** This is essential for predicting how government rules will change the stock market.
- **Degree Aspect 6: Shashtyamsh**
  - **What it is:** 1/60th division. The finest slice of the pie.

Financial Use: Precise Timing. This is used only by experts to predict the exact *minute* a market might turn.

The Planet-to-Planet Aspect Search Tool is extremely valuable for traders and researchers because it allows you to instantly find every date in a selected time frame where two planets form a specific aspect—such as 9°, 120°, 180°, or any other key angular relationship. Aspects between planets are one of the strongest triggers for market movements, often causing sudden volatility, trend reversals, breakouts, or acceleration in price momentum. This tool not only lists each occurrence but also displays the Ascendant, Nakshatra, Rashi, Bala, and planetary conditions on that day, giving a complete astrological profile of the event. By studying past aspect patterns and correlating them with market reactions, users can identify high-impact planetary combinations, build timing strategies, and forecast future price behavior with much greater accuracy. It turns complex astrological calculations into a simple searchable format, saving time and giving traders a real timing edge.

This Navamsha Change & Strength Tool is extremely important for intraday and short-term financial astrology because it tracks the minute-by-minute shift of planets into new Navamshas and instantly tells whether the new division is **positive** (Vargottama, Pushkar, benefic Navamsha) or **negative** (Vish Navamsha, debilitated, enemy sign). These subtle Navamsha transitions often create sudden market reactions, especially in indices, currencies, bullion, and fast-moving shares. The tool highlights each transition with timing, ruling lord, Vishwas value, and strength rating like *Very Good*, *Good*, *Not Good*, or *Excellent*, helping traders instantly judge when market sentiment is likely to improve or weaken. Since intraday volatility often aligns with Navamsha shifts rather than just Rashi positions, this tool gives traders an accurate timing advantage and helps refine entries, exits, and reversal predictions with precision.

1.6.1 – Hora and Sub-Hora in Financial Astrology

1. The "Mood" of the Hour (Hora)

Think of the trading day as a school day with different classes. Each class lasts about one hour (technically, it varies by sunrise, but think of it as an hour). This is called a **Hora**. Each Hora is ruled by a specific planet. For a financial astrologer, this tells you the **mood** of the market for that hour. If the hour is ruled by **Jupiter** (the planet of expansion), the market usually feels optimistic, and prices tend to go up. If the hour is ruled by **Saturn** or **Mars**, the market might feel heavy, slow, or fearful, causing prices to drop. Traders use this to know if they should be aggressive or careful during that specific hour.

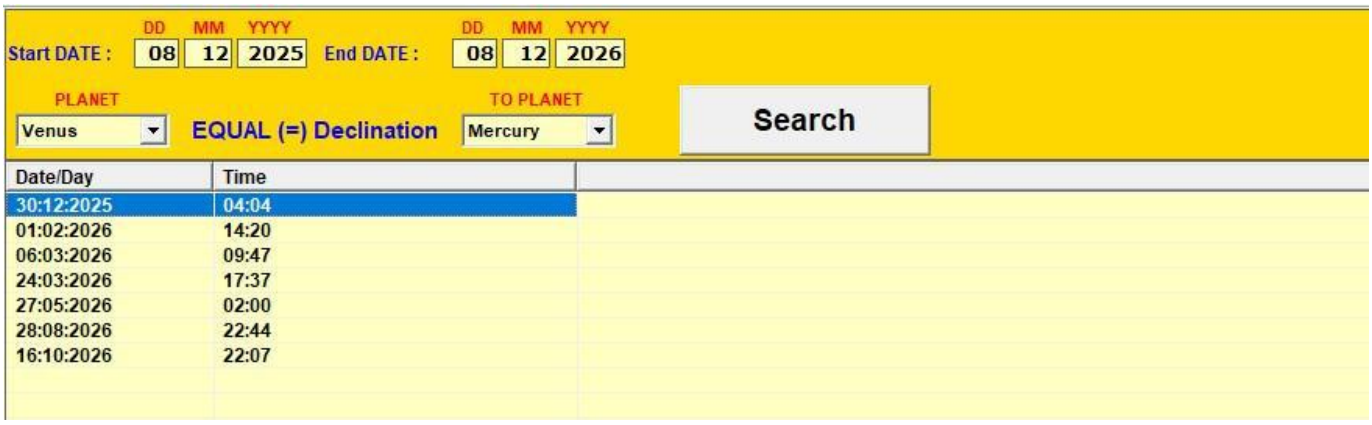
2. The "Trigger" Minute (Sub-Hora)

While the Hora sets the general mood, the **Sub-Hora** (or *Pratyantar Hora*) is like the minute hand on a clock. It breaks the hour down into much smaller pieces, sometimes just a few minutes long. This is the tool for **Day Traders**. Have you ever seen a stock price suddenly jump up for just 5 minutes and then stop? That usually happens when a powerful Sub-Hora starts. Financial astrologers use Sub-Hora to find the **exact minute** to click the "Buy" or "Sell" button. It helps them catch the tiny waves inside the big hour.

3. Matching the Two for Success

The biggest secret in financial astrology is getting the Hora and Sub-Hora to agree. Imagine the Hora is the "Wind" and the Sub-Hora is your "Sails." If the Hora is good (Jupiter) and the Sub-Hora is also good (Venus), it is the perfect time to make a profit because the wind is blowing your way. However, if the Hora is good but the Sub-Hora is bad, the market might be confusing—it wants to go up, but something is holding it back. Traders use this system to avoid "false alarms" and only trade when both the big hand (Hora) and the little hand (Sub-Hora) are pointing to success.

1.7.1 – Equal Declination in Financial Astrology



In financial astrology, when two planets have the same declination, it is like they are shaking hands or standing on the same level. This is called a **Parallel**. Even if the planets are in different Zodiac signs (like one in Leo and one in Virgo), having the same declination connects them powerfully. It acts just like a **Conjunction**. If two "money planets" (like Jupiter and Venus) are Parallel, it usually signals a time of agreement and strength in the market. The prices tend to move steadily in one direction because the planets are working as a team.

However, there is a second type called a **Contra-Parallel**. This happens when two planets have the same number but opposite directions (for example, one is 15 degrees North and the other is 15 degrees South). This acts like an **Opposition** or a "Tug-of-War." In the stock market, this is a major warning signal. It creates tension and disagreement. When a Contra-Parallel happens, the market often becomes "volatile," meaning prices jump up and down wildly because buyers and sellers cannot agree on a value.

Smart traders watch for the exact day these declinations become equal. If a fast planet (like the Moon or Mercury) moves into a Parallel with a slow, heavy planet (like Saturn or Pluto), it often triggers a **Trend Reversal**. This means if the market was going up, it might suddenly stop and go down. It is a very specific timing tool used to catch the exact "top" or "bottom" of a market swing, often when other traders using regular charts don't see it coming.

2.1.1 Planet–Sign–Star-Degree Based Movement Graph Tool

This tool is extremely valuable in financial astrology because it allows the user to select specific planets, signs, nakshatras, and degrees connected to a commodity or share—such as Gold—and then automatically generates **daily and monthly movement graphs**. These graphs visualize how the chosen astrological factors are influencing the market over time. The upper "Daily Movement Graph" shows short-term fluctuations, helping traders understand intraday or day-to-day sensitivity, while the lower "Monthly Movement Graph" reveals broader cycles and trend behaviour for the whole month. By comparing these two views, traders can easily spot rising phases, weak periods, trend shifts, and reversal windows linked to planetary aspects and nakshatra interactions. This gives a huge advantage in timing entries and exits, especially for commodities that react strongly to cosmic combinations. In short, the tool converts complex astrological placements into simple visual signals that improve forecasting accuracy and confidence for every trader.

How to Use This Tool – Step-by-Step Guide

1. **Select Your Market Category**
   Choose whether you want to analyze **Metals, Commodities, Shares, or Indices**.
   Example: *Category → Metal*
2. **Choose the Specific Commodity or Share**
   Pick the exact item you want to study.
   Example: *Commodity → Gold*
3. **Choose the Month and Year**
   Select the time period you want to study using the **Month** and **Year** dropdowns.
   Example: *December 2025*
4. **Select the Planets You Want to Consider**
   Tick the planets whose influence you want to analyze.
   Example: *Sun, Moon, Mars, Mercury, Jupiter, Venus*

5. **Choose the Zodiac Signs for Relation Study**
   Select one or multiple signs in which the planetary influence is relevant to your commodity/share.
   Example: *Sagittarius, Pisces*
6. **Select the Nakshatras (Stars)**
   Choose the nakshatras related to the commodity or the planetary influence.
   Example: *Ashwini, Bharani, Krittika*
7. **Select Specific Degree Points (Optional)**
   You can pick exact degree ranges to refine your astrological study. This helps in identifying sensitive degrees and price reactions.
   Example: *35°, 45°, 60°, 72°*
8. **Press the *Compute* Button**
   The tool will now analyse planetary movements and interactions for your chosen settings.
9. **Read the *Daily Movement Graph***
   - Shows day-to-day performance signals.
   - Helps understand short-term volatility, trend shifts, or flat periods.
10. **Read the *Monthly Movement Graph***

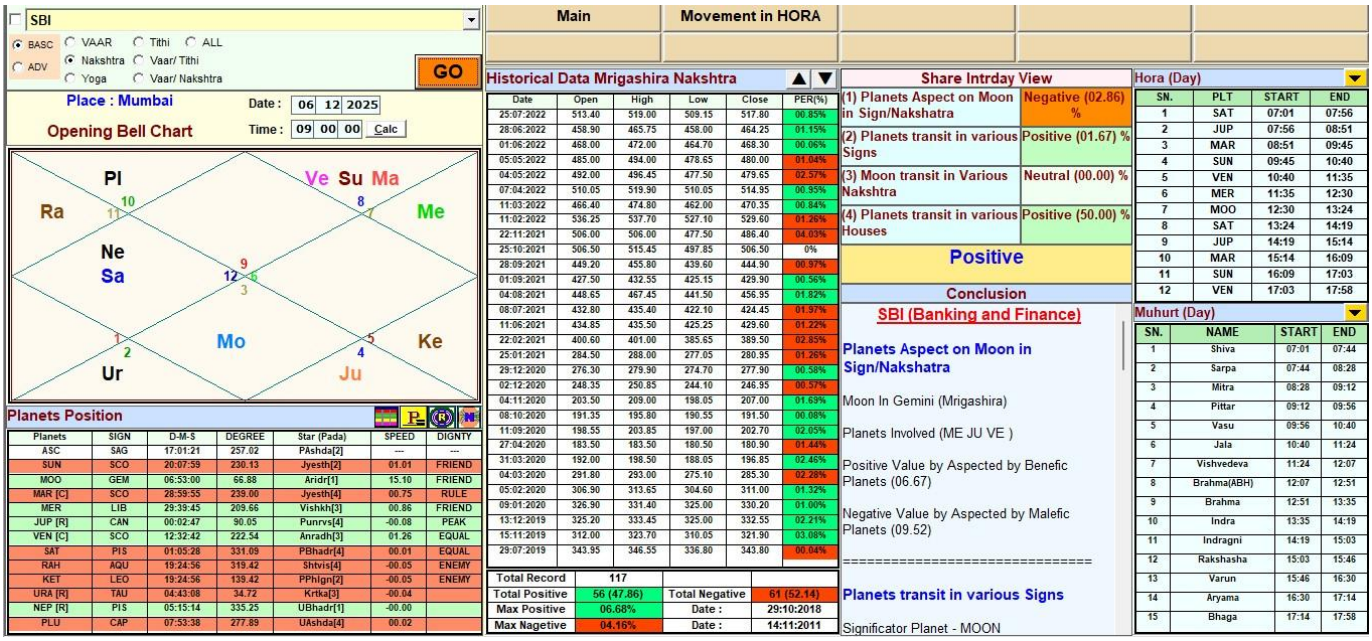
- Shows overall trend strength for the entire month.
- Helps identify favourable/unfavourable weeks, rising phases, and pressure zones.

11. **Compare Both Graphs Together**

- Use the monthly graph for the *bigger trend direction*.
- Use the daily graph for *exact timing of entry or exit*.
  This combination gives extremely accurate market timing insights.

12. **Repeat with Different Planets or Stars**
    You can re-select planets, signs, or nakshatras to see how different combinations affect price movement.
    This helps you find the most *reliable astrological combinations* for each commodity/share.

3.1.1- Planets Movement Effect on Selected Shares Today



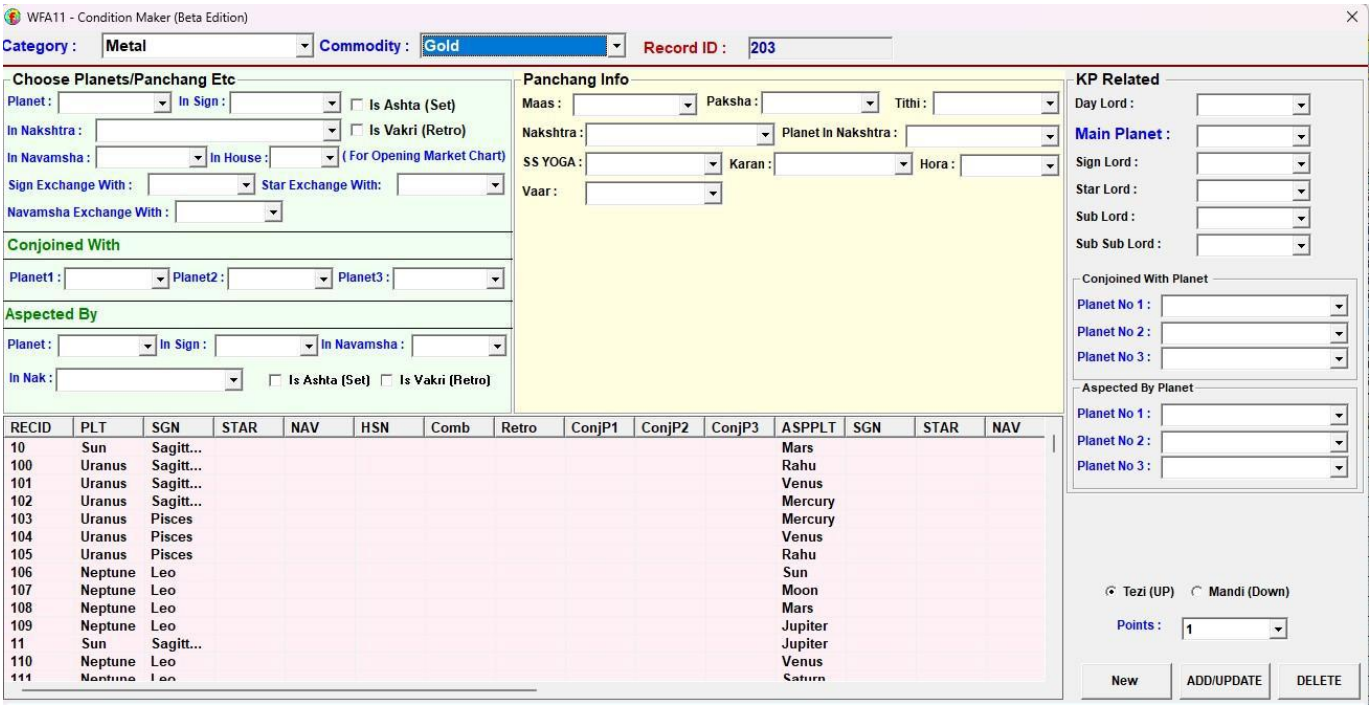
Planets' Movement – Effect on Shares (Today)

This tool is designed to analyze how planetary movements influence the performance of selected stocks in the market. We have included **100+ shares across 30 different sectors** to provide a broad and reliable assessment. Each stock is evaluated using four key astrological factors that are known to impact short-term and intraday market behavior.

1. **Planetary Aspects on the Moon (Sign & Nakshatra)**
   The Moon governs emotions, sentiment, and market mood. This tool checks how benefic or malefic planetary aspects influence the Moon in its current sign or Nakshatra and how that sentiment reflects on the selected share.
2. **Planetary Transit in Various Signs**
   The transit of major planets through different zodiac signs often triggers sector-specific and stock-specific movements. The tool tracks these sign-based transits to understand their impact.
3. **Moon Transit Through Nakshatras**
   Every Nakshatra carries its own energy. As the Moon moves through different Nakshatras, it creates predictable cycles of intraday volatility, bullishness, or caution. The tool maps these cycles against each stock.
4. **Planetary Transit Through Houses**
   House-wise transit effects are crucial in financial astrology. This tool evaluates how planets moving through specific houses influence the strength, weakness, or momentum of the chosen stock.

By combining these four powerful astrological indicators, the tool helps you understand how today's planetary positions may affect market behaviour and individual stock performance**, making it a valuable guide for traders, investors, and financial astrologers.**

4.1.1- Financial Astrology Condition Maker & Result Finder



The *Financial Astrology Condition Maker & Result Finder* is a powerful tool that allows traders to create and apply astrological conditions for commodities, grains, metals, and other instruments. These conditions are based on classical astrology books such as *Vyapar Ratna*, *Argha Martand*, and modern KP astrology. The tool helps users check these conditions on today's Panchang and instantly determine the astrological effect on market trends.

This tool has two major parts:

1. Traditional Panchang-Based Condition Maker

This section allows users to build conditions using classical Vedic astrology rules. It includes the following options:

1. **Planet in Sign** – Select where a planet should be placed in the zodiac.
2. **Planet in Nakshatra** – Choose the required star or star-pada.
3. **Planet in Navamsha** – Specify the divisional placement.
4. **Ashtakavarga, Retro, Combust, Vakri Options** – Control strength conditions.
5. **Sign Exchange (Parivartan)** – Set sign-changing relationships between planets.
6. **Star Exchange** – Apply Nakshatra exchange combinations.
7. **Navamsha Exchange** – Set deeper divisional exchanges.
8. **Conjunction Rules** – Select which planets must be together.
9. **Aspect Rules** – Specify planetary aspects that must occur.
10. **Panchang Conditions** – Choose Maas, Paksha, Tithi, Nakshatra, Yoga, Karan, Vaar, Hora, and Planet in Nakshatra.

This section is designed to create conditions exactly like those found in traditional financial astrology texts. Traders can recreate rules such as:

- Moon in a specific Nakshatra influencing Gold.
- Tithi-based effects on Agri commodities.
- Exchange combinations affecting Metals.

Importance:
Traditional Panchang rules have guided market predictions for centuries. This tool allows those rules to be recreated, automated, and applied instantly to today's Panchang, making classical trading techniques practical and fast.

2. KP-Based Condition Maker (Modern Predictive Method)

This section uses the KP (Krishnamurti Paddhati) system for precise market forecasting. It includes the following inputs:

1. **Day Lord** – Defines daily market tone.
2. **Main Planet** – The significator planet for the commodity or market instrument.
3. **Sign Lord** – Zodiac controller affecting the trend.
4. **Star Lord** – Nakshatra lord influencing the movement.
5. **Sub Lord** – Key layer used for timing and trend strength.
6. **Sub-Sub Lord** – Final trigger layer used in KP timing.
7. **KP Conjunction** – Conditions requiring planets to be together.
8. **KP Aspect** – Planetary influence rules based on KP drishti.

This section helps create rules like:

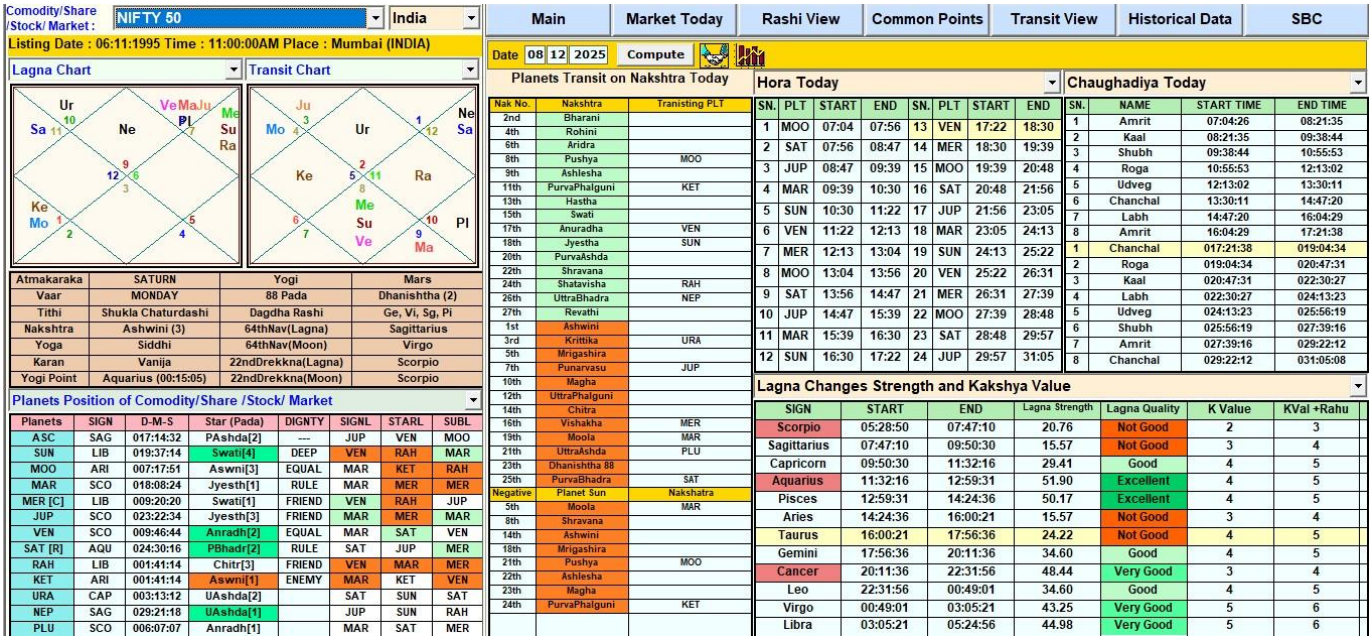
- Main Planet in a specific Sub/Sub-Sub Lord causing volatility.
- Loosening or tightening of trends based on KP significators.
- Highly accurate timing for trend reversals.

Importance:
KP astrology is a precision-based system widely used for predicting events. When applied to commodities and markets, KP layers provide strong timing accuracy, making this section ideal for intraday and short-term forecasting.

Overall Importance of This Tool in Financial Astrology

1. It allows users to create custom rules based on any classical or modern text.
2. It applies these rules automatically to today’s Panchang, saving enormous time.
3. It offers both traditional and KP filters, giving the trader dual predictive power.
4. It simplifies highly complex astrology through easy dropdowns and stored conditions.
5. It provides immediate Tezi (Up) or Mandi (Down) signals for commodities.
6. It is extremely useful for traders, researchers, analysts, and students of financial astrology.

5.1.1-Astrological Profile of Stocks, Indices & Commodities



This tool provides an in-depth astrological analysis for more than **1700+ major Indian shares**, **1100+ USA-listed shares**, and **450+ Canadian market shares**, along with major indices and commodities. Once a stock or market is selected, the tool instantly generates a **full, multi-layered astrological profile**, displaying every essential chart, divisional strength, and planetary influence required for high-precision Financial Astrology research.

(1) Complete Lagna Chart & Transit Chart

The tool shows **two dynamic charts side by side**:

- **Lagna Chart (Birth Chart)** of the selected stock/index based on its listing date, time, and place.
- **Transit Chart (Gochar Chart)** for the current date, showing real-time planetary movement.

This dual-chart view helps users quickly evaluate:

- Transit effects on natal houses
- Planetary triggers
- Upcoming market-moving aspects
- Natal vs. Gochar planetary interactions

(2) Panchang & Planetary Parameters

The tool automatically calculates and displays:

- **Vaar (weekday)**
- **Tithi, Paksha, Nakshatra, Yoga, Karana**
- **Yogi Planet, Avayogi Planet**

- **Atmakaraka**
- **Listing Lagna & divisional positions**

This allows highly accurate day-specific forecasting based on the stock's astrological DNA.

(3) Detailed Planetary Position Table

A color-coded table provides complete planetary placement of the selected stock and its current transits, including:

- **Sign & Degree**
- **Nakshatra + Pada**
- **Planetary Dignity (Exalted, Debilitated, Mooltrikon, Friend, Enemy, Neutral)**
- **Star Lord, Sub Lord, Sub-Sub Lord**
- **Directional strength & retrograde status**
- **Divisional (Varga) positions such as Navamsha, Drekkana, Dwadashamsha, etc.**

This gives the user a microscopic view of each planet's functional strength in the share's chart.

(4) Housewise Planetary Placement & Strengths

The tool automatically computes and displays:

- **Individual House Positions (Bhava Chart)**
- **Kakshya Strength**
- **Shadbala Strength**
- **Bhava Bala (House Strength)**

This helps evaluate whether planets are supportive, weak, or unstable for price action on the selected date.

(5) Vimshottari Dasha & Sub-Dasha at Work

The tool shows the **active Mahadasha, Antardasha, and Pratyantar Dasha** of the stock/index.
This allows the user to understand the **long-term and short-term cycles** influencing market trend, volatility, and sentiment.

(6) Complete Aspect Mapping

All **natal and transit aspects** from major planets are automatically calculated and applied to:

- Lagna
- Key planets
- Market-sensitive houses (2nd, 5th, 8th, 11th)
- Divisional chart positions

Users can instantly see which planets are activating bullish, bearish, or volatile tendencies for the chosen stock.

(7) Highly Accurate Divisional Chart Interpretation

The tool supports **Shodash Varga**, including:

- **D1 (Rashi)**
- **D3 (Drekkana)**
- **D9 (Navamsha)**
- **D10 (Dashamsha)**
- **D60 (Shashtyamsha)**

These help in understanding:

- Intrinsic value of the stock
- Stability
- Long-term performance cycles
- Price fluctuations
- Trend shifts

5.1.2 Planets Transiting in Sensitive Nakshatras (Today)

Planets Transit on Nakshtra Today		
Nak No.	Nakshtra	Tranisting PLT
2nd	Bharani	
4th	Rohini	
6th	Aridra	
8th	Pushya	MOO
9th	Ashlesha	
11th	PurvaPhalguni	KET
13th	Hastha	
15th	Swati	
17th	Anuradha	VEN
18th	Jyestha	SUN
20th	PurvaAshda	
22th	Shravana	
24th	Shatavisha	RAH
26th	UttraBhadra	NEP
27th	Revathi	
1st	Ashwini	
3rd	Krittika	URA
5th	Mrigashira	
7th	Punarvasu	JUP
10th	Magha	
12th	UttraPhalguni	
14th	Chitra	
16th	Vishakha	MER
19th	Moola	MAR
21th	UttraAshda	PLU
23th	Dhanishtha 88	
25th	PurvaBhadra	SAT
Negative	Planet Sun	Nakshatra
5th	Moola	MAR
8th	Shravana	
14th	Ashwini	
18th	Mrigashira	
21th	Pushya	MOO
22th	Ashlesha	
23th	Magha	
24th	PurvaPhalguni	KET

This tool highlights how today's planetary transits move through specific **sensitive Nakshatras**, which are known to influence market sentiment, trend formation, volatility, and sector-specific performance. The table visually categorizes each Nakshatra based on the nature of the planetary transit occurring within it.

The table displays for each Nakshatra:

- **Nakshatra Number**
- **Name of the Nakshatra**
- **Planet(s) currently transiting that Nakshatra**
- **Classification as Positive (Green) or Negative (Red)**

This gives the user a clear, color-coded understanding of how **today's Nakshatra transit patterns** can affect stocks, commodities, indices, or sectors.

By observing which planets are passing through **favorable** or **unfavorable** Nakshatras, traders and financial astrologers can better anticipate:

- Market mood
- Strength or weakness in specific sectors
- Intraday volatility
- Short-term reversals
- Momentum shifts

This feature provides an immediate, visual, and actionable snapshot of **planetary sentiment through the lens of Nakshatra influences**, making it an essential component of daily financial astrology analysis.

5.1.3 Shadabala and BhavaBala for Selected Share

Shadabala Strength

Strength Name	Sun	Moon	Mars	Mercury	Jupiter	Venus	Saturn
Uchcha Bala	02.88	51.11	36.39	52.21	14.20	13.93	18.83

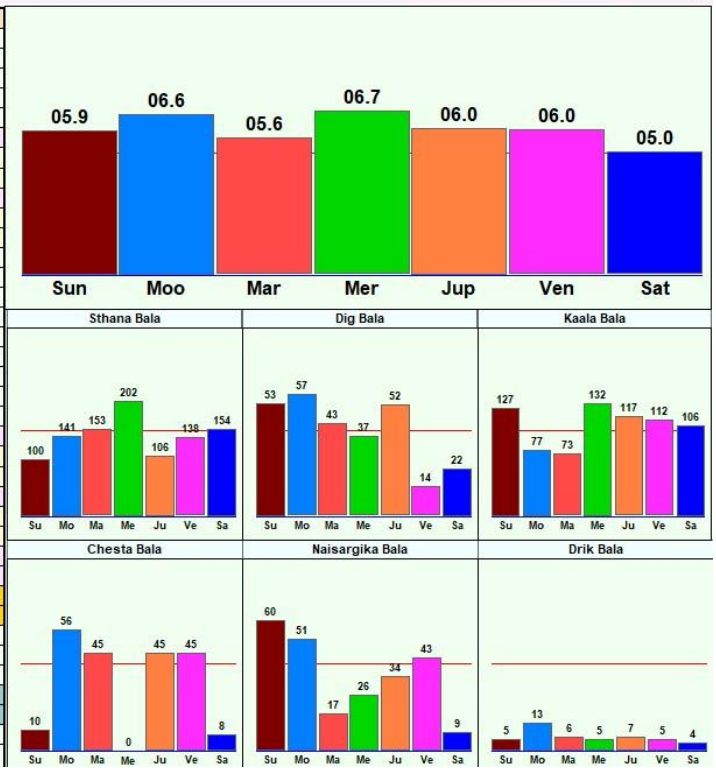
Ishta Phala	**06.69**	**53.45**	**40.46**	**00.00**	**25.28**	**25.04**	**11.88**
Kashta Phala	**53.31**	**06.55**	**19.54**	**60.00**	**34.72**	**34.96**	**48.12**
Deepti Bala	**100.00**	**55.89**	**09.51**	**22.03**	**11.25**	**25.73**	**41.63**



This Shadbala Strength tool measures the real working power of each planet and converts it into clear numbers and graphs. It calculates all major strength components like Sthana Bala, Dig Bala, Kaala Bala, Cheshta Bala, Naisargika Bala and Drik Bala, then compares them with the "required" minimum and shows the percentage and total Shadbala for Sun, Moon, Mars, Mercury, Jupiter, Venus and Saturn.

1. It helps a financial astrologer quickly see which planets are over-strong, average or weak on a given day, so you can decide which sectors or instruments ruled by those planets are likely to outperform or underperform.
2. By watching changes in planetary strength across time, you can link strong Shadbala periods with major market rallies, tops, bottoms and panic phases, improving timing for positional trades and investment entries.

3. The graphical view gives an instant visual ranking of planets, making it easy to design trading biases such as "focus on Mercury/Venus sectors when their strength bars are highest and avoid Saturn-ruled counters when its strength is below required level."
4. For researchers, this tool provides a solid quantitative base to back-test classical rules (for example, whether high Moon or Jupiter Shadbala really supports bullish sentiment) using real market data.

5.2.1 Market Today and Rishi View Tool

Date 08 12 2025 Compute This is overall market view

SN	Planets/Sign Relationship For Market	Bullish++	Bullish+	Bullish	Neutral	Berish++	Berish+	Berish
1	Moon in sign Cancer	YES						
2	Mars have 8th aspect on Moon which in sign Cancer			YES				
3	Mercury and Saturn are in same navamsha sign today.		YES					
4	Rahu and Pluto are in same navamsha sign today.		YES					

Date 08 12 2025 Compute This Page will show all the planets transiting from selected share/commodity Rashi or choosen Rashi.

Rashi Aries

SN	Planets/Sign Relationship For Selected Commodity/Share/Market	Bullish	Berish
1	In transit SUN transiting 8th from given sign Aries	YES	
2	In transit MARS transiting 9th from given sign Aries	YES	
3	In transit SATURN transiting 12th from given sign Aries	YES	
4	In transit KETU transiting 5th from given sign Aries	YES	
5	In transit MOON transiting 4th from given sign Aries	YES	
6	In transit MERCURY transiting 8th from given sign Aries	YES	
7	In transit JUPITER transiting 3rd from given sign Aries	YES	
8	In transit VENUS transiting 8th from given sign Aries		YES

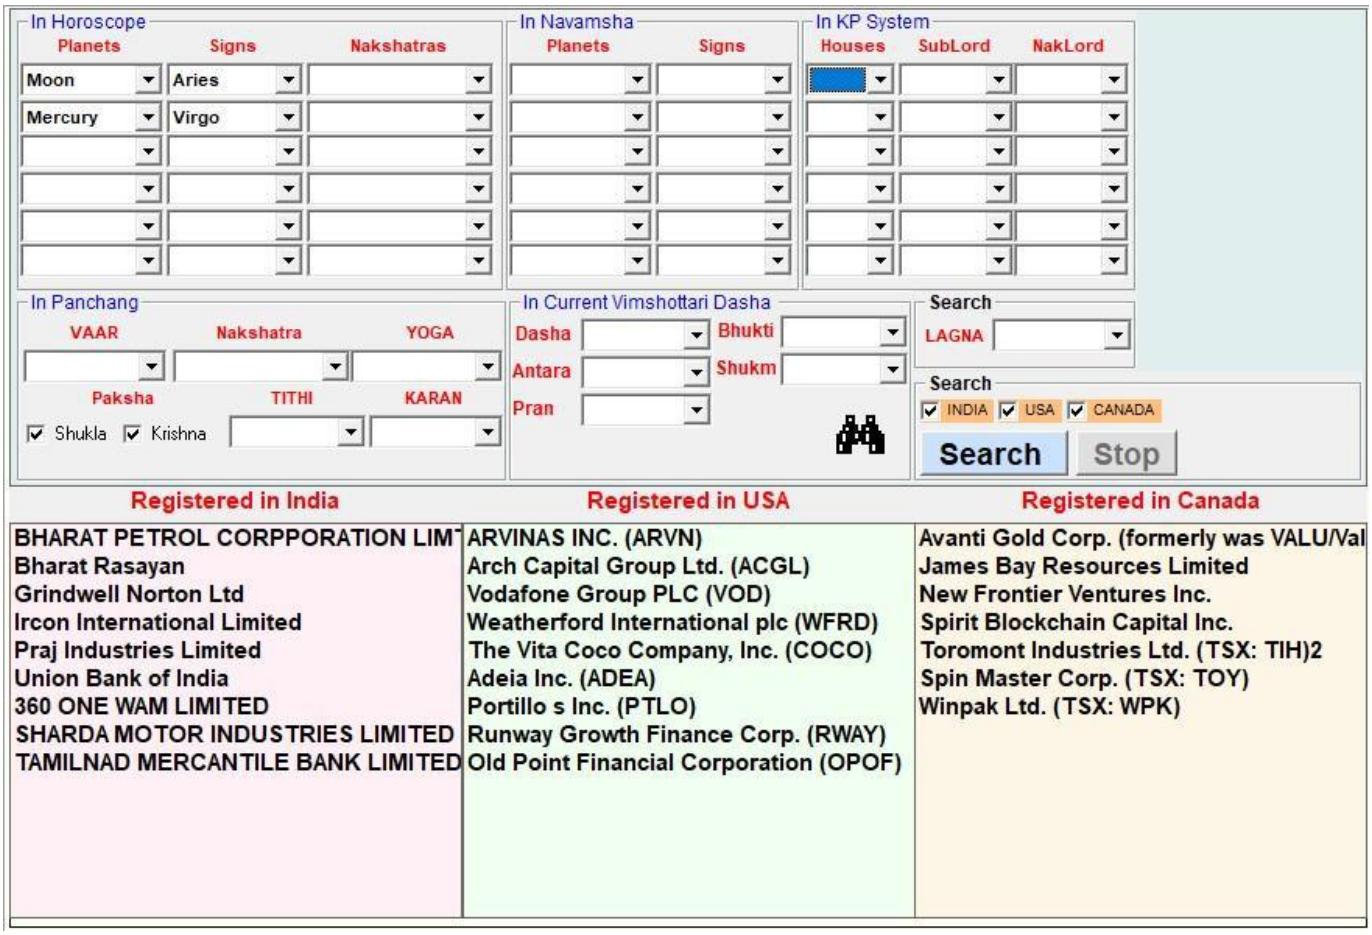
This tool provides a comprehensive overview of the market's current mood and potential movement based on the real-time transit of planets across different **signs** and **Navamshas**. By analyzing how each planet shifts through these astrological zones, the system helps identify trends, sentiment changes, volatility patterns, and sector-wise strength or weakness for the day.

The tool evaluates:

- Planetary transits through zodiac signs
- Their micro-positions within Navamsha
- Favorable and unfavorable combinations
- Market-sensitive planetary triggers
- Overall bullish, bearish, or mixed indications

With this insight, traders and financial astrologers can quickly understand **how today's planetary environment is shaping market behavior**, helping them make more informed and astrologically aligned decisions.

5.3.1 Common Point Search



This tool helps the user instantly identify **common astrological factors** among thousands of shares registered in **India, USA, and Canada**. By selecting specific combinations of planetary positions, signs, Nakshatras, Navamshas, KP parameters, Panchang details, or Vimshottari Dasha conditions, the user can quickly filter and find all stocks that share the same astrological signatures.

Using the interface shown above, the tool allows the user to search across multiple dimensions such as:

In Horoscope

- Planet → Sign → Nakshatra
- Search up to 7 planetary conditions simultaneously

In Navamsha

- Planet → Navamsha Sign
- Identify deeper divisional similarities in D9

In KP System

- House → Sub-Lord → Nakshatra Lord

- Detect KP-based common points between multiple stocks

In Panchang

- Vaar (weekday)
- Nakshatra, Yoga, Karana
- Paksha (Shukla / Krishna)
- Tithi

These options allow the user to filter shares based on **birth Panchang similarities**, which often correlate with predictable price behavior.

In Vimshottari Dasha

- Current Dasha
- Bhukti
- Antara
- Sookshma

This makes it possible to group shares that are running identical or supportive dashas, offering high-value insights for timing-based predictions.

Market-Wise Search (India, USA, Canada)

With a single search, the tool scans:

- 1500+ Indian stocks
- 1100+ USA-listed stocks
- 450+ Canadian stocks

The results are neatly grouped into three sections:

- **Registered in India**
- **Registered in USA**
- **Registered in Canada**

This allows the user to compare how many stocks across different countries share the same astrological pattern and how these common points may relate to **sector movement, trend similarity, or global market correlations**.

Purpose & Benefit

The Common Points Search tool is ideal for:

- Finding clusters of shares with similar astrological structures
- Detecting which stocks may react similarly to today's transits
- Identifying strong candidates for bullish or bearish patterns

- Understanding global market connections through astrology
- Researching market trends based on common planetary signatures

This feature transforms complex astrological matching into a simple, powerful, and time-saving process, making it one of the most valuable research tools in your financial astrology suite.

Pluto	45.39	176.14	37.17	65.99	188.10	52.40	306.82	318.66	138.66	243.33	302.70	----

The **Transit View** tab gives the user a complete, data-rich picture of how **today's transiting planets** are influencing the selected share or stock through their **aspects, strengths, and inter-planetary interactions**.

The first table, **"Effects of Transiting Planets on Selected Share/Stock Planets (TPLT → Cplt),"** shows how each transiting planet (Sun, Moon, Mars, Mercury, Jupiter, etc.) is affecting the natal planets of the chosen share.

- **Green cells indicate positive or supportive influence**
- **Red cells indicate negative or challenging influence**

This allows the user to instantly identify which planetary transits are **activating bullish, bearish, or volatile conditions** for that stock.

The second table, **"Effects of Planets Transiting on Each Other (TPLT → TPLT),"** displays how the transiting planets are interacting among themselves—showing mutual aspects, strengths, and tensions between the current-day planetary positions.
This is extremely useful for detecting:

- Trend-forming transits
- Market-moving planetary combinations
- Volatility-creating conflicts between planets
- Strong supportive transits that stabilize market conditions

By combining both tables, the Transit View tab provides a clear, visual, and quantitative understanding of how **today's planetary environment** impacts the stock's natal chart as well as the market's overall sentiment.

This powerful tool helps the user anticipate intraday movement, momentum shifts, and major astrological triggers affecting the selected share—making it an essential part of advanced financial astrology analysis.

The **Historical Data View** tab provides access to the **maximum available price history** for the selected share, index, or market instrument. Each stock includes its full historical dataset—from the earliest

available listing date up to the most recent trading day—allowing users to analyze long-term price trends with precision.

The tab displays the data in a clean, paginated format including:

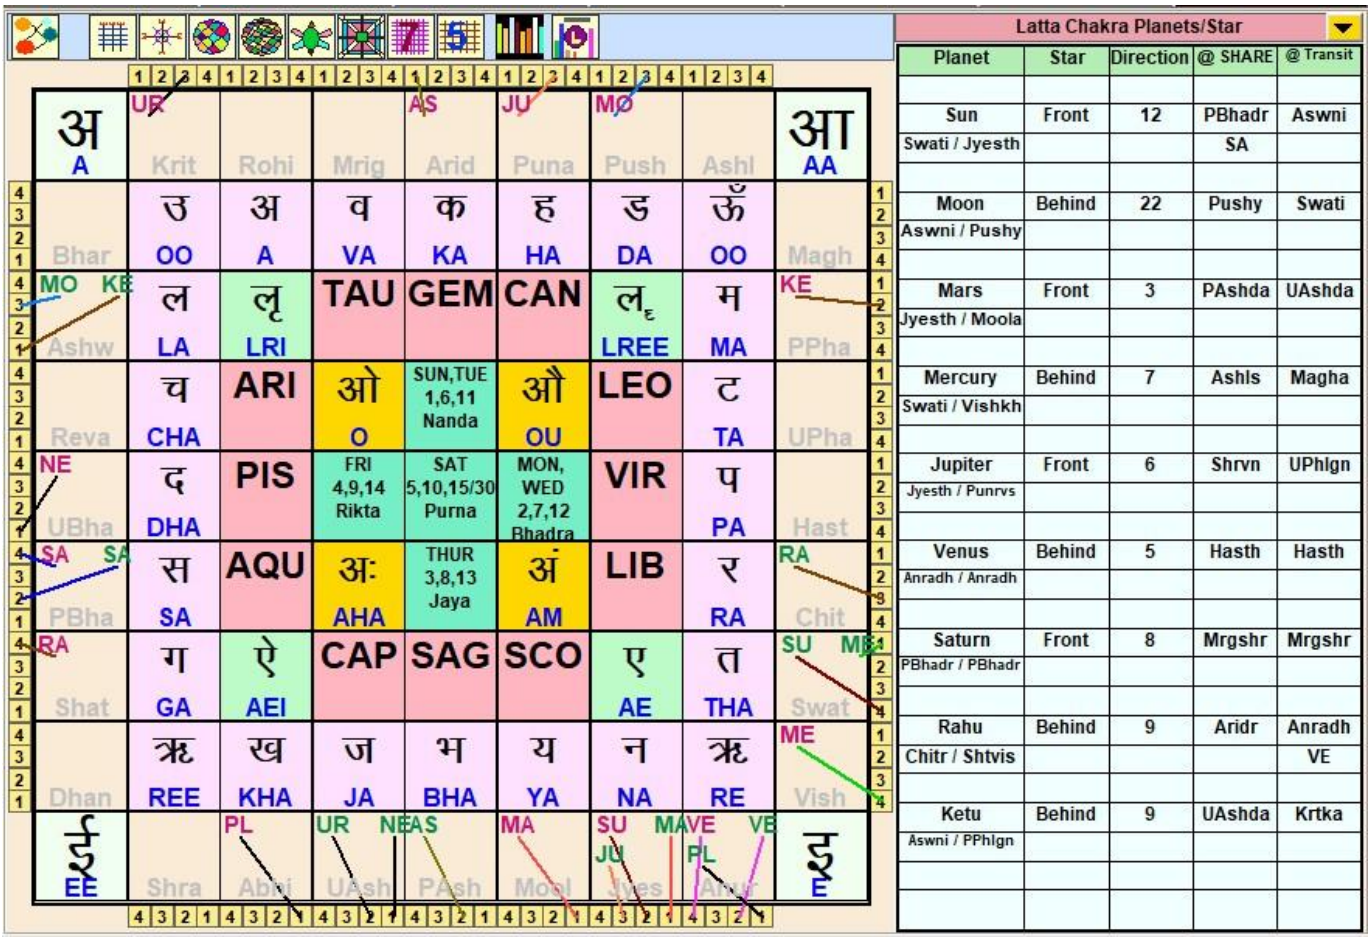
- **Date**
- **Open Price**
- **High Price**
- **Low Price**
- **Close Price**
- **Daily Percentage Change**

Users can navigate through thousands of records using the page controls shown at the top. For example, as seen in the image, this share contains **9,427 historical entries**, spread across **139 pages**, making it incredibly useful for:

- Studying long-term bullish or bearish cycles
- Identifying trend patterns around key planetary events
- Performing backtesting of financial astrology rules
- Comparing historical movement against Dasha, transit, Nakshatra, and Yogas
- Understanding recurring market behavior across decades

The tab acts as a complete archival reference, enabling deep research and helping financial astrologers correlate price behavior with astrological conditions going back many years.

5.6.1 SBC Transit planets with Shares Natal Planet



This tab provides a complete **Sarvatobhadra Chakra (SBC)**–based analysis by integrating the **current transit planets** with the **natal planetary placements** of the selected share. It also includes all supporting astrological chakras that enhance precision in financial astrology forecasting.

In this view, the user gets access to:

Complete Sarvatobhadra Chakra (SBC)

The central SBC Chakra shows the interaction of planets, signs, Nakshatras, vowels, weekdays, and Tithis. Transit planets and natal planets are plotted interactively, allowing the user to visually detect:

- Vedha (obstruction)
- Direct hits
- Shalaka effects
- Energy flow across Nakshatra and Rashi zones
- Supportive and destructive planetary influences

Additional Chakras Included

Along with SBC, multiple classical chakras are integrated for deeper interpretation:

- **Surya Kalan Chakra**
- **Chandra Kalan Chakra**
- **Kota Chakra**
- **Koorma Chakra**
- **Sanghatta Rashi & Nakshatra Chakra**
- **Sapta Shalaka Chakra**
- **Panch Shalaka Chakra**

These ancient Vedic tools help determine planetary favorability, destructive energies, prosperity zones, and sensitive points influencing price behavior.

Planetary Direction Table

On the right side, a detailed table shows each transit planet with:

- **Its Nakshatra**
- **Its direction (Front / Behind / Side)**
- **Star at Share's Natal Chart**
- **Star at Transit**

This indicates **which natal planetary points are being struck or influenced by the transiting planets**, making it easier to understand short-term market impact.

Purpose of the Tab

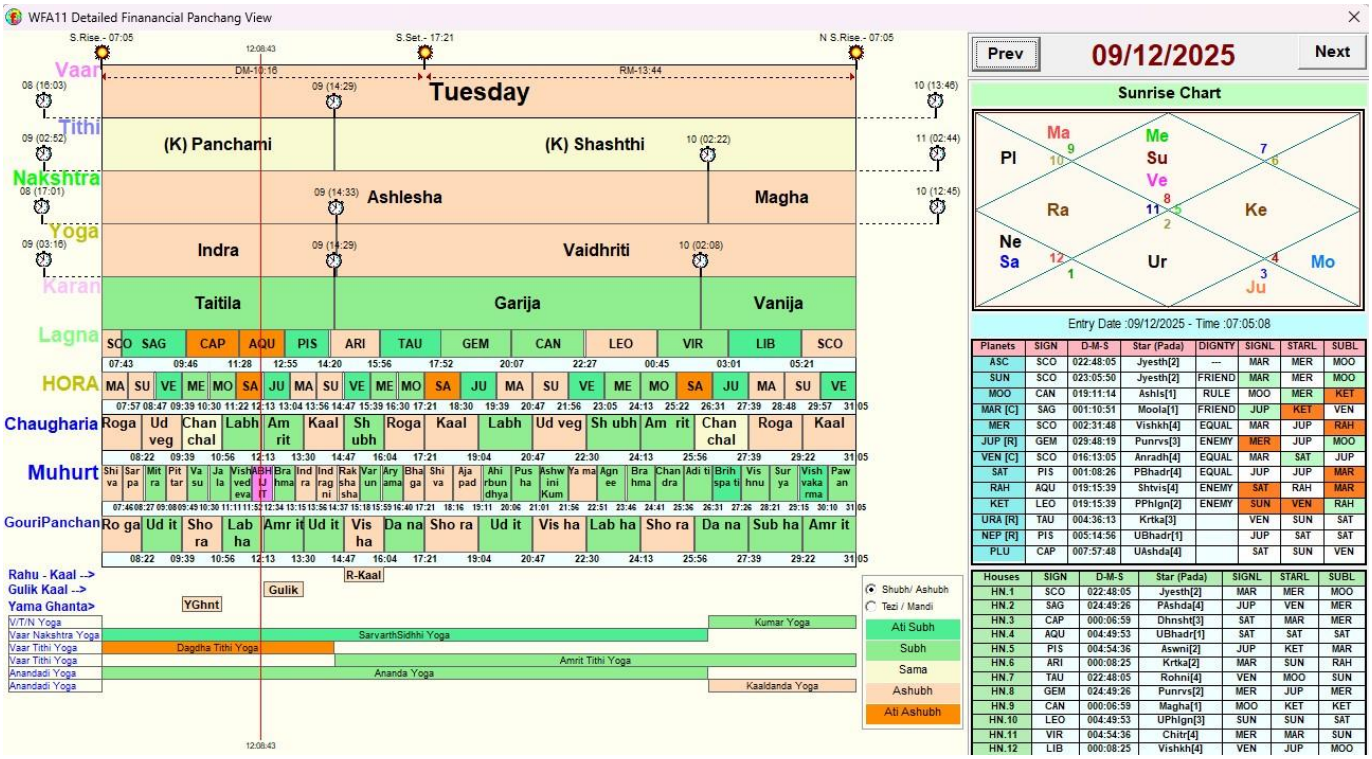
Using this tab, the user can clearly observe:

- Which transit planets are currently influencing the share
- Whether the influence is supportive, obstructive, or volatile
- Which Nakshatra vedha are activated
- Whether market conditions are likely to show rise, fall, or stagnation
- Sensitive planetary interactions that trigger intraday or positional movements

This is one of the most advanced and powerful components of the software, combining traditional Vedic chakra systems with modern financial astrology applications. It allows traders and researchers to **visually decode** how today's planetary positions are affecting the natal structure of the selected stock, giving deep insights into trend direction, strength, and timing.

Important Tools

6.1.1 Daily Financial Market Panchang View Tool



This tool is designed to give traders a **complete astrological snapshot of the day**, helping them understand how planetary energies influence intraday market behaviour. It combines **traditional Panchang elements** with **modern financial astrology parameters**, making it one of the most powerful timing tools for stock market traders.

1. Daily Panchang Overview

The top section shows the **core Panchang elements**—Tithi, Nakshatra, Yoga, Karana, and Vaar—along with their **start and end timings**.
These elements decide the **general mood of the day**, indicating whether the day supports bullishness, volatility, consolidation, or caution in trading.

- **Tithi** → Market emotion, liquidity flow
- **Nakshatra** → Sector influence & mood swings
- **Yoga** → Trend strength & breakout potential
- **Karana** → Intraday movement style (sharp, slow, erratic, stable)
- **Vaar (Weekday)** → Dominant planetary influence of the day

2. Time-Specific Intraday Windows

The chart is divided into **multiple time layers**, giving extremely accurate market-timing signals.

Lagna (Ascendant) Timeline

Shows how Lagna changes throughout the day.
Lagna change creates **mini trend shifts**, volatility bursts, or reversals.

Hora Timeline

Shows which planetary Hora is active at a given time.
Hora is one of the strongest intraday timing indicators:

- **Sun Hora** → Volatility, breakout attempts
- **Moon Hora** → Emotional reaction, quick moves
- **Jupiter Hora** → Upside potential, stability
- **Saturn Hora** → Slow movement, pressure
- **Mercury Hora** → Intraday price swings, algorithmic moves
- **Venus Hora** → Profit booking
- **Mars Hora** → Aggressive moves and scalping moves

Sub-Hora Timeline

Adds micro-precision by dividing each Hora into **sub-periods of planetary influence**.
These timings show **minute-to-minute sentiment change**, ideal for scalpers.

3. Chaughadia (Hourly Auspiciousness)

This is widely used in trading Muhurtas.

- **Labh, Amrit, Shubh** → Positive for long trades
- **Roga, Kaal, Udveg** → Avoid large positions
- **Chanchal** → Fast scalping opportunities

It helps traders filter **favourable and unfavourable hours**.

4. Muhurat Shastra Time Blocks

Shows various Muhurat windows like:

- **Vahni**, **Amrit**, **Labha**, **Subh**, **Dhan**, **Rudra**, etc.

These indicate **market mood zones**, helping traders anticipate **trend continuation or reversal**.

5. Gowri Panchang (Profit/Loss Windows)

Shows time periods labelled as:

- **Amrit**, **Shubh**, **Labha** → Good for entering positions
- **Roga**, **Dhan**, **Vish** → Risk zones

- **Udveg**, **Kala** → Avoid trading

This helps fine-tune intraday entries.

6. Sunrise Chart (Intraday Birth Chart of the Day)

This section generates the **chart for the exact sunrise moment**, which acts like the **birth chart for the trading day**.

It includes:

- Ascendant sign
- Planetary positions
- Star/Nakshatra & Pada
- Planetary dignity (Friend, Enemy, Equal, Uccha, Neecha)
- Planetary lord influences
- Strength level indicators (Shubh, Ashubh)

This chart offers deep astrological insight into the **overall tone of the market day**.

7. Market Strength Indicators (Shubh/Ashubh, Tezi/Mandi)

Based on combined Panchang and planetary rules, the tool gives:

- **Ati Shubh**
- **Shubh**
- **Sama**
- **Ashubh**
- **Ati Ashubh**

This helps traders understand whether the day is leaning toward **bullish, neutral, or bearish** activity.

8. Rahu Kaal, Yama Ghanta, Gulika Kaal

These are inauspicious periods where:

- **Market tends to mislead traders**
- **False signals & whipsaws can increase**
- **Avoid fresh major trades**

9. Special Yogas for Financial Astrology

The bottom section marks rare and powerful timing windows:

- **Amrit Tithi Yoga**
- **Sarvartha Siddhi Yoga**
- **Siddhi Yoga**

- **Kaan Yoga** (Volatility alert)

These times are especially useful for detecting **breakouts, trend starts, or reversal triggers**.

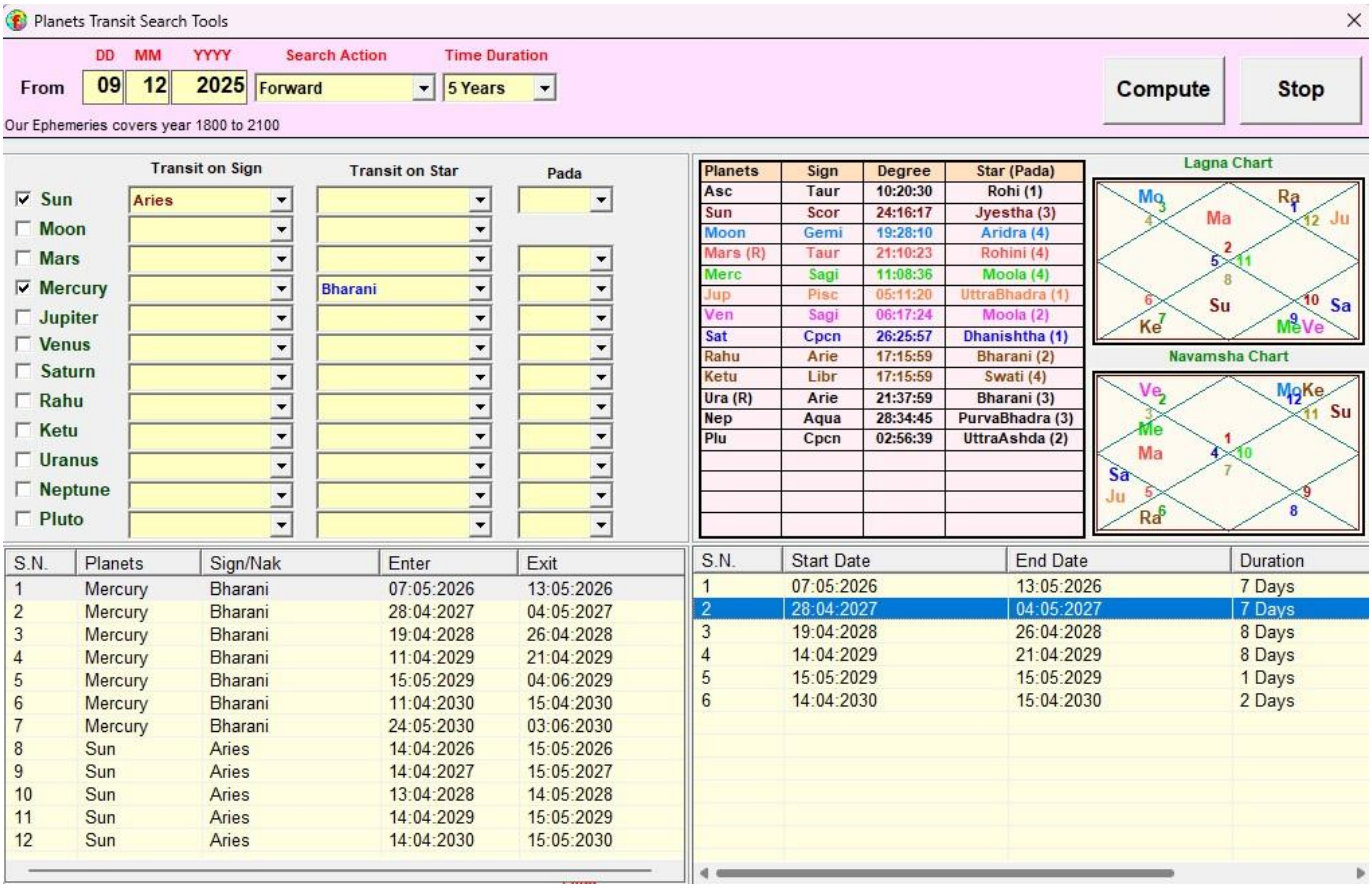
The **KP Daily Panchang** is the backbone of KP-based financial astrology in the software. It shows, for any chosen date and time, the full KP position of every planet – Sign, exact Degree-Minute-Second, Sign Lord, Star (Nakshatra) Lord, Sub-Lord and Sub-Sub-Lord – along with KP details of cusps on the right side with their exact time of change.

1. This helps a trader immediately know which planets are ruling the day, hour and minute, and what kind of results they promise for price movement, trend change or news impact in shares, indices or commodities.
2. Because all four KP levels (Sign, Star, Sub and Sub-Sub) are shown together, it becomes very easy to judge whether a planet is supporting buying, selling or sideways markets, and to match this with sector rulerships.
3. The change-time column tells you exactly when an important star, sub or cusp lord is changing, so you can plan intraday entries, exits and stop-loss adjustments around these sensitive time windows instead of guessing from charts alone.
4. For researchers, this tool provides clean, timestamped KP data that can be correlated with historical price bars to develop and test high-precision intraday and positional trading rules.

8.1.1 Planets Transit Search Tool



The **Planet Transit Search Tool** is a powerful planner for long-term financial astrology work. It lets you pick a starting date and search forward or backward for many years to find exactly **when any planet will enter a chosen sign, nakshatra or pada**, and how long it will stay there.

1. For traders and investors, this means you can quickly locate all future periods when "sensitive" transits repeat for a specific index, share or commodity (for example, Mercury in Bharani or Sun in Aries) and prepare trading campaigns around those windows.
2. The lower tables show **entry date, exit date and total duration** of each transit, so you can compare these time blocks with past price behaviour and detect repeating bullish or bearish cycles.
3. The live Lagna and Navamsha charts on the right give the full astrological picture of the reference date, helping you judge whether an upcoming transit is likely to support strong trends, reversals or just sideways markets.

With this tool, important planetary transits stop being a surprise and become **pre-scheduled events** that you can track, test and trade with confidence.

Rahu	00:10:44	00:06:39	00:00:00	01:00:00	00:21:25	01:38:49
Ketu	00:10:44	00:06:39	00:00:00	01:00:00	00:21:25	01:38:49

The **Strength of Planets in Sarvatobhadra Chakra (SBC)** tool calculates how powerful each planet is at a given time based on *Vyapar Ratna* principles. This strength directly influences the intensity of market trends, volatility, and sector-specific movements. By measuring **Kshetra Bala, Navamsha Bala, Udaya Bala, Vakra Bala, and Uchha Bala**, the tool shows which planets are dominating the market and which are weak.

Strong planets create powerful trends, breakouts, and directional movements

When a planet shows high total strength, the sectors, stocks, and market behaviours ruled by that planet become more active, trending, and predictable.

Weak planets create confusion, sideways movement, or sudden reversals

Low-strength planets indicate poor decision energy, false breakouts, and unstable price patterns.

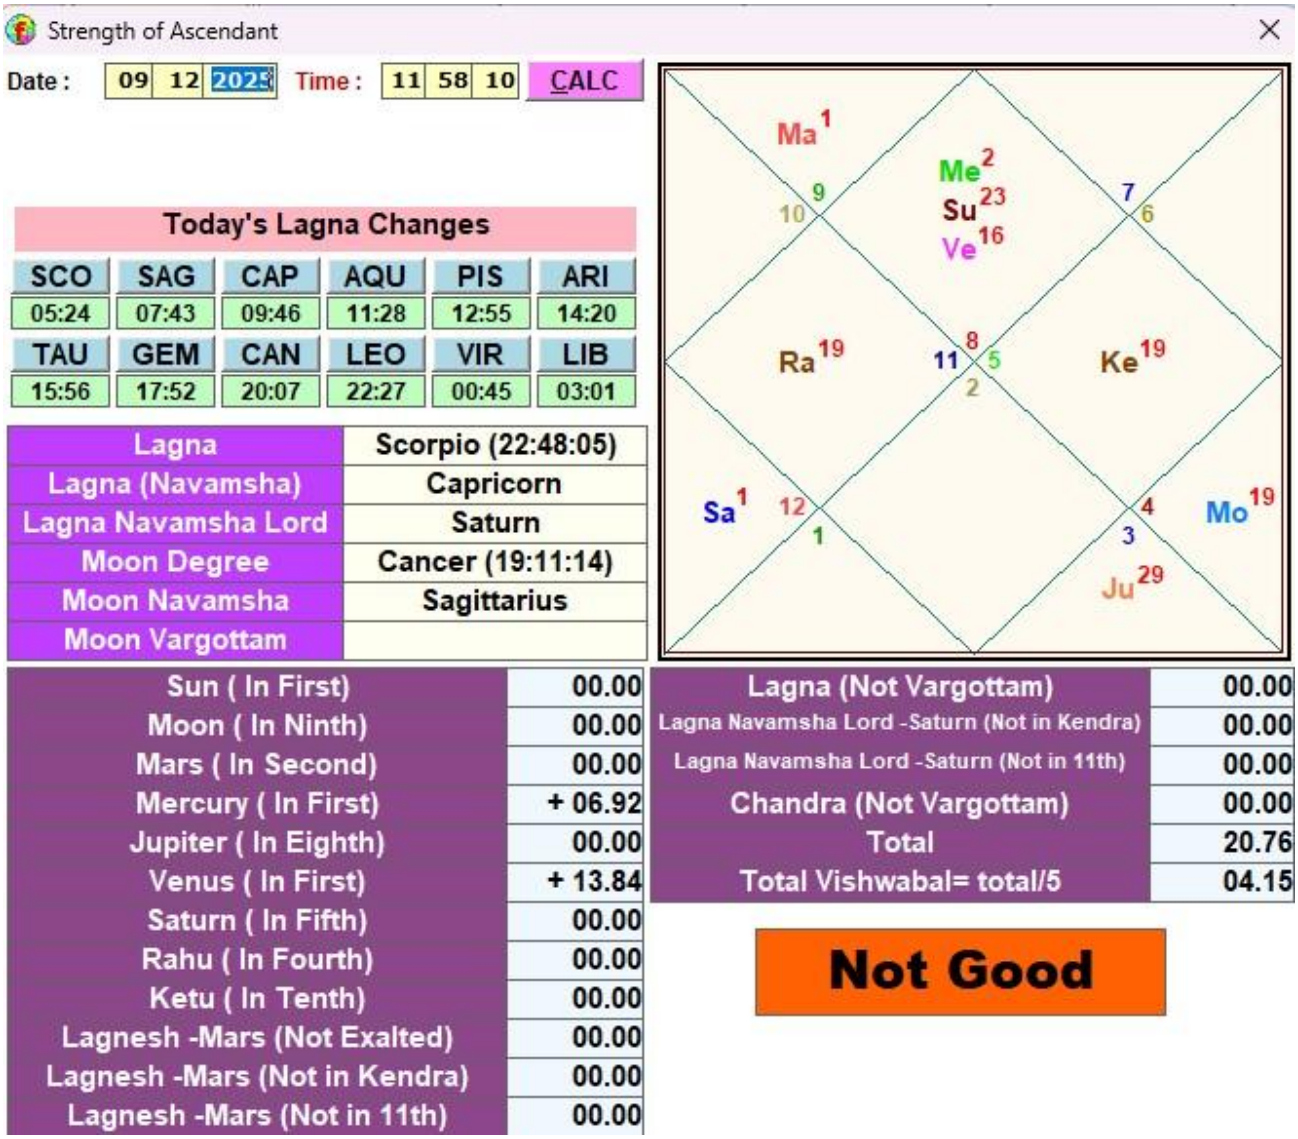
Planetary strength helps identify the best intraday and positional trading windows

During periods when a planet's strength increases or decreases sharply, the market often reacts with rising momentum or sudden corrections.

Essential for SBC-based prediction of Tezi–Mandi (Bull–Bear) behaviour

Since SBC integrates Nakshatra, Rashi, Vowels, Weekdays and Tithis, knowing planetary power helps decode which directional forces will dominate at any moment.

10.1.1 Lagna Strength Tool



The **Strength of Ascendant Tool** is extremely valuable in financial astrology because it tells you *how strong or weak the Lagna (Ascendant)* is at any given moment, which directly affects the **clarity, stability and reliability** of all market predictions made during that time.

- The tool shows **today's Lagna changes** with exact timing, helping traders pick the strongest windows of the day.
- It checks the **Lagna in Rashi, Navamsha, Navamsha Lord, Moon Navamsha, and Moon Vargottam**, giving a complete strength rating.
- It automatically calculates **Vishwabal**, a combined score of Lagna and Chandra strength — if this value is low, as shown ("Not Good"), the market becomes more unpredictable and signals become unreliable.
- The planetary placement grid (Sun in 1st, Moon in 9th, etc.) further refines whether the moment is **supportive for trend formation** or likely to bring confusion, false breakouts or sideways behaviour.

In financial astrology, **timing is everything**, and the Ascendant is the anchor of that timing.
This tool ensures you enter trades only during periods when the Lagna is strong and the market energy is stable, improving the accuracy of your predictions and reducing risk.

11.1.1 Fincalc Too 1 - Planetary Cycle

FinCalc Tool 1 - Planetory Cycle

DATE : DD 09 MM 12 YYYY 2025 Time : HH 13 MI 30 SS 21 ☑ Include Earth Angle

Closing Value : 13473 Calculate Comodity/Share /Stock/ Market : India

The **Planetary Cycle Tool** is designed to convert *planetary degrees* into *time-based cycle points*, helping traders identify the **most active intraday timings** when markets respond strongly to planetary energy shifts. This tool transforms planetary positions into **effective time windows**, revealing when the market is likely to show momentum, reversals, spikes, or trend continuation.

Purpose of This Tool

– Convert planetary degrees into time-based cycle points.
– Identify intraday high-energy time windows that influence market movement.
– Match closing/opening price values with planetary values to find the "Effective Time".
– Provide time-based signals for trend change, volatility rise, or market activation.
– Build an astro-mathematical timing model for any commodity, share, or index.

Importance in Financial Astrology

– Planetary degrees represent energy levels; converting them into time reveals *when* the market reacts.
– Helps traders know the exact time windows when volume, volatility, or breakouts are likely.
– Supports intraday timing decisions with a structured astro-logical formula.
– Shows when price and planetary cycles are aligned, which increases market sensitivity.
– Works for Gold, Silver, Crude, Nifty, BankNifty, stocks, or any other tradable instrument.
– Provides a non-random, time-based trading approach derived from astrology and mathematics.

How to Use This Tool

Step 1 – Select Date and Time

– Enter the date and the current time you want to analyse.
– The tool calculates planetary degrees at that moment.

Step 2 – Enter Closing or Opening Price

– Type the market's closing/opening value in the input box.
– This price will be matched to planetary cycles.

Step 3 – Click "Calculate"

The tool displays:
– Planetary degrees
– Earth angles
– Total planetary values
– Planetary timing values
– Value 1, Value 2, Value 3
– Added timings
– Effective Time

Understanding the Output

Planetary Degrees / Earth Angle

– Shows the raw energy influence of each planet.

Timings

– Converts degree totals into exact intraday times (e.g., 04:15:30 for Sun).
– These times represent activation periods of each planet.

Value 1 / Value 2 / Value 3

– Price-based cycle measurements that help identify breakout or reversal zones.

Added Timings

– Displays combined peak astro-timings when markets often react strongly.

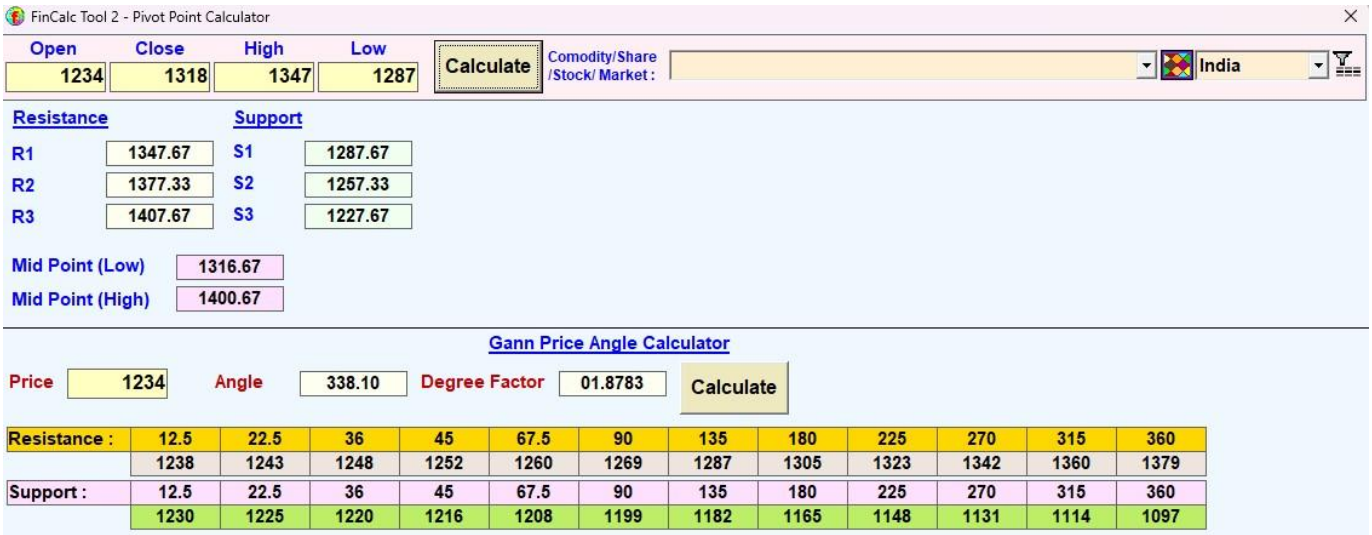
Effective Time (Most Important Section)

– When the entered price aligns with planetary cycle values, the tool calculates the **Effective Time**.
– These times are the strongest movement windows of the day.
– Traders should watch these times for sudden movement, trend change, or breakout.

Why This Tool Is Extremely Useful for Traders

– Helps avoid random entries by revealing exact astro-timing windows.
– Converts astrology into measurable, actionable intraday time cycles.
– Improves accuracy for timing reversals or trend continuation.
– Gives traders a scientific astro-edge for short-term and intraday trading.
– Highly effective for commodities, indices, and equity markets.

12.1.1 Fincalc Too 2 – Pivot Point Calculator



The Pivot Point Calculator helps traders quickly identify daily support–resistance levels and Gann angle–based price projections, giving a structured decision-making framework for intraday and short-term financial astrology analysis.

Purpose of This Tool

– Calculate accurate pivot levels (R1, R2, R3 and S1, S2, S3) from Open, High, Low, and Close.
– Provide midpoint levels that help recognise equilibrium zones in the market.
– Generate Gann angle–based price levels using any selected angle.

– Combine mathematical pivot points with astro-based timing tools for powerful forecasts.
– Help traders decide where price may face resistance, support, reversal, or breakout pressure.

Importance in Financial Astrology

– Markets respond strongly when price interacts with pivot levels, especially during planetary activation times.
– Helps match technical levels with planetary cycles for more accurate predictions.
– When planetary influence peaks (like Hora, Lagna change, Moon star change), these pivot levels gain even higher importance.
– Provides a disciplined, non-emotional trading structure that complements astro signals.
– Gann angle outputs show vibration-based support–resistance levels that often align with key planetary degrees.
– Essential for traders looking to merge price structure with timing astrology.

How to Use This Tool

Step 1 – Enter OHLC Data

– Type the **Open**, **High**, **Low**, and **Close** values of the stock or commodity.
– Click **Calculate** to generate pivot points.

Step 2 – Read Pivot Levels

The tool displays:
– R1, R2, R3 (upside resistance levels)
– S1, S2, S3 (downside support levels)
– Midpoint (Low) and Midpoint (High)

These help identify reversal zones, breakout points, and trend continuation areas.

Step 3 – Use the Gann Price Angle Calculator

– Enter a price (example: 1234).
– Enter a Gann angle (example: 338.10 or any desired vibration).
– Click **Calculate**.

The tool provides:
– Gann resistance levels at multiple angles
– Gann support levels at multiple angles

These values act as vibrational barriers and can be combined with astro-timing for high accuracy.

Step 4 – Apply in Trading

– Watch when the current price hits pivot or Gann levels.
– Combine these levels with planetary timings (Hora, Lagna, Moon transit, KP significators).
– Expect strong reactions near these levels during major planetary triggers.

Why This Tool Is Extremely Useful

– Gives predefined support–resistance levels so you always know probable reaction zones.
– When used with financial astrology timings, accuracy of reversal detection increases significantly.
– Saves traders from emotional decision-making by providing a mathematical foundation.
– Suitable for intraday, positional, and swing traders in commodities, equities, and indices.

13.1.1 Fincalc Too 3 – Retracement Calculator

FinCalc Tool 3 - Retracement Calculator

Fibonacci

Swing High (H): 95
Swing Low (L): 94
Range (H - L): 1
Compute

Ratio	Uptrend Level	Downtrend Level
0	95	94
0.236	94.764	94.236
0.382	94.618	94.382
0.5	94.5	94.5
0.618	94.382	94.618
0.786	94.214	94.786
1	94	95
1.272	93.728	95.272
1.618	93.382	95.618

Gann

Swing High (H): 1234
Swing Low (L): 980
Range (H - L): 254
Compute

Ratio	Uptrend Level	Downtrend Level
0	1234	980
0.125	1202.25	1011.75
0.25	1170.5	1043.5
0.375	1138.75	1075.25
0.5	1107	1107
0.625	1075.25	1138.75
0.75	1043.5	1170.5
0.875	1011.75	1202.25
1	980	1234

The Retracement Calculator helps traders identify market reversal zones using **Fibonacci ratios** and **Gann ratios**, two of the most powerful tools for forecasting price reactions. This tool is especially useful when combined with financial astrology timing factors like planetary transits, Hora, Moon star changes, and Lagna shifts.

Purpose of This Tool

– Calculate Fibonacci retracement and extension levels from a selected swing high and swing low.
– Calculate Gann retracement levels using mathematical ratios widely used in time–price analysis.
– Provide clear Uptrend and Downtrend levels that indicate where price may pause, reverse, or accelerate.
– Combine technical retracement levels with astro-timing signals for highly accurate market predictions.
– Help identify support, resistance, breakout points, and trend exhaustion zones.

Importance in Financial Astrology

– Price often reverses exactly at Fibonacci and Gann levels when a major planetary event occurs.
– Astro triggers such as Moon moving through certain Nakshatras or strong planetary aspects increase the probability of reactions at these retracement levels.
– Helps match mathematical price zones with planetary timing windows, improving decision-making.
– Works especially well during Mercury, Jupiter, or Venus transits when markets become highly sensitive to technical ratios.
– Useful for forecasting intraday, positional, and long-term turning points in commodities, stocks, and indices.

How to Use This Tool

Step 1 – Select Swing High and Swing Low

– Enter the **Swing High (H)** and **Swing Low (L)** values.
– The tool automatically calculates the **Range (H – L)**.

Step 2 – Click Compute

– Instantly generates Fibonacci and Gann retracement tables.
– Displays two sets of levels:
– **Uptrend Levels** (price rising from swing low)
– **Downtrend Levels** (price falling from swing high)

Step 3 – Observe Fibonacci Levels

Important Fibonacci ratios such as 0.236, 0.382, 0.5, 0.618, 0.786, 1.272, and 1.618 help detect:
– Pullbacks
– Corrections
– Continuation patterns
– Trend reversal points

Step 4 – Observe Gann Levels

Gann ratios like 0.125, 0.25, 0.375, 0.5, 0.625, 0.75, 0.875, etc., help identify:
– Vibrational resistance
– Strong reversal barriers
– Time–price symmetry zones

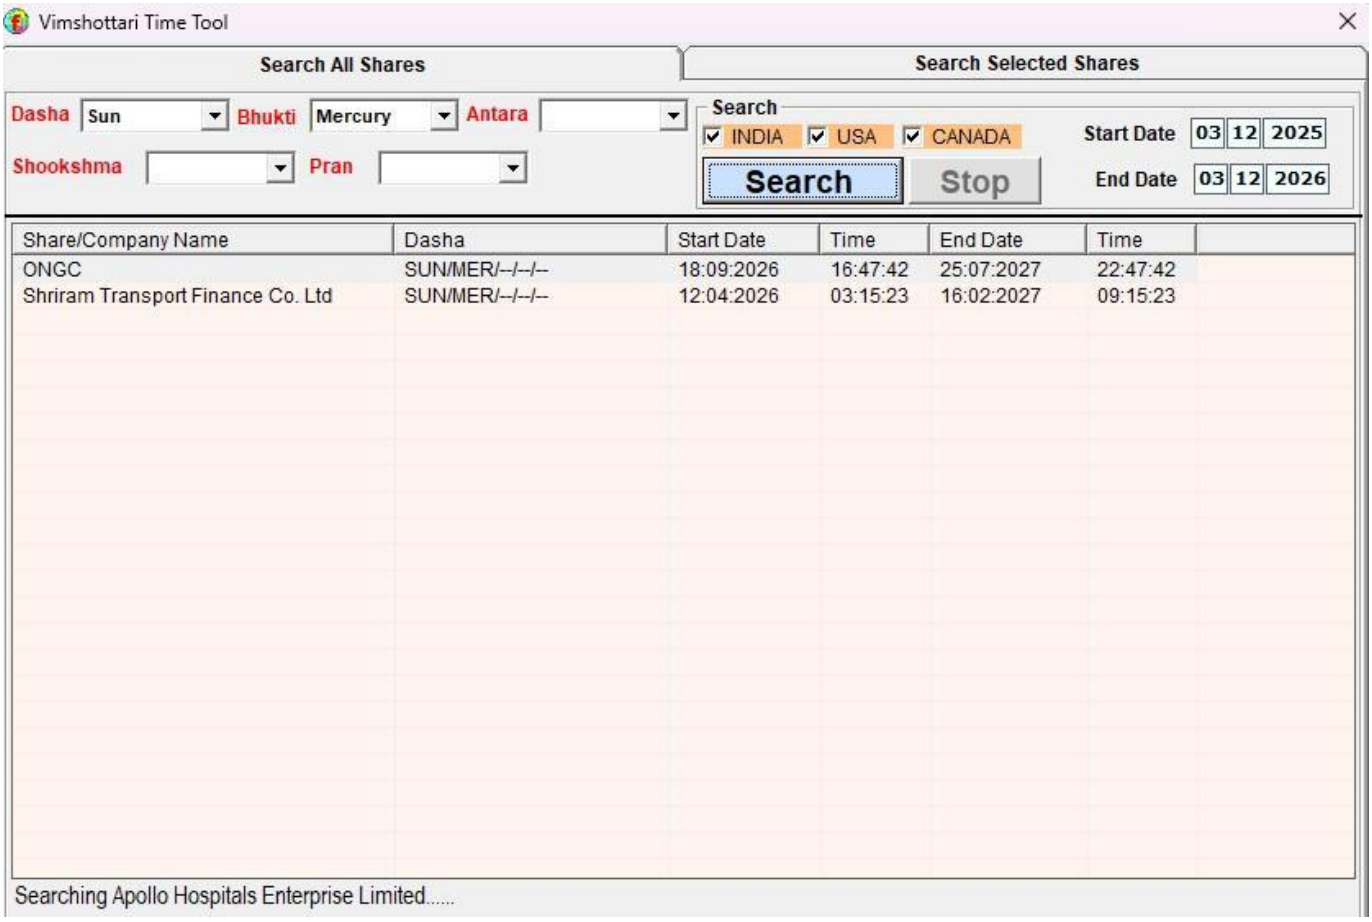
Step 5 – Apply in Trading

– Combine retracement levels with Hora, Lagna, Moon Nakshatra, or major transits.
– Expect reactions when price touches these levels during strong planetary influence.
– Use the levels to decide entry, exit, stop loss, reversal zones, and breakout points.

Why This Tool Is Extremely Useful

– Gives predefined price zones where natural market reversals often occur.
– Enhances the accuracy of astro-timing predictions.
– Avoids emotional trading by providing mathematical justification for price behavior.
– Works for all markets: stocks, indices, commodities, metals, grains, currencies, and crypto.
– Helps predict both short-term and long-term trend corrections.

14.1.1 Vimshottari Time Tool



The **Vimshottari Time Tool** is designed to identify *exact planetary Dasha periods* that influence the behaviour of individual stocks. Just like a human birth chart, every listed company has its own horoscope and its own **Vimshottari Dasha cycle**. These Dashas control when a company experiences growth, decline, stability, volatility, or major turning points.

This tool automatically scans **all shares** or **selected shares across India, USA, and Canada**, and finds when a particular **Dasha, Bhukti, Antara, Sukshma, or Pran period** becomes active. Traders can instantly see which stocks will enter a powerful planetary period and which ones are entering weak or risky phases.

1. Identifies High-Growth Windows

Using the Dasha filters (Sun → Mercury → Antara → Sukshma → Pran), the tool pinpoints the exact dates when a company enters a *favourable planetary sequence* known for expansion, revenue strength, or price appreciation.
Example from the image: **ONGC and Shriram Transport** entering Sun–Mercury period, which often boosts business activity.

2. Detects Weak or Risky Phases

Just as certain Dashas are positive, others are known for instability, debt pressure, litigation, or market underperformance. The tool highlights these periods in advance so traders can avoid or reduce exposure.

3. Helps Match Company Dashas With Market Cycles

A stock performs best when its internal Vimshottari period aligns with broader market sentiment.
This tool helps traders find such **synchronization points**, enabling accurate timing for investment or profit-booking.

4. Perfect for Long-Term Investment Forecasting

Vimshottari Dasha is a *life-cycle* system.
The tool can scan:

- Entire Dasha cycle of a company
- Multi-year investment horizons
- Upcoming favourable planetary shifts

This makes it extremely powerful for investors planning 1–10 year positions.

5. Generates Exact Start & End Times

The software doesn't just show the year —
it gives **precise dates and times** when a new Dasha becomes active.
This level of accuracy is invaluable for:

- Predicting breakout periods
- Identifying reversal windows
- Timing major bullish or bearish moves

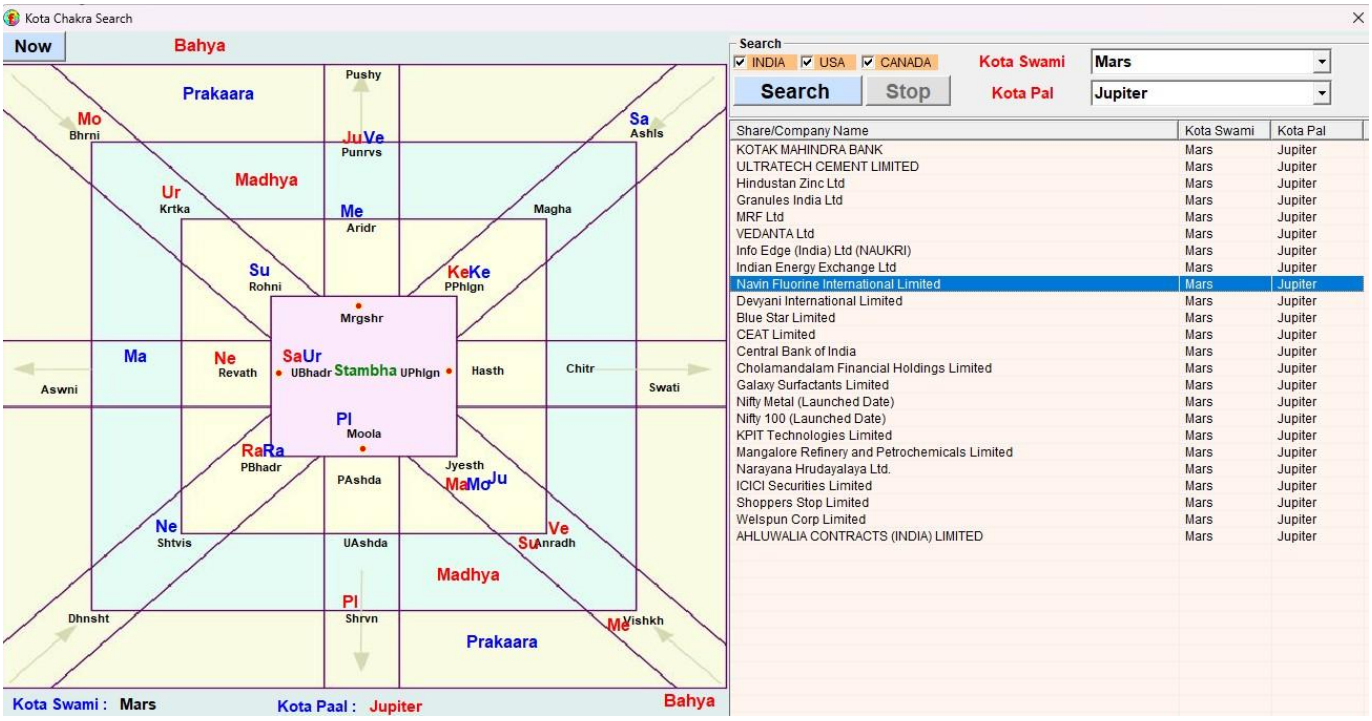
6. Saves Enormous Time for Analysts

Instead of manually checking Dashas for hundreds of stocks, this tool:

- Scans all registered shares
- Filters them by country
- Matches them with the selected Dasha combination
- Displays only those entering the chosen planetary period

This makes it a **high-speed research assistant** for financial astrologers.

15.1.1 Kota Chakra Search Tool



The **Kota Chakra Search Tool** helps traders identify the *current planetary protection and vulnerability zones* for each stock by analyzing its **Kota Swami** (Ruler) and **Kota Pal** (Protector) inside the Kota Chakra. Just as the Kota Chakra is used in Vedic astrology to judge safety, danger, and movement of a person, this tool applies the same principles to companies and stocks—revealing which planetary forces are supporting a stock and which forces are exposing it to risk.

1. Identifies Which Stocks Are Protected or Vulnerable Today

The picture shows the **Kota Chakra divided into Bahya (Outer), Madhya (Middle), and Stambha (Center)**.

- **Kota Swami (Mars)** → Represents the planet controlling the inner movement of the stock.
- **Kota Pal (Jupiter)** → Represents the protector defending the stock from downfall.

The search tool filters all shares and instantly shows which companies fall under a specific Swami–Paal combination (e.g., **Mars–Jupiter**).
This helps traders find **stocks entering strong, protective planetary zones** or **stocks exposed to danger**.

2. Predicts Whether a Stock Is in a Growth Zone or Risk Zone

By locating the Swami–Paal inside the Kota Chakra (Bahya, Madhya, or Stambha), traders can understand:

- **Bahya (Outer Zone):** High volatility, risk of sharp drops or unexpected spikes
- **Madhya (Middle Zone):** Neutral but unstable; trend may shift anytime
- **Stambha (Center Zone):** Safe, stable, and protected — ideal for positional holdings

The tool automatically evaluates these zones by filtering stocks whose ruling planets match the selected **Swami and Paal**.

3. Helps Select Stocks With Strong Planetary Backing

In the picture, Mars is the Swami and Jupiter is the Paal.
Mars gives **strength, momentum, and aggressive upward movement**, while Jupiter gives **protection and stability**.

Stocks appearing in this list (right side panel) are more likely to:

- Show upward momentum
- Hold support levels
- Deliver steady gains
- Resist market corrections

This gives traders a huge advantage when choosing stocks during uncertain market phases.

4. Quickly Identifies Stocks Entering Danger Zones

If a stock's Swami or Paal falls in:

- **Bahya (Outer Area)** → Stock may face selling pressure, breakdown, or panic moves
- **Enemy Nakshatra Zones** → Stock may underperform index
- **Weak planetary conditions** → Risky for fresh entry

The tool helps traders avoid such stocks in advance.

5. High-Speed Filtering Across Multiple Markets (India, USA, Canada)

Instead of manually scanning hundreds of charts, the tool:

- Filters by country
- Searches all database-listed companies
- Shows only those matching the selected Swami–Paal combination

This turns complex Kota Chakra analysis into a **one-click stock screening system**.

16.1.1 Positive Timing For Native based on Panphara Degree Placement

Positive/Important Time based on Panphara Houses Degree

Planets in Panphara in Native Chart					Moon Sign	Moon 2nd House Lord in D1	Moon

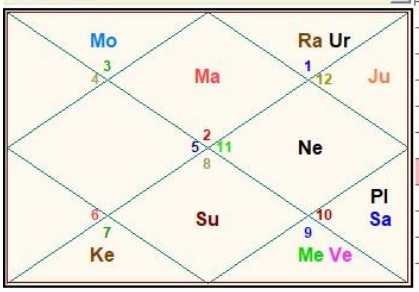
Lagna Chart



Panphara Degree of House/Sign					
1	2	3	4	5	6
00.00 - 02:30	02:30 - 05:00	00.00 - 02:30	07:30 - 10:00	10:00 - 12:30	12:30 - 15:00
7	8	9	10	11	12
15:00 - 17:30	17:30 - 20:00	20:00 - 22:30	22:30 - 25:00	25:00 - 27:30	27:30 - 30:00

The **Panphara Degree Timing Tool** identifies the most favourable time windows during the day when a native (trader or investor) receives strong astrological support for financial decisions. This tool analyses the placement of all planets in the native's chart, checks their Panphara house activation, and maps each degree to a specific *hourly energy cycle*—giving the user a precise timing blueprint for profitable investing.

1. Calculates When Each Planet Becomes Active for the Native

The tool converts planetary degrees into **Panphara House timings** (as seen in the bottom chart showing timing slots like 00:00–02:30, 02:30–05:00, 05:00–07:30, etc.).
Each planet triggers positive, neutral, or negative energy when its degree falls into:

- House 1 → Strong beginning
- House 2 → Wealth growth
- House 3 → Action and trade
- House 5 → Speculation
- House 9 → Luck
- House 11 → Gains

By mapping these degrees to time slots, the tool shows the **exact minutes when these houses activate**.

2. Finds the Best Intraday Time for Investing or Trading

Using the Panphara degree system, the tool highlights:

- Times of *high luck flow*
- Times of *gain activation*
- Times when *speculation becomes favourable*
- Times ideal for *entry and exit*

For example, if a planet sits in the 11th Panphara house (Gains), and that house corresponds to **17:30–20:00**, the native will have more success investing during that window.

3. Uses Native's Birth Chart to Create Personalized Market Timing

Unlike generic astrology, this tool gives **personalized trading hours** based on:

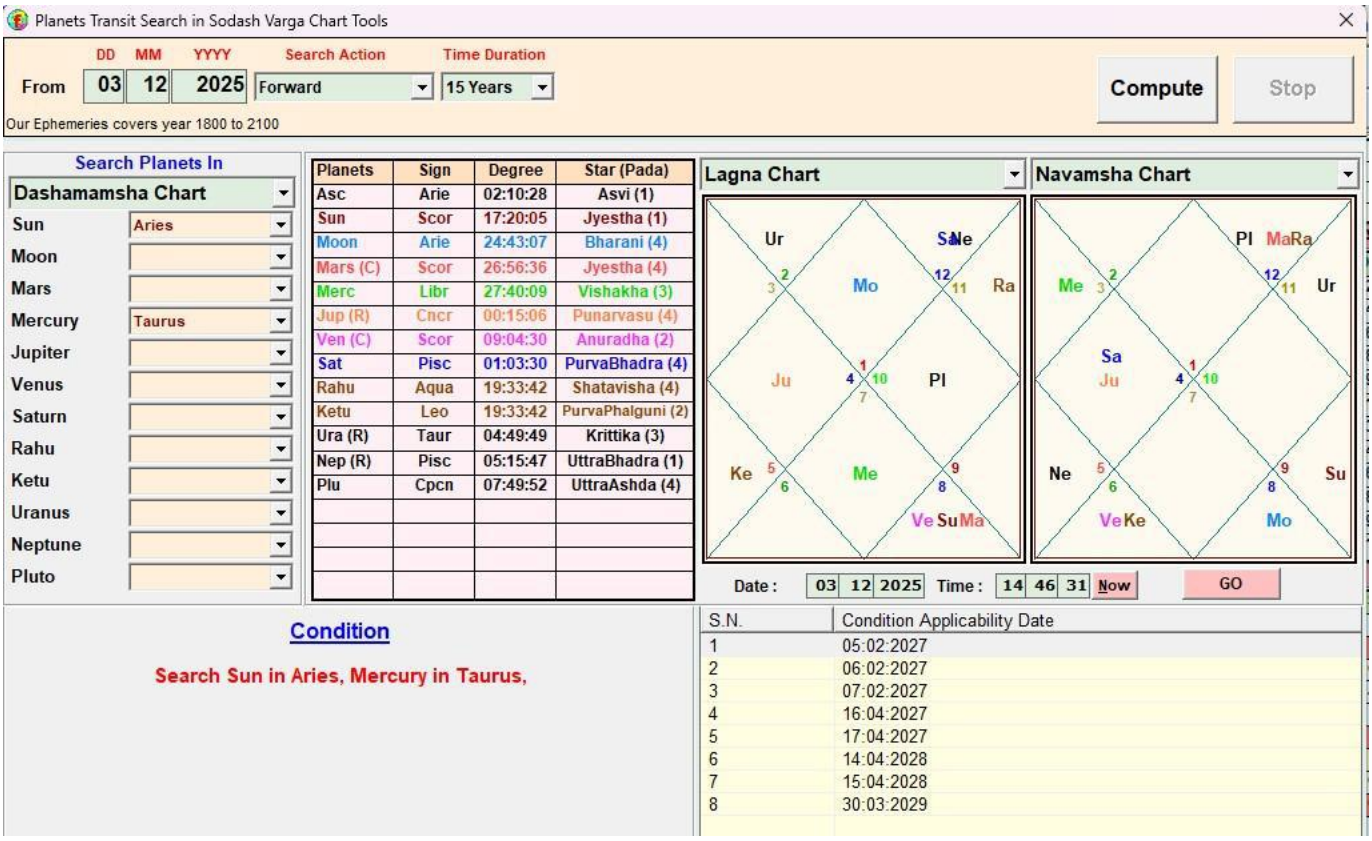
- Moon Sign
- Moon degree
- Lord of Moon's 2nd house in D1
- Its dispositor in D9
- Weekday and planetary ruler
- Panphara degree activation

As shown in the picture, planets like Sun, Moon, Mars, Rahu, etc., are calculated with:

- House number
- Rashi lord
- Nakshatra lord
- Degree (360° format)

This data unlocks individual profit windows with unmatched precision.

17.1.1 Planets Position Search in Shodash Varga Charts Tool



The **Shodash Varga Position Search Tool** allows traders and astrologers to find *rare and powerful planetary combinations* across all divisional charts (D1 to D16). Since high-level financial predictions depend on observing planetary strength beyond the main birth chart, this tool becomes essential for identifying **major wealth periods, sector-specific trends, investment opportunities, and large financial breakthroughs**.

1. Finds Rare "Wealth-Forming" Planetary Combinations Across All Varga Charts

The tool can simultaneously scan divisional charts like:

- **D1 (Rashi)** → Overall trend
- **D9 (Navamsha)** → Fortune & long-term gains
- **D10 (Dashamsha)** → Professional growth
- **D2 (Hora)** → Liquid wealth flow
- **D4 (Chaturthamsha)** → Property, assets
- **D16 (Shodashamsha)** → Luxuries

Using the inputs shown in the picture (e.g., *search Sun in Aries, Mercury in Taurus*), the tool finds **exact dates** when these powerful yogas appear.

This helps traders identify **windows of high financial potential**.

2. Predicts When a Planet Achieves Maximum Strength (Uchha, Mooltrikona, Own Sign)

In financial astrology, a planet becomes fully capable of generating wealth only when:

- It enters its **own sign**
- It reaches **exalted sign**
- It strengthens in **Navamsha or Dashamsha**

The tool scans for these high-strength moments across all 16 charts.
For example, in the picture:

- Sun will be in **Aries (exaltation)** on specific dates found by the tool.
- Mercury will enter **Taurus (own sign)**.

These are extremely important triggers for:

- Market uplift
- Sector rotation
- Sudden price appreciation

3. Helps Traders Time Large Investments Based on Multi-Varga Alignment

A stock or the market moves sharply when multiple vargas align positively.

Example:
If **Sun in Aries (D–10)**, Mercury in **Taurus (D–1)** and both strong in **Navamsha (D–9)**…
→ A *major uptrend* or large financial opportunity may appear.

This tool highlights the exact dates when such powerful multi-layer combinations occur.

4. Provides Long-Term Financial Planning Using Future Varga Movements

In the picture, the tool provides **future dates** such as:

- 05-02-2027
- 06-02-2027
- 14-04-2028
- 30-03-2029

These are the future planetary alignments when the desired yoga appears in Shodash Varga charts.

Traders can use this for:

- **Long-term investment planning**
- **Predicting market expansion cycles**

- **Identifying multi-year wealth creation phases**
- **Matching stock horoscope with personal horoscope**

5. Saves Enormous Time by Automating Varga Calculations

Manually checking 16 divisional charts for each date is nearly impossible.
This tool:

- Scans years (e.g., 15 years as shown)
- Tracks every movement of every planet
- Filters exact matches
- Shows precise applicability dates

This automation makes deep Vedic financial astrology **practical and fast**.

18.1.1 Navamsha Vedha in Sarvatobhadra Chakra Tool

Navamsha Vedha in SBC

Date : 03 12 2025 Start Time : 03 00 00 Compute Stop

The **Navamsha Vedha in SBC Tool** shows how **minute-level planetary movements inside the Navamsha divisions create positive (supportive) or negative (obstructive) impacts**, influencing intraday market sentiment with extreme precision.

Since Sarvatobhadra Chakra (SBC) is the most sensitive timing tool in Vedic Financial Astrology, adding *Navamsha* makes the prediction highly accurate for **minute-to-minute price reactions**, breakouts, reversals, and volatility pockets.

The tool shows continuous columns of:

- **Signs changing**
- **Navamsha signs changing**
- **Elements (Fire, Earth, Air, Water)**
- **Nakshatra & Nakshatra Pada**
- **Vedha influences → Front, Left, Right, and Navamsha Vedha**

This allows a trader to *see exactly when the market becomes favourable or risky*.

1. Detects Micro-Timing of Trend Shifts Using Navamsha Changes

Every 13°20′ of a sign changes the Rashi,
but **every 3°20′ changes the Navamsha**.

This small shift causes:

- Sudden volatility
- Sharp reversals
- Momentum surges
- Candle pattern changes

The table in the picture shows these micro-shifts minute by minute.
This is extremely important for:

- Intraday trading
- Scalping
- Market reversal prediction

2. Identifies Positive vs Negative Vedha Zones

Vedha means **obstruction or influence**.
The tool reveals:

- **Navamsha Vedha** → Most sensitive obstruction
- **Front Vedha** → Direct block to price rise
- **Left & Right Vedha** → Side influences causing confusion

In the picture, Vedha effects appear in the last columns.
These Vedhas often coincide with:

- Breakout failure
- False moves
- Rejection candles
- Sudden selling or buying pressure

A trader can instantly avoid dangerous timings.

3. Tracks Element Shifts (Fire, Earth, Air, Water) That Influence Market Energy

Each Navamsha belongs to one of four elements:

- **Fire** → Volatility, breakout, momentum
- **Earth** → Stability, slow movement
- **Air** → Confusion, sudden reversals
- **Water** → Emotional moves, profit booking

In the picture, rows are colour-coded to show the element transitions.
This helps traders understand *the energy of the market at that minute*.

4. Combines SBC + Navamsha = Highly Accurate Intraday Prediction

SBC alone is powerful.
But when Navamsha influence is added, the accuracy increases massively.

This tool gives:

- Minute-level bullish/bearish signals
- Exact timing of trend exhaustion
- Perfect entry/exit zones
- Risk level indications

This is why professional financial astrologers rely heavily on this combination.

19.1.1 KP Tool 1 - Intraday Market Sentiment

KP Tool 1 allows you to analyze **intraday market sentiment** using any planet based on KP Astrology principles. Each planet creates different emotional, logical, or sector-based effects in the market. This tutorial explains how to use the tool step-by-step.

Step 1: Select the Planet You Want to Analyze

Use the dropdown labeled **Planet:** and choose any planet:

- **Moon** → Best for intraday sentiment, volatility
- **Mercury** → Market logic, banking, Nifty movement
- **Sun** → Index direction, overall market confidence
- **Mars** → Breakouts, aggression, momentum
- **Jupiter** → Trend quality, banking & finance
- **Venus** → FMCG, auto, sideways trends
- **Saturn** → Long-term pressure or strength
- **Rahu/Ketu** → Sudden spikes, unexpected reversals

The tool recalculates sentiment based on KP Sub, Sub-Sub, house significations, and aspects of the chosen planet.

Step 2: Set the Date and Time Range

- **Start Date / End Date** → Choose the trading date

- **Start Time / End Time** → Set intraday time window (e.g., 09:00 to 16:00)
- **Interval (Minutes)** → How often you want predictions (1, 2, 5, 10-minute intervals)

The tool will compute sentiment for every time slot.

Step 3: Click "Compute"

The tool now analyzes the selected planet using the following KP indicators for each minute:

1. **Planet → Star Lord → Sub Lord → Sub-Sub Lord chain**
2. **5th Star Lord** → Speculation strength
3. **11th Star Lord** → Gains and profit window
4. **Sign Lord** → Emotional or trend support
5. **House significations** → 2, 6, 10, 11 (positive) vs. 8, 12 (negative)
6. **Aspect strength**
7. **Positive / Negative signal based on KP rules**

This produces a row-by-row sentiment timeline.

Step 4: Understand the Sentiment Color Coding

Negative

The planet activates houses 8 or 12, or sub-lords weaken sentiment → bearish or risky.

Positive

The planet activates houses 2, 6, 10, or 11 → bullish or favourable.

Neutral / Mixed

Mixed significations → sideways or unstable movement.

Each row represents the market condition for that specific minute.

Step 5: Use Strength Score for Confirmation

The **Strength** column shows a numerical score:

- **75+** → Strong bullish zone
- **60–75** → Mild bullish
- **50–60** → Neutral
- **Below 50** → Weak or bearish

Always pair the sentiment (color) with the strength score to make accurate trading decisions.

19.2.1 KP Tool 2 - Intraday Market Sentiment (With Diff Angle of KP)

KP Tool 2 shows how strong or weak one planet is at every few minutes in the day. It checks three things from KP astrology – the house where the planet is sitting, the house of its Star Lord, and the house of its Sub Lord. These houses tell us whether the planet is giving **profit houses (2, 6, 10, 11)** or **loss houses (8, 12)** at that time.

The **Strength** column and colors (dark green, light green, yellow, red) make it easy to see when the planet is very helpful or very risky for trading. When strength is high and houses are good, the market is more likely to support buying or holding positions. When strength is low and 8 or 12 appear, it warns of weak or dangerous periods.

In simple words, KP Tool 2 helps a trader know **"At what exact time is this planet working strongly for money and gains, and when is it better to stay careful?"** This makes intraday entry and exit timing much smarter than using price charts alone.

This tool shows you which shares are under "good stars" and which are under "bad stars" at any moment. It checks every company's birth Nakshatra and then, using Navatara (Sampat, Vipat, Kshema, Naidhana, etc.), tells you whether today's transiting planets are giving **Wealth, Well-Being, Achievement** or **Accident, Obstacles, Death, Not Favourable** results. In one colourful screen you can instantly see which stocks are astrologically strong and worth focusing on, and which ones you should avoid or handle with care—making your stock selection and risk control much smarter and faster.

1. What this tool is doing

- At the top you set **Date, Time and Market (India / USA / Canada)**.
- The tool then loads **all shares and their natal Nakshatra** (birth star of the company/share).
- Across the top you see **12 signs (Aries to Sagittarius)** with Nakshatras and their **Navatara groups**:
  - *Sampat (Wealth)*
  - *Vipat (Accident / Risk)*
  - *Kshema / Well Being*
  - *Pratyak / Obstacles*
  - *Naidhana / Death*
  - plus Friend / Good Friend / Not Fav, etc.

For the selected time, the program calculates **which planet is transiting in which Nakshatra/Navatara** and then checks how that Navatara relates to each share's **natal star**.

2. How to read the big coloured table

- Each **row** is a group of shares (Nifty 50, BPCL group, Cipla group, etc.).
- Each **column block** under a sign (Aries, Taurus, Gemini, …) shows the **Navatara result** for that sign's stars at that time:
    - "Wealth", "Well Being", "Achievement", "Friend", "G. Friend" → **good / supportive**
    - "Accident", "Obstacles", "Death", "Not Fav" → **bad / risky**

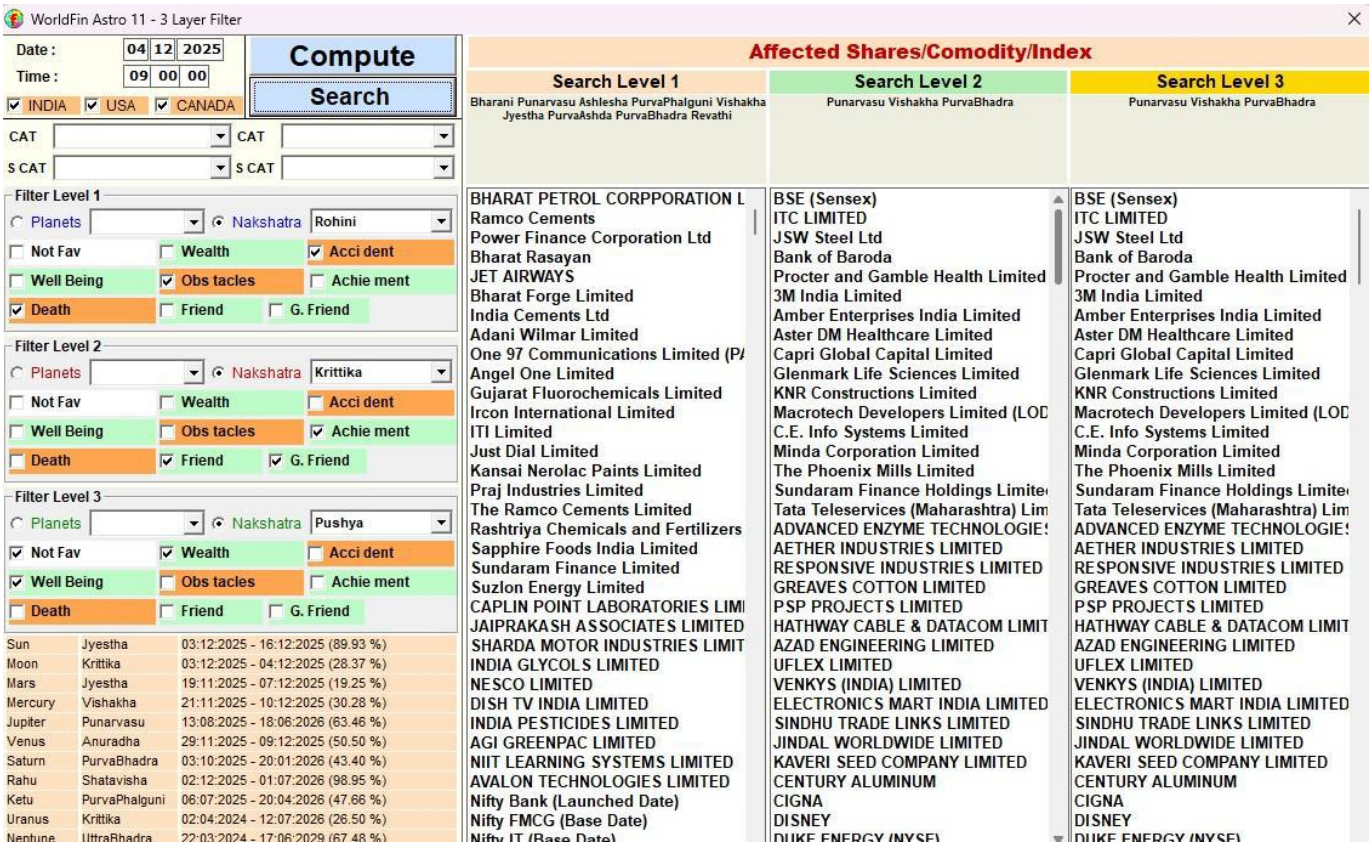
The colours help you see it quickly:
green-type cells = helpful Navatara,
orange-type cells = harmful Navatara,
white = neutral or no major effect.

So, for example, if today a planet is in a **Sampat (Wealth)** or **Friend** Navatara for a stock's natal star, that row will show **Wealth / G. Friend / Well Being** in green. If it is in **Vipat / Pratyak / Naidhana**, you will see **Accident / Obstacles / Death / Not Fav** in orange.

3. Why this is important in financial astrology

- It tells you **which stocks are sitting in a Wealth / Well-Being Navatara** for the current planetary transit – good time to focus on them for long or fresh entry.
- It also warns you **which stocks are under Accident / Death / Obstacles Navatara**, so you can avoid them or be extra careful.
- Because it checks this **for all planets and all shares at once**, you can very quickly build a watch-list of **favoured** and **unfavoured** stocks for that day.

19.4.1 KP Tool 4 - Shares/Equity 3 layers filter on the basis of Navatara



KP Tool 4 is a smart scanner that helps you pick the right shares using **three levels of KP + Navatara filters**. On the left, you choose a **planet and Nakshatra** for each level, and mark what you want to see – for example *Wealth / Well-Being / Friend* or *Accident / Obstacles / Death / Not Fav*. On the right, the tool instantly shows three lists of **affected shares or indices**: those passing Level 1, then Level 2, then Level 3.

This is very important in financial astrology because it lets you quickly find **stocks that are getting strong, repeated support from good stars and planets**, and also avoid those that are getting **multiple negative hits**. Instead of checking one share at a time, you can filter the whole market and build a watch-list of the best shares for buying, and a warning list of risky shares, all based on KP planetary transits and Navatara results at the chosen date and time.

KP Tool 4 is your smart "astro-filter" for the whole market. It checks all shares through three levels of KP and Nakshatra rules and shows only those stocks that pass your choices, like Wealth, Well-Being, Friend, or warns you about Accident, Obstacles, and Death stars. In one click you get clean lists of strong, supportive shares and risky, weaker shares, so you can quickly build a watchlist for buying and a separate list to avoid—making your trading faster, safer, and more confident.

KP Tool 5 tells you **how lucky or unlucky a share is on a given day** by using a clear **Navatara score**. For the selected share (for example NIFTY 50), the tool checks where all the transiting planets are sitting – whether they are in **Wealth / Well-Being / Achievement Navatara** or **Accident / Death / Problem Navatara** for that share's birth star. Each result gets a fixed score, like **+15, +30, –15**, and all scores are added to make one **Total Navatara Strength** number for that day.

From the first screen you can see **today's score** and which planets are helping or hurting the share. From the second screen you get a **calendar of scores for many days**, so you can quickly spot green high-score dates (more positive, better for buying or holding) and red low-score dates (more negative, risky or good for booking profit/avoiding). In short, this tool gives you an easy "rating" of the share's astrological strength for any day, past or future, which helps you plan entries, exits, and overall market strategy with more confidence.

KP Tool 6 helps you understand **when a company or stock will experience a positive or negative financial event**. The user selects an event type—like *Financial Status*—and the tool checks all planets to see whether they are supporting or blocking that event. The tool uses **Supporting Cusps** (good houses like 2, 6, 10, 11) and **Negative Cusps** (bad houses like 3, 5, 7, 12), all chosen by the user.

Using the planetary table in the picture, the tool shows:

- Which planets are giving **strong support**
- Which planets are creating **problems or delays**
- How each planet connects with the supporting or negating cusps
- A **Score (%)** for each planet showing how positive or negative it is

This helps the trader understand **whether the company is in a financially strong period or a weak period**, based on KP event fructification rules.

For example, in the picture:

- Jupiter has a **50% score**, meaning strong support for financial growth
- Mars and Saturn also give some support
- Mercury gives **0%**, meaning no help
- Moon and Rahu give low strength

This shows whether the company is entering a good financial cycle or facing challenges.

KP Tool 7 shows you **how positive or negative each planet is for a stock on any date**, using the **Vedha rules of the Sarvatobhadra Chakra (SBC)**. Vedha means "block" or "support." When planets create

positive Vedha, the stock feels supported. When planets create negative Vedha, the stock feels stress or pressure.

You see **today's Vedha Strength** for NIFTY 50:

- Each planet is checked in its **transit Nakshatra**
- The tool decides if that Nakshatra is **friendly or harmful**
- A score like **+15, +30, −15** is given
- All scores are added to show the **Total Vedha Strength**

Green rows = helpful planets
Orange rows = harmful planets

So the trader can see **how strong or weak the stock is today**.

KP Tool 7 shows **Vedha strength for many days**, like a monthly calendar.

You get a colour-coded timeline where:

- Green = more positive Vedha → good support
- Brown/orange = negative Vedha → risky or weak days
- Points on the right tell you exactly how strong or weak the day is

This helps the trader quickly find:

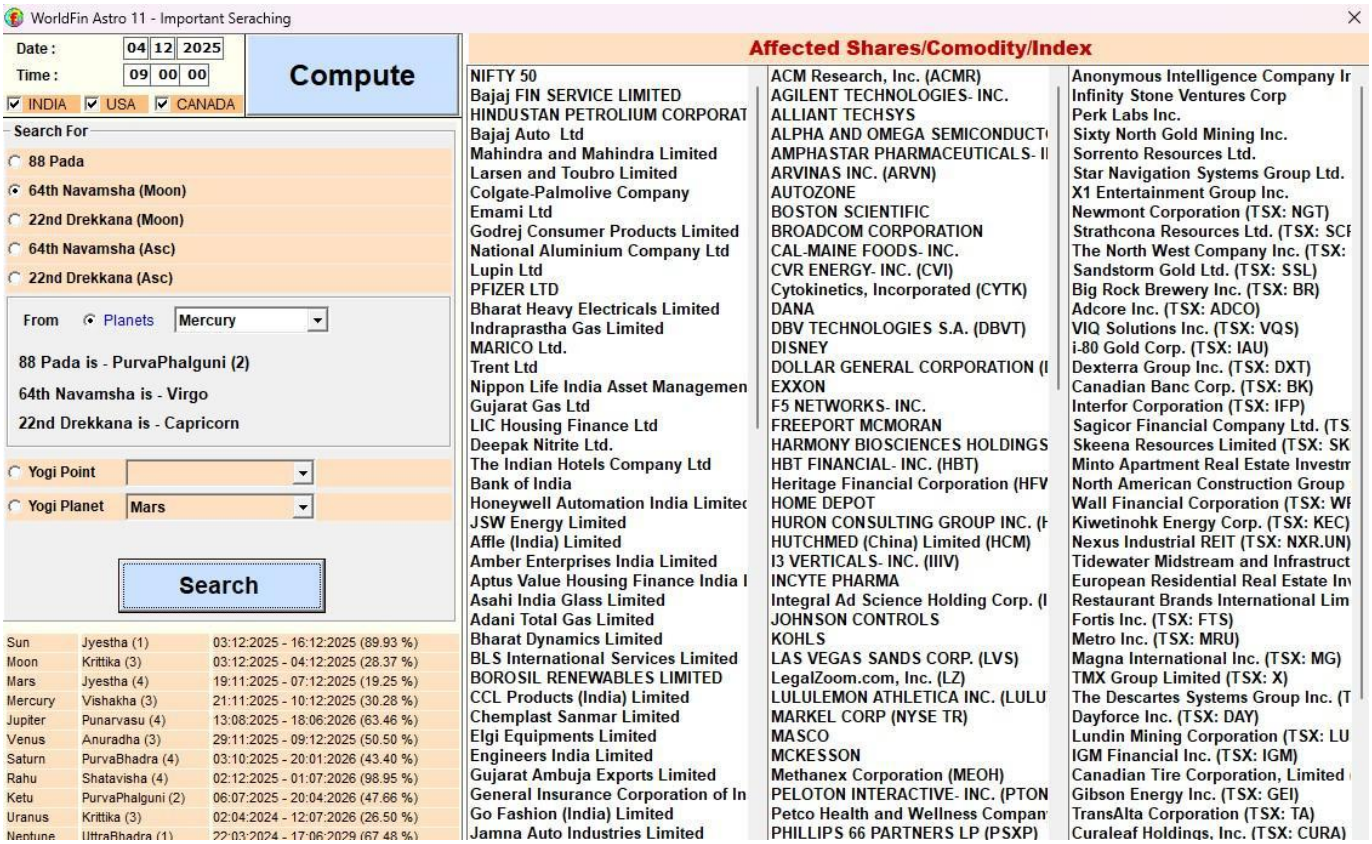
- **Best dates for buying or holding**
- **Dates where the stock may rise or stay stable**
- **Danger dates where price may fall, reverse, or stay weak**

The score lets you judge:

- High score = more favourable
- Low score = more harmful

This makes it very easy to plan trades for the coming days, weeks, or even months.

19.8.1 KP Tool 8 - Shares/Equity Market Important Searching



KP Tool 8 is a powerful stock-selection engine that uses some of the most important and sensitive astrological trigger points—**64th Navamsha, 88 Pada, 22nd Drekkana, Yogi Point, and Yogi Planet**—to instantly identify which shares in **India, USA, and Canada** are currently sitting in highly reactive zones. These positions are known in financial astrology for creating sudden movements, breakthroughs, reversals, or volatility in a stock.

By matching the **exact transit position of planets** (like Mercury, Sun, or others) with these critical points, the tool filters and displays all shares that are likely to experience strong effects. The picture shows how, with just one click, hundreds of global stocks get categorized based on whether they are currently aligned with these sensitive degrees. This helps traders quickly spot hidden opportunities, early trend signals, and potential risk zones.

In simple terms, KP Tool 8 works like a high-precision scanner that tells you **"Which stocks are being hit by the most powerful astrological triggers today?"**—making it a uniquely valuable tool for timing trades and recognizing market-moving conditions with professional accuracy.

KP Tool 8 is one of the most powerful scanners in financial astrology, designed to instantly find stocks from **India, USA, and Canada** that match rare and highly sensitive astrological points like **64th Navamsha, 88 Pada, 22nd Drekkana, Yogi Point, and Yogi Planet**. Instead of checking thousands of charts manually, this tool automatically filters and displays only those shares that are currently activated by important transiting planets. This makes it incredibly easy to identify stocks that are entering a **high-impact zone**, where sudden momentum, reversal, or breakout is most likely. With its precise search

engine and real-time alignment checking, KP Tool 8 gives traders a major edge by highlighting stocks that are astrologically "switched on," helping users focus only on the most promising opportunities for the day.

The **4 Step Theory Tool** is a powerful monthly trend-forecasting system based on KP Astrology. It helps traders understand how the overall market is likely to behave—**whether the trend will lean more toward buying (bullish) or selling (bearish)**—for each day of the selected month. The image shows how the tool examines the **Cusp Lord, Star Lord, Sub-Lord, and Sub-Lords of these Lords**, which form the four essential steps of KP Theory. By checking how these planetary lords are connected to profit-giving or loss-giving houses, the tool calculates **Daily Buying % and Selling %** for the entire month.

The tool provides:

- **A clear daily trend score** (e.g., 75% buying vs 60% selling)
- **Quick bullish or bearish bias for each trading date**
- **Planetary reasoning behind each trend**, based on KP's highly accurate cusp-analysis
- **A month-long roadmap** showing when the market is supportive for long trades and when caution is required

This makes the tool extremely valuable for positional traders, swing traders, and analysts, as it converts complex KP astrology calculations into simple, easy-to-use daily guidance. It acts like a **monthly trading calendar**, helping users avoid risky days and focus on strong high-probability dates for better market decisions.

The **Naadi Coordinate Monthly Trend Tool** helps traders understand how the market will behave each day by using special KP astrology rules. It studies the **Cusp Lord**, **Star Lord**, **Sub Lord**, and **Sub-Sub Lord** for every date in the month and automatically calculates the **Buying %** and **Selling %**. The tool becomes even more powerful because the user can select **Positive Cusps** and **Negative Cusps**, which makes the prediction more accurate for different types of markets like bullish, bearish, or sideways.

By looking at the colors and percentages in the table, the user can easily see which days are strong for buying and which days have higher selling pressure. This makes planning trades much easier. Instead of guessing, the trader gets a clean monthly map of market mood based on Naadi astrology. This tool is very useful for short-term traders, option traders, and investors who want a safer, smarter way to time the market.

The **Naadi Coordinate Intraday Tool** helps traders understand the *minute-to-minute market mood* using powerful KP–Naadi rules. By checking the Cusp Lord, Star Lord, Sub Lord, and Sub-Sub Lord for each 5-minute interval, the tool shows clear **buying and selling percentages** throughout the trading day. The user can also choose which cusps are Positive and which are Negative, making the results more accurate for their personal strategy.

You can see every time slot shows a color-coded trend—**green for buying strength, orange for selling pressure**—so the trader immediately knows whether the market is likely to rise or fall during that period. This gives the user a strong intraday advantage because it reveals hidden planetary shifts that normal technical charts cannot detect. In simple words, this tool turns complex KP astrology into an easy intraday trading guide, helping users plan entries, exits, and stop-loss levels with much more confidence.

KP Tool 1 is one of the most powerful tools for traders because it works like a **live market mood scanner**. Every few minutes, it checks how the selected planet (Moon, Mercury, Jupiter, etc.) is moving and which houses it is activating in the KP system. In financial astrology, these house connections decide whether the market energy becomes **bullish, bearish, or neutral**.

The tool shows **Positive or Negative signals** along with a **strength score**, so the trader instantly knows whether the market is entering a buying phase, a selling phase, or a risky zone. The picture shows how each time slot displays:

- Planet's Star Lord, Sub Lord, and Sign Lord
- Strength (from weak to strong)
- Positive/Negative trend color
- Detailed KP significations (planet, nakshatra, sub, and sub-sub)

Because the user can customize which significators to include, the system becomes perfectly adjustable for **stocks, indices, forex, commodities, or crypto**. This makes the planet-based signals extremely accurate for different types of markets.

The **Panchang Tool 1 (Monthly Ephemeris)** is one of the most powerful foundations of financial astrology because it gives a complete, day-by-day view of planetary positions along with all essential dignities. It displays each planet's exact longitude, Nakshatra, retrograde motion, exaltation, debilitation, combustion, friendly/enemy sign, Pushkara degrees, Mrityu Bhaga, Vish Navamsha, Dagdha Rashi, and much more—everything a market astrologer needs in one screen. This allows the user to immediately judge market sentiment for any date by checking whether planets are strong, weak, afflicted, or exalted. The tool also gives Sun-rise times and Tithi for every day, which helps in identifying auspicious or sensitive trading windows. With flexible settings like **True/Mean Rahu** and the ability to switch to **Tropical positions**, this tool becomes a highly accurate ephemeris engine for global traders.

The **Panchang Tool 2 (Daily Lagna & Navamsha Change)** is extremely valuable in financial astrology because it shows the **exact intraday timing of Lagna shifts and Navamsha transitions**, which directly influence market mood, sector behavior, and short-term volatility. Every time block displays the Lagna sign along with the Navamsha it falls into, plus special conditions like **Pushkar**, **Vargottam**, **Vish (inauspicious)**, and **Shukra/Visha/Sarpa influences**. These micro-timings help traders identify when the market is entering a supportive window (e.g., Cancer Navamsha with Pushkar) or a risky window (e.g., Vish Navamsha). Because each Lagna activates different houses for each index or stock, this tool becomes a precise intraday guide for spotting bullish, neutral, or bearish moments. By tracking these fast-changing energies hour by hour, financial astrologers can fine-tune entry/exit timing, avoid volatile periods, and trade with far greater accuracy.

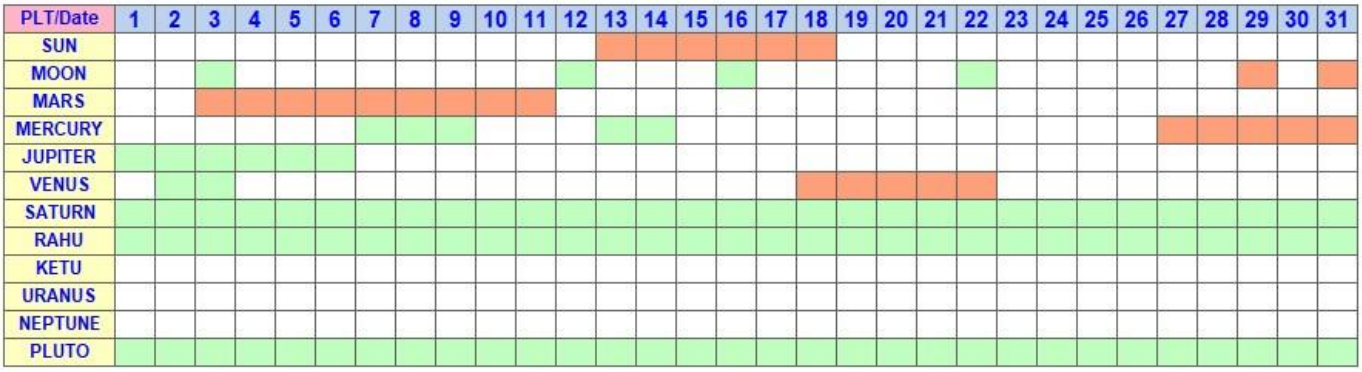
Compact View of Planets for December 2025



Panchang Tool 3 is a powerful daily decision-making aid for financial astrology. It shows the complete daily planetary ephemeris along with each planet's **benefic or malefic influence**, such as *exalted, friendly sign, enemy sign, retrograde, combust,* and more. By reading these colour-coded cues, traders can instantly see which planets are strong (green) and which are weak or harmful (orange/red). This helps you judge whether the day's market sentiment is likely to be positive, risky, or mixed.

The tool also includes a **compact monthly view**, where each planet's good or bad dates are displayed in a single visual chart. In minutes, a user can understand which dates favour **trend, volatility, reversal, buying pressure, or selling pressure**—all driven by planetary strengths. This allows astrologers and traders to plan safer entries, exits, and avoid high-risk days caused by dangerous planetary conditions like combustion, debilitation, or enemy placement.

Panchang Tool 4 gives a clean, calendar-style view of the important daily astrological factors that affect market mood — such as **Tithi**, **Nakshatra**, **Yoga**, **Karan**, **Sunrise/Sunset**, and daily planetary changes. Each day is marked with easy color codes (green, yellow, red) to quickly show whether the day carries **supportive**, **neutral**, or **challenging** energies. This helps financial astrologers understand which days are better for buying, selling, taking risks, or staying cautious. The tool saves time by combining all essential Panchang details in a small box for each date, making it extremely simple to plan trades for the entire month without checking long, complicated Panchang books. It's a perfect daily guide for traders who want to trade in harmony with the natural energy of the day.

Panchang Tool 5 gives a complete month-wise view of **Tithi, Nakshatra, Yoga, Karana, Sunrise–Sunset timings, Moon Sign changes, and Special Planetary Events** all in one powerful table. For financial astrology, these elements are extremely important because market mood often reacts to changes in lunar energy, fast-moving tithis, and shifting yogas. The tool highlights every day's positive, neutral, or challenging vibrations using color coding, so a trader can instantly see which days are suitable for **high-risk trades, cautious entries, or staying out of the market**. The "Special Points of the Day" column is especially useful because it shows powerful combinations like **Bhadra, Siddha Yoga, Shiva Yoga, Purnima, Amavasya, Rahu/Ketu timings, planetary shifts**, and other events that can create volatility or strong trends in the market. Instead of checking multiple books or websites, this tool gives a complete monthly Panchang at a glance, helping traders plan their strategies with better timing and more confidence.

20.6.1 Panchang Tool 6 (Monthly Declination/Latitude of Planets)

Monthly Lattitude/Declination of Planets

Panchang Tool 6 provides the complete **monthly declination and latitude (Kranti & Shara)** of every major planet, which is extremely valuable for financial astrology because planetary declination cycles often trigger **strong trend changes, volatility spikes, and reversal points** in stock markets. Many market astrologers, including Gann and Sepharial, used declination to detect when a planet was **Out of Bounds**, crossing the celestial equator, or reaching extreme north/south positions—events that frequently coincide with **sharp market rallies, corrections, or panic moves**.

From the picture, traders get a clean day-wise table showing the **exact Kranti (declination)** and **Shara (latitude)** of the Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, Uranus, Neptune, and Pluto for the entire month. This allows users to:

- Identify **planetary extremes** where markets often behave unpredictably.
- Track **Moon declination swings**, useful for short-term intraday and swing trading.
- Spot **major inversion dates** when multiple planets reach declination peaks.
- Combine declination tools with Gann cycles for **high-accuracy trend forecasting**.

This tool is a game-changer for traders who operate in fast-moving markets like **crypto, bullion, crude oil, forex, and high-volatility indices**. It tracks **minute-by-minute planetary Sign–Star–Sub–Sub changes** and instantly shows how every small shift in KP significations impacts market energy. The tool detects every micro-transition of the Ascendant and planets and highlights **positive or negative vedhas** in real time, giving traders a razor-sharp timing advantage. With the integrated Sarvatobhadra Chakra view, users can visually see which Nakshatra, vowel, direction, or planet is being hit at each minute—allowing precise entry–exit timing, identifying breakout moments, and avoiding reversal traps. For markets where **seconds matter**, this tool becomes an indispensable timing instrument, offering the most detailed KP-level monitoring available in financial astrology.

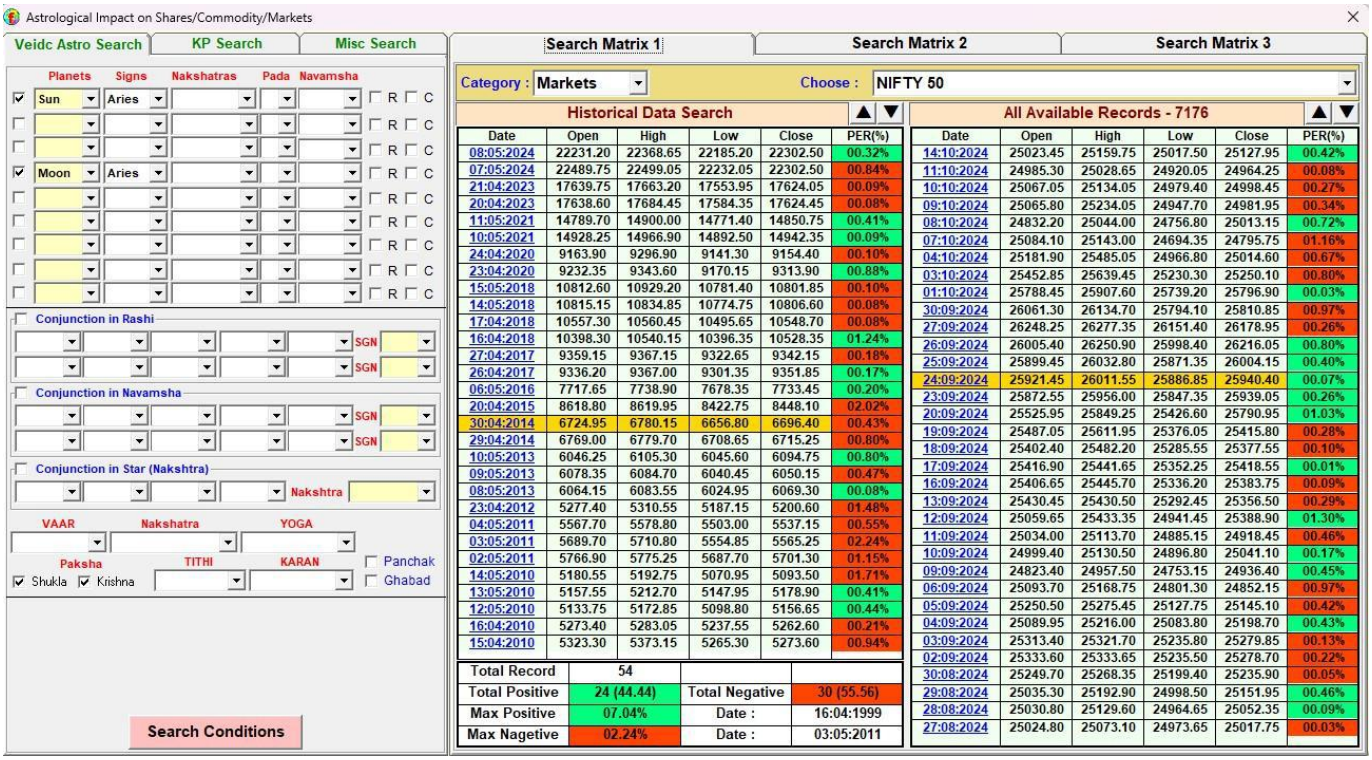
The **Visual Transit Tool** is one of the most important decision-making tools in financial astrology because it gives a complete *real-time view* of how planets are moving and interacting with each other in the market. The circular wheel clearly shows **planetary positions, nakshatras, signs, degrees, and angles** at every moment — just like a live dashboard of cosmic forces. This helps a trader instantly identify major market-moving factors such as conjunctions, oppositions, squares, trines, and sensitive degree hits.

On the right side, the tool displays detailed **planet-to-planet aspect distances**, which are color-coded to highlight strong positive or negative influences. Such aspects often trigger market volatility, reversals, big rallies, or sudden crashes. The bottom panel shows the **exact degree, star, sub, sub-lord, speed, latitude, declination, and dignity** of each planet — all crucial elements for forecasting money flow, trend strength, and timing.

With the ability to move transit time forward or backward in minutes, traders can visually track how a planetary angle will form or break, helping them catch the *exact moment* when the market sentiment changes. This tool is essential for predicting intraday turns, multi-day reversals, or high-impact events in stocks, commodities, crypto, and indices, making it a must-have for serious financial astrologers and active traders.

23.1.1 Astro Planet Movements Impact Search Tool



The **Astro Planet Movements Impact Search Tool** is one of the most powerful research engines in financial astrology because it allows traders to test any astrological condition directly against **real historical market data**. Using the Vedic Astro Search panel, you can filter days based on planets in specific **Signs, Nakshatras, Padas, Navamshas**, or check whether a planet was **Retrograde, Combust**, or forming a **conjunction** in Rashi, Nakshatra, or Navamsha. You can even include **Panchanga elements** like Tithi, Vaar, Nakshatra, Yoga, Karana, Panchak, and Ghabad Muhurt. Once you set a condition, the tool scans the entire historical record and instantly tells you how many times the market closed **positive or negative** under that exact planetary setup. This makes it extremely valuable for discovering winning astrological patterns, back-testing theories, building high-accuracy trading rules, and understanding how specific planetary combinations influence NIFTY50, stocks, commodities, or global indices. Through this tool, astrology becomes measurable, data-driven, and highly practical for modern traders.

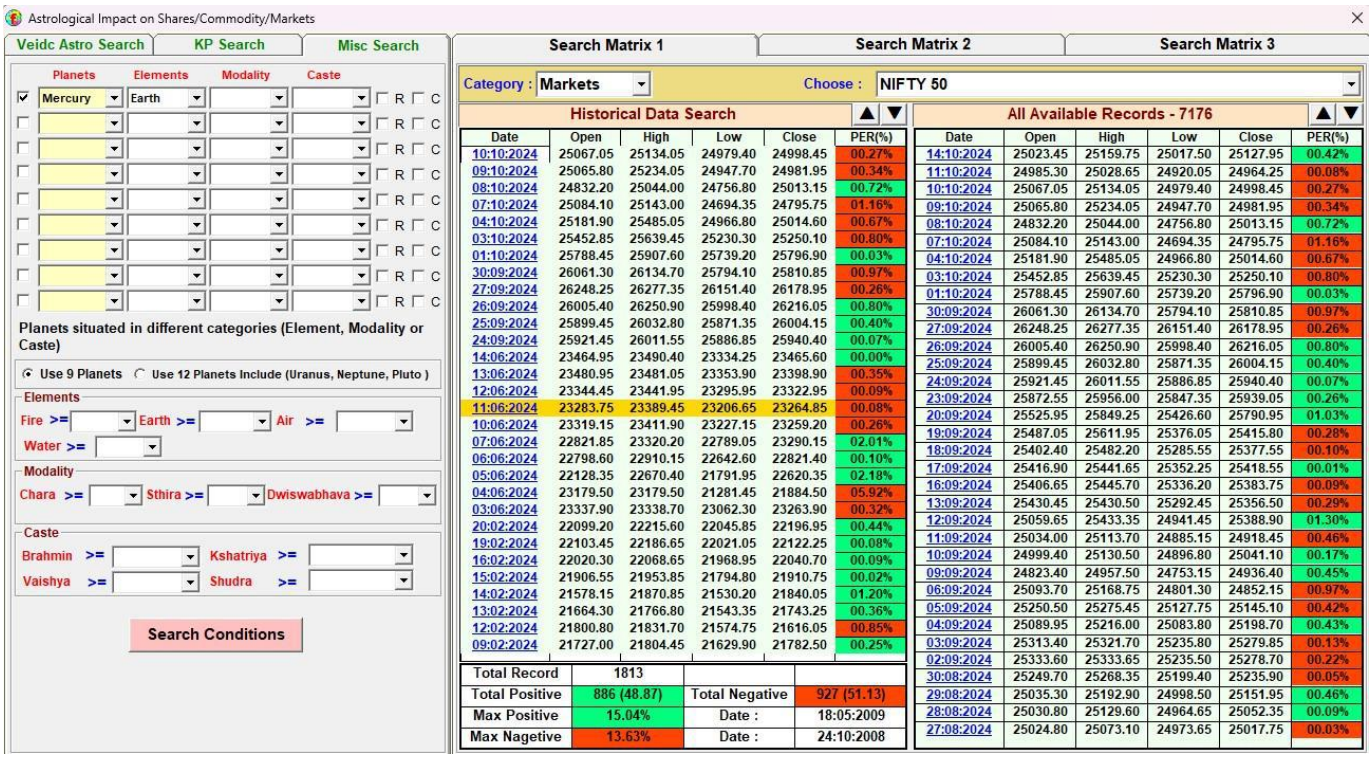
The **KP Astro Search Tool** brings the precision of KP astrology directly into market research, allowing traders to test how specific **Day Lords, Sign Lords, Star Lords, Sub Lords, and Sub-Sub Lords** have historically influenced market movement. By selecting any combination of KP significators, the tool instantly scans the entire historical database and reveals whether the market closed **positive or negative** on days matching those exact planetary conditions. This gives traders a scientific way to validate KP rules, discover high-probability setups, and build powerful trading strategies based purely on proven market behavior. For researchers, it is an unmatched tool to study planetary influence with real data — transforming intuition into measurable, dependable results.

23.3.1 Miscellaneous Search Tool



The Miscellaneous Search Tool is a powerful research feature that helps traders understand how the stock market reacts when planets occupy certain **elements (Fire, Earth, Air, Water)**, **modalities (Movable, Fixed, Dual)** or **castes (Brahmin, Kshatriya, Vaishya, Shudra)**. Instead of guessing, the tool scans **entire historical market data** and shows whether such planetary combinations created **positive or negative** days in the past. The color-coded results make it easy to see patterns instantly. With this tool, any trader or researcher can discover which planetary distributions bring strength or weakness to the market, how many planets in Fire or Fixed signs impact trend direction, and which cosmic setups produce strong rallies or sudden drops. It is a unique and highly valuable tool for building reliable trading strategies using real astrological impact, backed by years of historical evidence.

The GapUp–GapDown Search Tool is extremely valuable for traders because it reveals how often a stock or index opens with a strong jump (GapUp), a fall (GapDown), or a neutral start across its entire trading history. By combining this data with **panchang factors** such as **nakshatra, tithi, yoga, karan, and weekday**, the tool helps users clearly see which cosmic conditions most often create bullish openings and which ones lead to bearish starts. The colored results make it easy to compare thousands of past records and identify repeating astrological patterns behind market gaps. This allows traders and researchers to understand the hidden timing of smart entries, avoid risky days, and predict opening strength using real historical evidence. It is one of the most practical tools for turning astrology into a measurable trading advantage.

23.5.1 Panchang Based Rating Tool

The Panchang Based Rating Tool helps traders look into the future performance of any stock by evaluating daily **Vaar (weekday), Tithi, Nakshatra, Yoga, and Karan** — the five pillars of the Panchang. Each of these elements has a predefined strength value, and the tool combines them to give a daily rating score. This makes it easy to identify which upcoming dates are naturally supportive, neutral, or risky for market movement. By scanning future days with colored highlights and point values, traders can quickly select high-probability dates for buying or selling and avoid low-rated days that may bring weakness or volatility. This tool converts ancient Panchang wisdom into a practical, data-backed forecasting system, giving users a clear astrological edge in planning trades ahead of time.

24.1.1 Shares Graphical View Tool

The Shares Graphical View tool is a powerful feature that lets traders instantly visualize the complete price history of any stock from India, USA, or Canada. By selecting a custom time range, users can study long-term market cycles, major trend reversals, sudden crashes, and extended rallies — all of which are essential for connecting price movements with astrological events. This tool helps financial astrologers identify how planets influenced the market during key periods such as tops, bottoms, and breakout phases. The clean, zoom-free line chart makes it easy to compare past planetary transits with historical price swings, improving prediction accuracy for future market behavior. Whether you are studying Saturn cycles, Jupiter returns, eclipses, or retrograde impacts, this visual tool creates a clear bridge between astrology and real market data.

24.2.1 Shares Graphical View - Planets in Sign/Star or Aspect Search

This tool is extremely important for financial astrologers because it allows users to visually study how the market behaved whenever a specific planetary condition occurred. By selecting any planet in a particular **sign**, **nakshatra**, or **aspect** with another planet, the software automatically highlights all matching periods on the historical price chart. This gives traders a crystal-clear understanding of how powerful events — such as Jupiter entering Aries, Saturn aspecting the Moon, or Mars forming a square — have influenced major rallies, corrections, or sideways movements. Instead of guessing, users can directly see on the graph (marked in green/red segments) what the market actually did during those astrological combinations. This turns planetary research into a practical forecasting tool, helping traders identify repeating patterns and high-probability setups for future market moves.

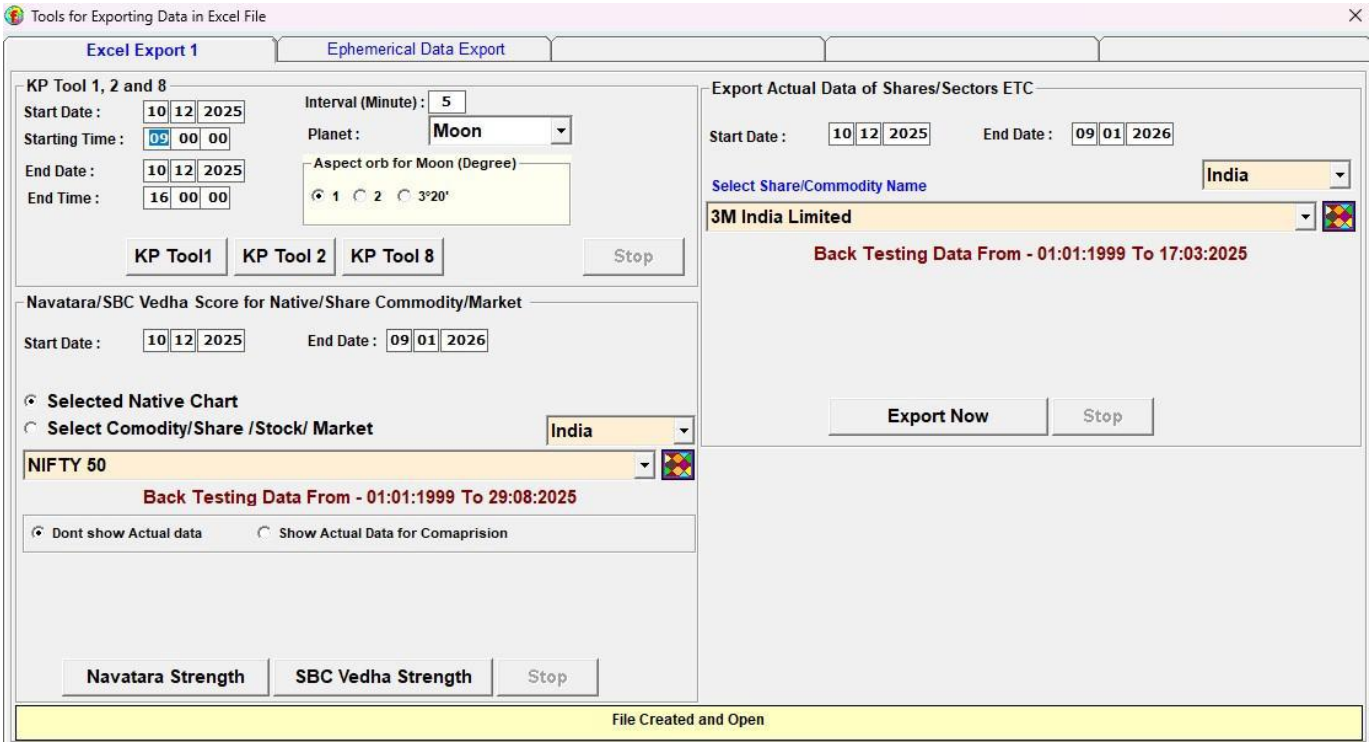
24.3.1 Shares Graphical View - Solar & Lunar Eclipse Search

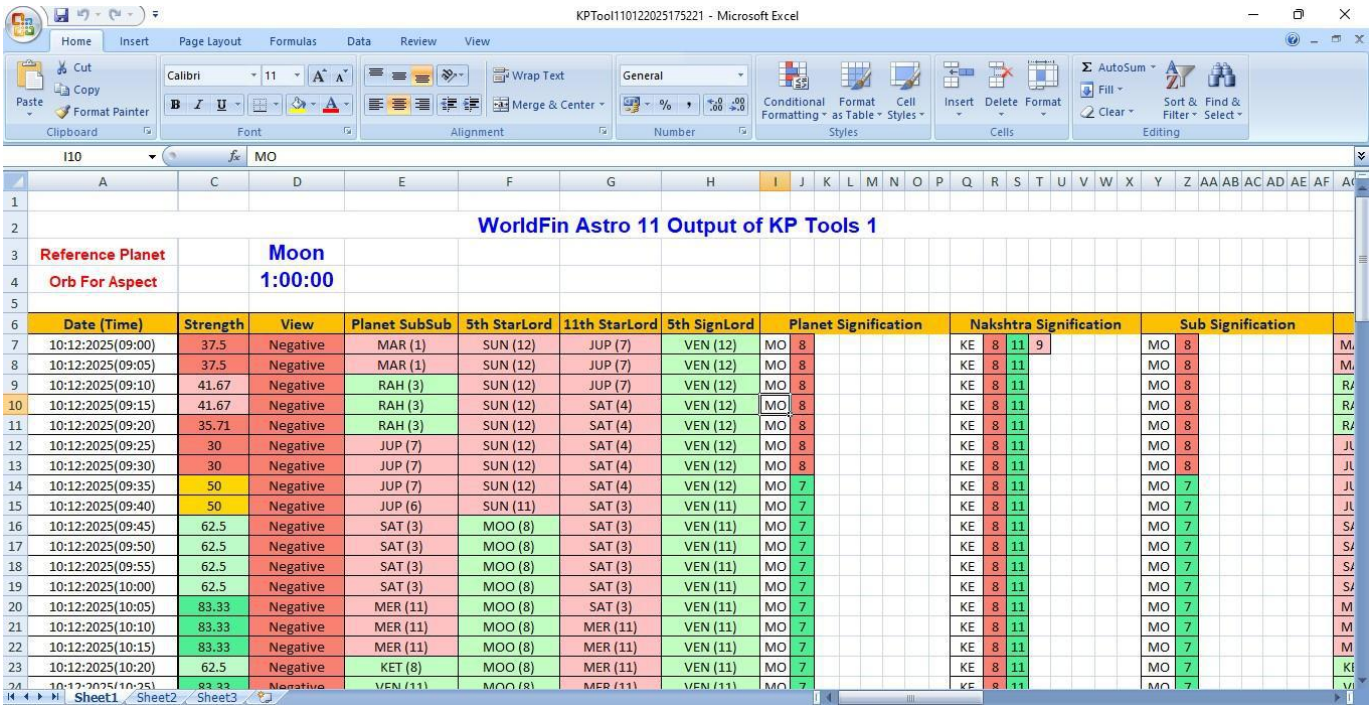
Solar and Lunar Eclipses are some of the most powerful astrological events that often trigger major turning points, volatility spikes, or sudden sentiment shifts in financial markets. This tool allows users to instantly locate every eclipse within any selected time period and see its exact impact on the price chart. As shown in the image, each eclipse is marked clearly on the graph, making it easy to observe whether the market reversed, accelerated, or paused around those dates. By visually connecting eclipse events with market highs, lows, and trend changes, traders and researchers get a deeper understanding of how these cosmic events influence momentum and investor psychology. This transforms eclipse study into a practical forecasting method that helps users better prepare for upcoming market shocks or opportunities.

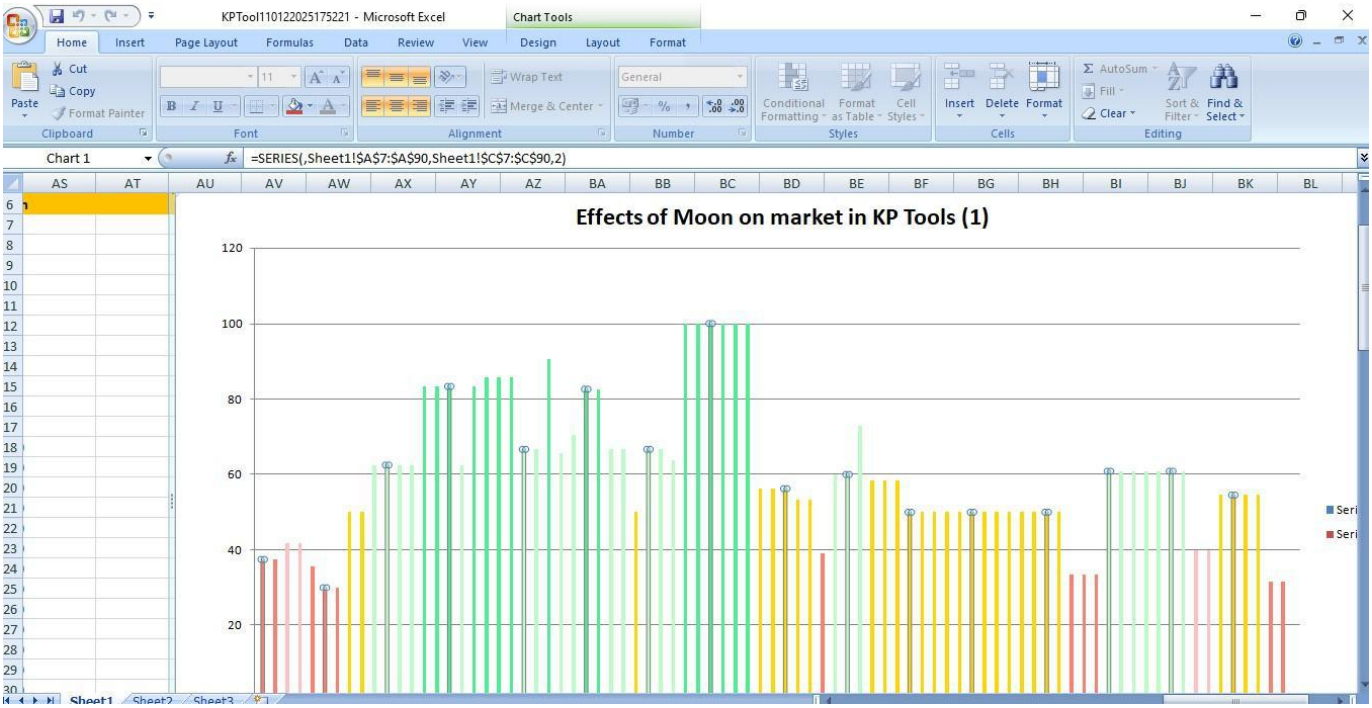
24.4.1 Shares Graphical View - Graphical Planets Ephemeris

The Graphical Planets Ephemeris tool visually overlays the movement of any selected planet—such as the Sun, Mercury, Jupiter, or Saturn—directly on the price chart, allowing traders to see how market trends align with planetary cycles. As shown in the image, the smooth rising and falling curves of the planet's motion run alongside the real market data, making it easy to spot correlations between planetary transits and major price swings. This visual link helps traders understand when a planet enters a new sign, slows down, goes retrograde, or reaches critical degrees that often trigger market reactions. By watching planetary curves interact with price action, users gain a powerful timing advantage to anticipate trend reversals, momentum shifts, or periods of increased volatility. This makes the tool extremely valuable for both forecasting and research in financial astrology.

25.1.1 Tool for Exporting major computed values in MSExcel.







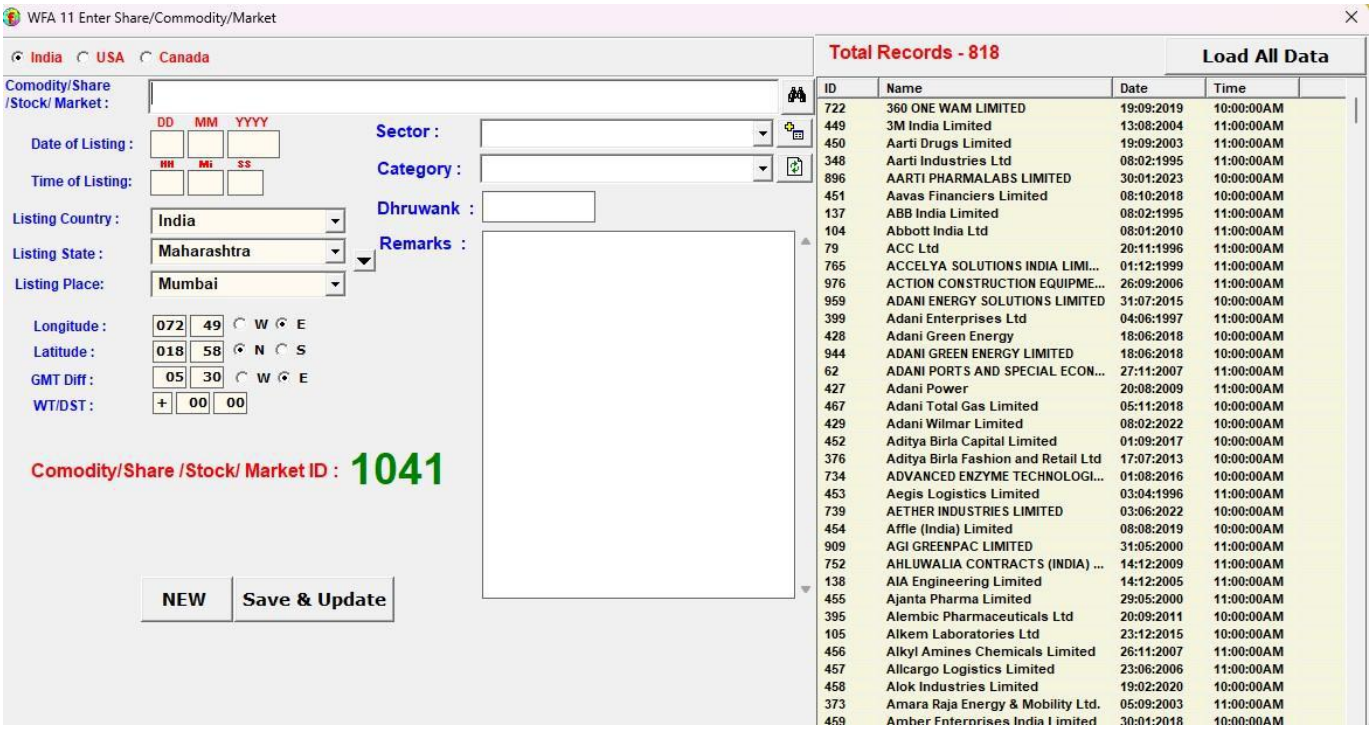
Importance of the Excel Export Tool in Financial Astrology

- The Excel Export Tool allows users to **export complex astrological computations** such as KP Tool outputs, planetary strengths, movement intervals, and back-testing data directly into Microsoft Excel.
- It enables **deep research**, letting traders and analysts study the effect of planets, nakshatras, aspects, and KP significators on market trends in a structured spreadsheet format.
- Users can **compare astrological parameters with real-price data**, enabling accurate validation, pattern discovery, and strategy development.
- The exported Excel sheets help in creating **custom graphs, performance models, and automated trading systems** that integrate astrological logic with technical market data.
- By exporting years of calculated astrological influence, researchers can perform **statistical analysis, cycle detection, and predictive modeling** with much higher clarity.

Purpose of This Tool

- To give traders and researchers a way to **store, analyze, and visualize** KP Tools (Tool 1, Tool 2, Tool 8) outputs outside the software.
- To provide a mechanism for **back-testing planetary effects** on any share, commodity, or index from 1999 to the present.
- To generate **mass Excel reports** for Moon-based timing, planetary aspects, hourly strength calculation, and SBC/Navatara Vedha scores.
- To allow users to **export actual market OHLC data** along with astrological signals for research and comparison.

26.1.1 Share/Equity Entry & Editor



This tool allows the user to **add, edit, or update** the complete astrological profile of any share, equity, commodity, or market index of their choice. Since different stocks are listed at different dates, times, and locations, their **birth data** becomes the foundation for all financial astrology calculations inside WorldFin Astro 11. This tool ensures that every share has accurate listing details, enabling precise analysis across all modules.

Importance in Financial Astrology

- Ensures every share has **correct birth horoscope data**, which is essential for accurate prediction.
- Allows users to update or correct stock details when new information becomes available.
- Enables personalized research—users can add **any stock from India, USA, or Canada**, even if not included in the default database.
- Ensures accurate results in all tools such as **Panchang analysis, KP Tools, SBC Tools, Navamsha calculations, Transit impact tools, and planetary effect scanners**.
- Provides a consistent base for **historical back-testing**, improving the reliability of your financial astrology strategy.

Purpose of This Tool

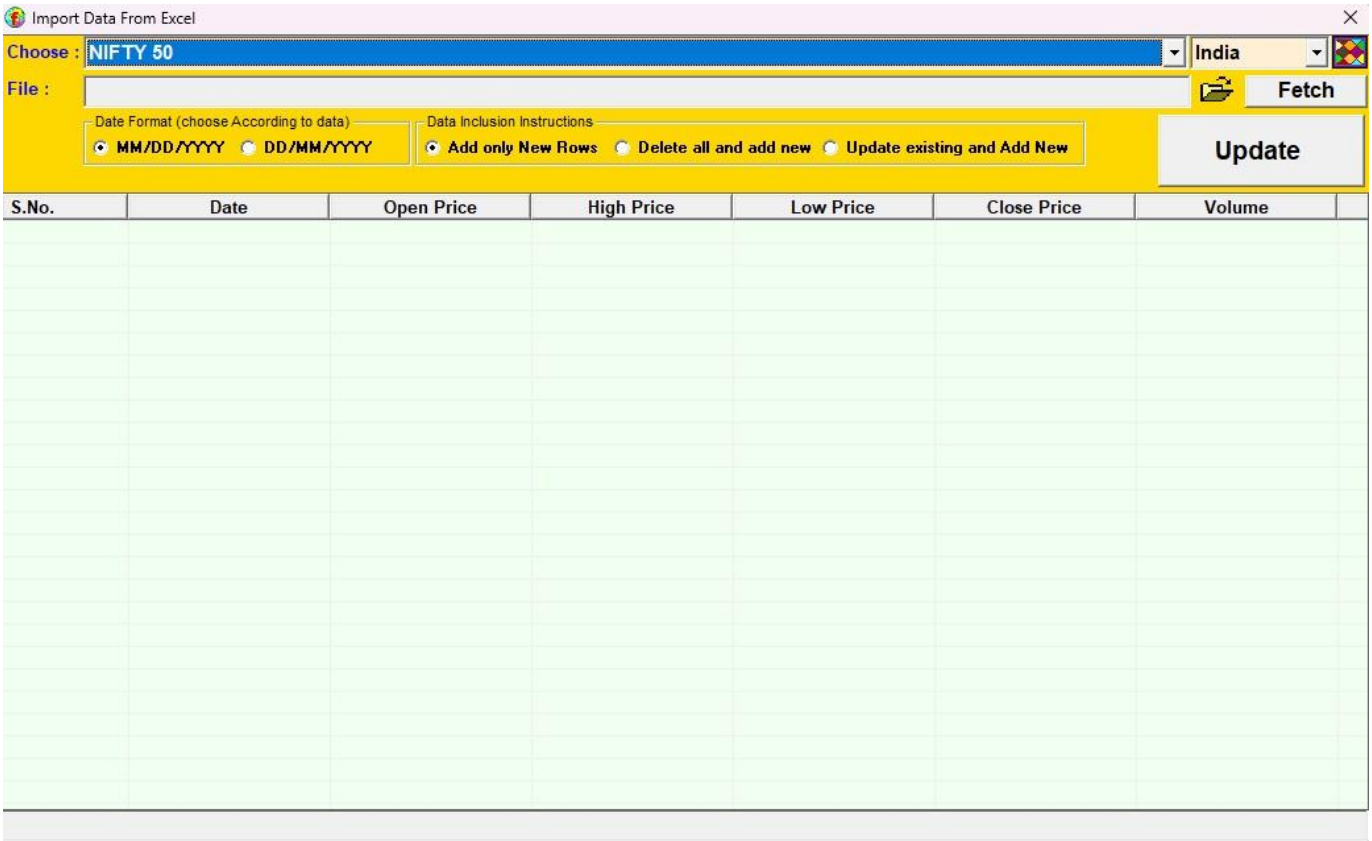
- To create the **astrological profile** of any share or commodity.
- To maintain a clean and accurate **database of all market instruments** used inside the application.
- To allow seamless updates for sector, category, dhruwank, remarks, latitude/longitude, and listing time—ensuring every module reads authentic data.

- To support research-oriented users in building customized stock lists for sector-wise or country-wise analysis.

How to Use This Tool (Step-by-Step)

- Enter the name of the share, commodity, or market index.
- Select the listing **date and exact time** at which the stock was first listed on the exchange.
- Choose **country, state, and listing city** to automatically set longitude, latitude, timezone, and daylight settings.
- Assign **Sector** and **Category** to organize the stock for sector-based astrology research.
- Provide **Dhruwank** and any personal remarks if used in your research method.
- Review the automatically generated **Unique Market ID** for internal reference.
- Click **Save & Update** to store the stock in your master database.
- Use **Load All Data** to view or edit existing entries displayed on the right panel.

27.1.1 Import Share/Equity Historical Data



This tool allows the user to **import historical price data** of any share, index, commodity, or market instrument directly from an Excel file into the software's internal database. Since financial astrology depends heavily on long-term price movement studies, this tool ensures that users can bring their own datasets for accurate back-testing and research.

Importance in Financial Astrology

- Helps create a **complete price history** required for analysing planetary influence on markets.
- Allows importing **custom or external data sources**, making the software suitable for global or personal datasets.
- Ensures accurate results in tools such as:
  - KP Tools
  - SBC Tools
  - Time-Cycle and Movement Analysis
  - GapUp/GapDown Study
  - Monthly/Daily Trend Tools
- Enables researchers to test multiple data samples and compare planetary conditions with real historical outcomes.
- Essential for users who track specific instruments not included in default data.

Purpose of This Tool

- To populate or update the software's internal database with **Open, High, Low, Close, Volume, and Date** records.
- To provide flexibility to:
  - Add only new rows
  - Delete existing data and reload completely
  - Update existing rows and add new rows
- To ensure that market data stays synchronized with astrological calculations.

How to Use This Tool (Step-by-Step)

- Choose the desired share/equity or commodity from the dropdown list.
- Browse and select the Excel file containing historical OHLC data.
- Select the correct **date format** according to your Excel sheet (MM/DD/YYYY or DD/MM/YYYY).
- Choose your preferred **data inclusion method**:
  - Add only new rows
  - Delete all and add fresh data
  - Update existing and add new
- Click **Fetch** to preview the data inside the grid.
- Confirm the entries and press **Update** to save the data into the software database.
- Once updated, the data is immediately available for **all research tools and calculations** within WorldFin Astro 11.

28.1.1 Monthly Graphical View of share, index, commodity, or market instrument

This tool provides a **monthly graphical analysis** of any selected share, index, commodity, or market instrument, combined with detailed **astrological events and Panchang information**. It visually overlays market price movement with planetary sign changes, Nakshatra transitions, Tithi effects, and important lunar events such as **Purnima** and **Amavasya**, giving traders deeper insight into how celestial factors influence market behaviour.

Importance in Financial Astrology

- Helps users identify **astro-market correlations** by matching daily price movements with planetary shifts.
- Shows **planetary sign, Nakshatra, and Pada changes** directly below each day of the month for easy alignment with price candles.
- Highlights major lunar phases (Purnima, Amavasya), which often correspond with **trend reversals or volatility spikes**.
- Allows traders and researchers to study historical monthly patterns and discover supportive or stressful astrological conditions.
- Offers a quick, at-a-glance view of the **entire month's bullish and bearish movements** with real market candles.

Purpose of This Tool

- To visually connect **astrological events** with **daily market performance**.
- To assist in identifying recurring monthly patterns influenced by:

    - Tithi changes
    - Nakshatra shifts
    - Planetary ingress
    - Retrograde or direct motions
- To provide a simplified yet powerful research interface for forecasting and study.

29.1.1 Hardware and Software Requirement and Price for this Application

Operating System Compatibility

WorldFin Astro 11 is fully compatible with the following Windows operating systems:

- **Windows 7**
- **Windows 8 / 8.1**
- **Windows 10**
- **Windows 11**

Minimum Hardware Specifications

Due to the detailed and computation-intensive nature of WorldFin Astro 11, a stable and efficient hardware configuration is essential for smooth performance.

Component	Minimum Requirement
Processor	Intel® Core i5 (5th Generation) or higher
RAM	4 GB or higher
Hard Disk Space	2 GB or higher
Display Resolution	1366 × 768
Internet	A stable, good-speed internet connection is required for activation, data synchronization, and certain online features

Activation Requirement

An **active and reliable internet connection** is mandatory to complete product activation and to enable seamless access to server-based features.

Additional Requirements for Excel Features

To use the **Excel Data Import and Export** functionalities, one of the following versions of Microsoft Office must be installed on your system:

- **Microsoft Office 2007**
- **Microsoft Office 365**

MRP of this application is – 120,000 INR
